WARD LINES.

CITY OF NEW BEDFORD,
IN BOARD OF ALDERMEN,
December 23, 1914.

ORDERED, That in conformity with the Revised Laws of Massachusetts, and under authority of Chapter 676 of the Acts of the Legislature in the year 1914, the several wards of the city be and they hereby are divided and established according to the following described lines, said division and designation to take effect as prescribed by Section 4 of said Chapter 676 of 1914:

Ward One—All that portion of the city lying north and east of a line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven, and drawn through the middle of Sawyer Street to the westerly line of the location of the Old Colony Railroad; thence northerly and westerly in that line and in the southerly line of the Watuppa Branch of the Old Colony Railroad to the line between the City of New Bedford and the Town of Dartmouth.

Ward Two—All that portion of the city lying between a line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven and drawn through the middle of the following streets, namely: Wamsutta, Purchase, Austin, County, Hazard, Summer, Robeson, and the last named line extended to the line between the City of New Bedford and the Town of Dartmouth, and the line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven and drawn through the middle of Sawyer Street to the westerly line of the location of the Old Colony Railroad; thence northerly and westerly in that line and in the southerly line of the Watuppa Branch of the Old Colony Railroad to the line between the City of New Bedford and the Town of Dartmouth.

Ward Three—All that portion of the city lying between a line beginning at a point in the Acushnet River at the line between the City of New Bedford and the Town of Fairhaven, and passing north of Popes and Fish Islands, and thence through the middle line of the following streets, namely: North, Newton, Mill and Kempton to the line between the City of New Bedford and the Town of Dartmouth, and the line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven and

drawn through the middle of the following streets, namely Wamsutta, Purchase, Austin, County, Hazard, Summer, Robeson, and the last named line extended to the line between the City of New Bedford and the Town of Dartmouth.

Ward Four—All that portion of the city lying between a line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven, and passing south of Popes and Fish Islands, and thence through the middle of the following streets, namely: Walnut, County and Arnold, to the line between the City of New Bedford and the Town of Dartmouth, and the line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven passing north of Popes and Fish Islands, and thence through the middle line of the following streets, namely North, Newton, Mill and Kempton to the line between the City of New Bedford and the Town of Dartmouth.

Ward Five—All that portion of the city lying between a line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven and passing north of Palmers Island; thence through the middle of the following streets, namely: Potomska, Purchase, Thompson, Bonney and Rockland; thence westerly across the Rural Cemetery and through the middle of Winterville Road to the line between the City of New Bedford and the Town of Dartmouth, and the line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven, and passing south of Popes and Fish Islands, and thence through the middle of the following streets, namely: Walnut, County and Arnold, to the line between the City of New Bedford and the Town of Dartmouth.

Ward Six—All that portion of the city lying south of a line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven and passing north of Palmers Island; thence through the middle of the following streets, namely: Potomska, Purchase, Thompson, Bonney and Rockland; thence westerly across the Rural Cemetery and through the middle of Winterville Road to the line between the City of New Bedford and the Town of Dartmouth.

In Board of Aldermen, Dec. 23, 1914. Adopted and sent down for concurrence.

In Common Council, Dec. 23, 1914. Concurred.

Presented to and approved by the Mayor, Dec. 24, 1914.

A true copy, attest: W. H. B. REMINGTON, City Clerk.

EXTRACT FROM LAW.

Section 4 of Chapter 676 of the Acts of 1914, entitled "An Act relative to the re-division of cities into wards and voting precincts," is as follows:

Chapter 676, Acts 1914.

"Section 4. Said Chapter eight hundred and thirty-five is hereby further amended by striking out section two hundred and nineteen and inserting in place thereof the following new section: Section 219. For all elections held prior to the annual state primary in the second year following a re-division of a city into wards, and for the assessment of taxes prior to such time, the wards as existing prior to such re-division shall continue, and for such purposes the election officers shall be appointed and hold office, and voting lists shall be prepared, and all other things required by law shall be done as if no such re-division had been made. For all other purposes, the new division shall take effect on the thirty-first day of December of the year when it is made."

W. H. B. REMINGTON, City Clerk.

VOTING PRECINCTS.

CITY OF NEW BEDFORD,

In Board of Aldermen, Jan. 14, 1915.

ORDERED, That the wards of the City of New Bedford 'as established by the City Council of 1914, be and they hereby are divided into voting precincts, as follows:

WARD ONE.

Precinct 1—All that part of ward 1 lying northerly and westerly from the following described lines, viz: Beginning at a point in the Acushnet river and in an extension easterly of the centre line of Belleville road to the centre line of the Old Colony railroad; thence southerly in the centre line of the Old Colony railroad to its junction with the line between ward 1 and ward 2; thence westerly in the centre line of the Watuppa branch of the Old Colony railroad to the line between the city of New Bedford and the town of Dartmouth.

Precinct 2—All that part of ward 1 bounded by the following lines in sequence, viz: Beginning at the Acushnet river and extending through the centre lines of Manomet street, Riverside avenue, Hathaway street, Belleville avenue, Earle street, the Old Colony railroad, and Belleville road to the Acushnet river.

Precinct 3—All that part of ward 1 bounded by the following lines in sequence, viz: Beginning at the Acushnet river and extending through the centre lines of Deane street, the Old Colony railroad, Earle street, Belleville avenue, Hathaway street, Riverside avenue, and Manomet street to the Acushnet river.

Precinct 4—All that part of ward 1 bounded by the following lines in sequence, viz: Beginning at the Acushnet river and extending through the centre lines of Sawyer street, Old Colony railroad, and Deane street to the Acushnet river.

WARD TWO.

Precinct 5—All that part of ward 2 bounded by the following lines in sequence, viz: Beginning at the Acushnet river and extending through the centre lines of Wamsutta street, Old Colony railroad, and Sawyer street to the Acushnet river.

Precinct 6—All that part of ward 2 bounded by the following lines in sequence, viz: The centre lines of Wamsutta

street, Purchase street, Austin street, County street, Linden street, Reynolds street and Reynolds street produced, and the Old Colony railroad.

Precinct 7—All that part of ward 2 bounded by the following lines in sequence, viz: The centre lines of Hazard street, Summer street, Robeson street, Cottage street, Mt. Pleasant street, Old Colony railroad, Reynolds street and Reynolds street produced, Linden street, and County street.

Precinct 8—All that part of ward 2 bounded by the following lines in sequence, viz: The centre lines of Robeson street and Robeson street produced, the line between the city of New Bedford and the town of Dartmouth, the centre line of the Old Colony railroad, and the centre lines of Mt. Pleasant and Cottage streets.

WARD THREE.

Precinct 9—All that part of ward 3 bounded by the following lines in sequence, viz: The centre lines of North street, Hill street, Hillman street, State street, Willis street, State street, Pearl street, County street, Austin street, Purchase street, and Wamsutta street.

Precinct 10—All that part of ward 3 bounded by the following lines in sequence, viz: The centre lines of North street, Chestnut street, Robeson street, Summer street, Hazard street, County street, Pearl street, State street, Willis street, State street, Hillman street, and Hill street.

Precinct 11—All that part of ward 3 bounded by the following lines in sequence, viz: The centre lines of North street, Cedar street, Parker street, Shawmut avenue, Robeson street and Chestnut street.

Precinct 12—All that part of ward 3 bounded by the following lines in sequence, viz: The centre lines of North street, Newton street, Mill street, Kempton street, the line between the city of New Bedford and the town of Darmouth, the centre lines of Robeson street and Robeson street produced, Shawmut avenue, Parker street and Cedar street.

WARD FOUR.

Precinct 13—All that part of ward 4 bounded by the following lines in sequence, viz: Beginning at the Acushnet river and extending through the centre lines of Walnut street, County street and North street to the Acushnet river, including the islands in the Acushnet river known as "Fish island" and "Popes island."

Precinct 14—All that part of ward 4 bounded by the following lines in sequence, viz: The centre lines of Arnold, Ash, North and County streets.

Precinct 15—All that part of ward 4 bounded by the following lines in sequence, viz: The centre lines of Arnold, Tremont, Mill, Newton, North and Ash streets.

Precinct 16—All that part of ward 4 bounded by the following lines in sequence, viz: The centre line of Arnold street and Arnold street extended, the line between the city of New Bedford and the town of Dartmouth, and the centre lines of Kempton, Mill and Tremont streets.

WARD FIVE.

Precinct 17—All that part of ward 5 bounded by the following lines in sequence, viz: Beginning at the Acushnet river and extending through the centre lines of Potomska, Purchase, Thompson, County, Sixth and Walnut streets to the Acushnet river.

Precinct 18—All that part of ward 5 bounded by the following lines in sequence, viz: The centre lines of Thompson, Bonney, Rockland, Orchard, Arnold, County, Walnut, Sixth and County streets.

Precinct 19—All that part of ward 5 bounded by the following lines in sequence, viz: The centre line of Rockland street, the southerly line of ward 5 in Rural cemetery, the centre lines of Lewis street and Lewis street extended, Grape, Oak, Clay, Ward, Bedford, Ash, Arnold and Orchard streets.

Precinct 20—All that part of ward 5 bounded by the following lines in sequence, viz: The southerly line of ward 5 in Rural cemetery, the centre line of Winterville road, the line between the city of New Bedford and the town of Dartmouth, the centre lines of Arnold street and Arnold street extended, Ash street, Ward street, Clay street, Oak street, Grape street, Lewis street and Lewis street extended.

WARD SIX.

Precinct 21—All that part of ward 6 bounded by the following lines in sequence, viz: Beginning at the Acushnet river and extending through the centre lines of Gifford, Water, Division, Crapo, Thompson, Purchase and Potomska streets to the Acushnet river including the island in Acushnet river known as, "Palmer's island."

Precinct 22—All that part of ward 6 bounded by the following lines in sequence, viz: Beginning at the Acushnet river and extending through the centre lines of Ruth street and Brock avenue to Clarks cove; beginning again at Clarks cove and extending through the centre lines of Crapo, Division, Water and Gifford streets to the Acushnet river.

Precinct 23—All that part of ward 6 bounded by the following lines in sequence, viz: The boundary line between the city of New Bedford and the town of Dartmouth, the centre line of Winterville road, the northerly line of ward 6 across Rural cemetery, the centre lines of Rockland, Bonney, Thompson and Crapo streets to Clarks cove.

Precinct 24—All that part of ward 6 lying southerly of the following lines in sequence, viz: Beginning at the Acushnet river and extending through the centre lines of Ruth street and Brock avenue to Clarks cove.

In Board of Aldermen, Jan. 14, 1915. Adopted.

Presented to and approved by the mayor Jan. 15, 1915.

A true copy, attest:

W. H. B. REMINGTON, City Clerk.

SECOND
INAUGURAL ADDRESS
OF THE
Hon. Edward R. Hathaway
MAYOR OF NEW BEDFORD
MASSACHUSETTS
AT THE
INAUGURATION OF THE CITY GOVERNMENT
JANUARY THIRD
NINETEEN HUNDRED AND SIXTEEN

New Bedford, Massachusetts
WILLISTON H. COLLINS CO.
PRINTERS
1 9 1 6

SECOND INAUGURAL ADDRESS

OF THE

HON. EDWARD R. HATHAWAY

GENTLEMEN OF THE CITY COUNCIL:—

We are about to open a new year of city government in New Bedford; a new year fraught with great responsibilities and with weighty problems to decide.

The bitterness engendered by political strife is a thing of the past. We stand together for the welfare of our great and prosperous city and we will work unitedly with the common aim to aid in her development and to increase her prosperity and well-being.

The people have reposed in me the honor and responsibility of acting as the head of this great business enterprise—the municipal corporation—for the ensuing year. But they have equally imposed upon you the duty to aid me with your advice, and your judgment that this government may not be the government of a single person, but the united effort of many working for the same common end.

As mayor, I shall welcome your advice and shall conform to your judgment, insofar as I believe it to be for the upbuilding of the city.

CITY FINANCES

The most serious problem to be faced is that of city finances. The city today is at the turning of the ways. We can either stumble along for a few years with an increasing weight of debt until our position becomes unendurable or we can continue the policy of last year when, in spite of serious obstacles, the debt was decreased. There is much which should be done. Demands are constantly made by well-meaning citizens for improvements, who do not realize the financial position of the city. The easy course is to grant wherever the need appears; the only businesslike action at the present time is to refuse, unless such work and improvements are imperative.

You have all of you, probably, heard of the municipal finance law of 1913. This is a splendid piece of legislation and one which, ultimately, will restore cities to a sound financial basis; but, owing to extravagances in the past, the effect of this law has been especially felt in New Bedford. Under the old law running expenses were constantly bonded for and loans for highways, such as macadam, were made for ten years. Under the new law, macadam loans can be for only five years. The result of this has been that we are paying off each year on the principal of old ten year macadam loans, and are now adding the extra burden of paying each year until 1919, when the first five year macadam loan is retired, an additional amount due to the shortening of the time of the loan. Thus, although the amount of the debt has been actually decreased, the requirements for debt purposes this year will be about sixty-thousand dollars more than in 1915. This higher debt requirement will use up the probable increase in revenue from new valuations.

As there will be increased expenditures in certain departments, such as schools, due to larger population, the strictest economy must be practiced in order that there may not be a higher tax rate. I anticipate small savings in the Poor De-

partment, owing to improved business conditions; and in the Health Department, where the recurrence of a smallpox epidemic is not to be expected. If the trend of corporation shares remains as at present, a larger corporation tax will be available and of material aid in lightening our financial burden. I believe in parks and playgrounds, boulevards, wide streets, commodious schoolhouses and beautiful public buildings and it is with deep regret, but an absolute sense of my oath of office, that I say to you "ECONOMY MUST THIS YEAR BE OUR WATCHWORD."

PUBLIC BUILDINGS

The strictest economy does not mean that we cannot have our necessities. I am determined that no committee shall delay further in the building of the new central fire station. This building, for which the money has been appropriated, must be finished at once. Action must also be taken, without delay, for a sixteen-room school building on the site of the old high school. The horror of the recent Peabody fire has emphasized the need of school buildings constructed according to the latest and safest plans. This has also been brought out in the report of the Fire Prevention Committee of the National Board of Fire Underwriters, following a survey of the conditions in New Bedford.

The matter of fire prevention, you will agree with me, is of as great, if not of more importance, than the matter of protection from fire. I recommend that immediate steps be taken toward the appointment of a special committee to take into consideration the report mentioned, especially with relation to schoolhouses, to the end, that there may be enacted, as early in the year as possible, such changes in the city ordinances as will afford better protection from fires and the prevention of fires.

After very careful consideration, I shall recommend to the City Council and the School Committee that the better

policy to be practiced, with relation to the old high school building, is to tear down the old building to either the belt, or the foundation, and construct, on the same site, a new sixteen-room school building containing all modern improvements and built with the strictest regard to fire prevention. This contemplated modern building would not involve a disproportionate cost over remodelling the old building and it has been apparent, in the remodelling of the present municipal building, that remodelling does not give satisfactory results for the amount of money expended.

The need of a new central police station is also imperative. The old building has, at various times, been condemned as unsanitary and its condition and appearance are a disgrace to the city. On account of the size of the building, cells for women have to be provided in a separate building and a garage for the patrol wagons and ambulances maintained at some distance from the station. It is my intention to request authority from the legislature to bond outside the debt limit for a new central police station, and to start construction at the earliest possible date.

The School Committee also recommends that a new school building be constructed at the north end. It does not seem advisable to me to undertake the erection of this building during the current year. It will be possible, however, within the borrowing capacity, to secure a site for this building so that work may proceed early in 1917. There is available, during the current year, a borrowing capacity of Five Hundred Thirty-Five Thousand, Two Hundred Ninety One Dollars. This is not exclusive of bonds for the widening of Union Street amounting to One Hundred Thirty-Eight Thousand, Nine Hundred Nineteen Dollars, as these bonds have not yet been authorized. The borrowing capacity is no larger than is required for street construction, sewers and other usual permanent improvements.

I shall seek further authority from the legislature to bond,

outside the debt limit, for the cost of the Union Street widening and a new school building, to be constructed on the site of the old high school.

INTERCEPTING SEWER

During the past year bonds, to the amount of Two-Hundred Eighty-Five Thousand Dollars, have been issued for construction of the Intercepting Sewer. This work, in order to become available, must be continued. A larger amount was expended on the Intercepting Sewer in 1915 than should be spent in 1916 as, on account of the conditions of unemployment during the winter of 1915, the work was rushed in order to give relief to men out of work. The Intercepting Sewer should be completed this year as far as the work is now laid out.

EXTENSION OF FARE LIMIT TO THE CITY LINE

The development of the north end of the city has been greatly retarded owing to the extra fare charged on the street railway lines beyond Lunds Corner. This appears to be an injustice to those owning land in this section of the city. I shall, at once, introduce a bill in the legislature authorizing the Union Street Railway Company to lease the property and trackage of the Bay State Street Railway Company from Lunds Corner to the city limits and shall take up the question of a single fare within the city limits with the Public Service Commissioners. This is a matter of great public interest, and one in which the city government and the citizens of this city should work unitedly to secure the benefits desired.

STREET DEPARTMENT

The greatest question confronting cities today is the construction of roads and streets which can withstand the wear and tear of automobile traffic. It has been found that water

bound macadam becomes disintegrated and worn out in two or three years; for that reason no water bound macadam was laid in 1915, but the efforts of the department were directed toward the construction of streets of a more permanent character. This construction has been as follows:—

1. For streets having a heavy traffic—a concrete base with granite blocks jointed with cement grout.
2. For central streets—a cement base with a wood block surface giving a minimum of noise.
3. For streets having a heavy automobile traffic—a crushed stone base with a two inch asphalt surface.
4. For streets having a small or medium traffic—a crushed stone base and a penetration asphalt surface.

All of this construction is more expensive than water bound macadam, but the lasting qualities are so much greater, that no question exists of the economy of such construction. In January, 1915, the City owned no apparatus or plants for laying and constructing asphalt street surface. During the past year the City has purchased a concrete mixer of the latest approved type, a road machine and grader, a tandem roller, a street flusher, an oil distributor and a fully equipped asphalt plant. These machines are all available for use in 1916. Further apparatus will have to be purchased in order to adequately equip the department with labor saving machinery to bring the plant thoroughly up to date. The saving in cost to the City in doing its own work has been so large that this policy will be continued during the current year. I do not anticipate that any outside contracts for street construction will be awarded.

FIRE DEPARTMENT

It has been recognized for sometime that the complete motorization of the department was essential, both from the standpoint of efficiency and of economy. I recommend that steps be taken by the Fire Department Committee, or by a

special committee, to investigate, at once, this problem. In his report of last year, Edward F. Dahill, Chief Engineer, estimated the cost of complete motorization as Forty-Six Thousand Dollars. This is a considerable sum, but not prohibitive. The Committee, in its investigation, should also consider savings to be effected in doing away with the horses now used by the department and the possible elimination of certain groups of call firemen, thus continuing the policy of organizing a permanent force. Until the matter has been thoroughly gone into and the report of the committee rendered, it is not advisable to recommend the extent to which motorization should be carried; some provision, however, should certainly be made for better fire protection at the north end of the City.

BATH HOUSES

Following the suggestion of the last city government, I shall introduce a bill in the Legislature to permit the City to build bath houses at Hazelwood Park. It has been ruled by the City's legal department that, under the statutes, no bath houses could be constructed without a special act of the Legislature. I am not in favor, as a general rule, of encroaching upon park property for any other municipal purpose, but, in this case, where the City owns a splendid water frontage, the use of that frontage to furnish bathing facilities appears to be a proper and necessary part of the utilization of park property.

CONCLUSION

It is seldom that a new year, from a business standpoint, has opened more auspiciously for New Bedford. Unemployment is at its lowest mark. Our mills and industries are not alone prosperous at present, but have opening in front of them an era of prosperity perhaps unequalled in their history. It is for us, who have been elected to represent the people of New Bedford in the administration of municipal affairs, to see

that the city government gives every aid and assistance in this growth and development of the city so that this era of good times may not be transitory, but permanent. I feel confident that the coming year will witness the erection of new mills and the establishment here of new industries. I feel confident that, with your help, 1916 will be the brightest year in the history of New Bedford; not alone in industrial development, in increased population and new homes, but also in a city government operated economically, but with a far sighted view of the future needs of the City. Above all let this year witness an administration conducted for the benefit of the people of this City with special favors to none and courtesy to all.

ANNUAL REPORT

OF THE

Committee on Bath Houses

To the City Council

For the Year 1915.

CITY OF NEW BEDFORD.

December 31, 1915.

To the City Council.

GENTLEMEN: The Committee on Bath Houses begs leave to submit herewith its annual report for the season of 1915; the figures speak for themselves which prove it to be a record year in the history of the Public Bathing Houses.

The bathing houses were opened for business Saturday, June 19, 1915, and closed Saturday, October 2, 1915, remaining open a period of fifteen weeks.

The estimated number of bathers and weekly receipts are shown in the following reports of the Superintendent, viz:—

Week ending	No. of Bathers	Receipts
June 20	950	\$12.99
“ 27	1,357	12.77
July 4	2,131	33.89
“ 11	4,021	53.14
“ 18	6,162	88.65
“ 25	4,028	49.23
Aug. 1	9,067	83.37
“ 8	2,965 (inclement weather)	28.59
“ 15	8,346	74.27
“ 22	4,146 (week-end rain)	33.68
“ 29	3,406 (inclement weather)	16.95
Sept. 5	2,415	18.04
“ 12	3,095	18.44
“ 19	2,945	20.83
“ 26	194	.69
	55,228	\$1,135.32

FREE PUBLIC BATHS

The houses, during the season, were in charge of the following employees :

Superintendent, - Alfred F. Benoit,
 Assistants, - - - Francis J. Kennedy,
 Arthur Wooley,
 Lady Assistant, - Mrs. Mary E. Doyle.

A financial statement is herewith presented, viz:—

Appropriations,.....	\$2,500.00	
Expenditures,		
Payrolls, attendants.....	\$ 965.50	
Land rent.....	400.00	
Laundry.....	356.62	
Lighting.....	10.04	
Supplies.....	114.94	
Stock, labor, ect.....	316.88	
Telephone	18.18	
Traveling.....	123.25	
	2,305.41	\$2,305.41
Balance		\$194.59

This year, owing to the location of the bath houses on East French Avenue being leased to H. W. Stacy of Springfield, Mass., by the present owners, for park and amusement purposes, the Committee were compelled at the close of the season to sell the bathing houses, which they did at public auction for the sum of \$388.00.

It is to be regretted that the Committee cannot in the immediate future take care of the thousands of people who delight in taking advantage of this popular diversion and beneficial recreation. To prove the popularity of these bath houses, in the past year over 16,000 people were turned away for the lack of houses and deprived of the enjoyment of salt-water bathing during the summer heat; and it is to be hoped that the efforts of the Mayor to get the necessary legislation to locate permanent bath houses on the west side of West Frence Avenue, will be successful.

For the Committee,

GILBERT G. SOUTHWORTH,
 Chairman.

Annual Report
OF THE
Superintendent of Public Buildings

ALSO
Inspector of Buildings

OF THE
CITY OF NEW BEDFORD, MASS.

For the Year 1915.

NEW BEDFORD
THE A. E. COFFIN PRESS, PRINTERS
1916

REPORT

OF THE

Superintendent of Public Buildings.

OFFICE OF SUPERINTENDENT OF PUBLIC BUILDINGS,
NEW BEDFORD, MASS., DEC. 31, 1915.

To his honor the Mayor and the City Council:

Gentlemen:—I have the honor to submit this report on the condition of public buildings under construction December 31, 1914, also the work performed under my supervision up to and including December 31, 1915.

PORTABLE SCHOOLHOUSES.

During the year, our City Council authorized the Committee on City Property to procure plans and specifications, obtain bids, and award contracts for six portable schoolhouses, to be located on the various schoolhouse grounds as directed by the School Board, and one to be located at the Sassaquin Sanitarium grounds.

The contract for these buildings was awarded to the E. F. Hodgson Company, of Boston, Mass., for furnishing, erecting on the lot and furniture complete for the sum of \$10,834.00.

MUNICIPAL BUILDING.

The principal repairs to this building during the year was the awarding a contract to Morss & Whyte Co., of Boston, Mass., for inclosing elevator wellway with grill work to comply with the new statute law governing safety of elevators. The total cost of this work was \$480.00.

A contract was awarded to William T. Caswell in November for painting all window sash to this building for the sum of \$147.00.

WATER DEPARTMENT.

During the summer a contract was awarded by the Board to the B. F. Smith Co., lowest bidders, for repairing the large brick chimney on the Purchase street pumping station for the sum of \$890.00, this work being done under the supervision of this department.

FIRE STATION NO. 6.

In June, a contract was awarded to Jones & Dodge for interior alterations to this station.

Total cost of this work, including plumbing, was \$609.00.

CITY WHARVES.

In November, a contract was awarded to Frank C. Taylor of this city, lowest bidder, for general repairs to north side of Pier No. 4, from plans and specifications prepared by this department, for the sum of \$475.00.

This part of the pier, which is occupied by the N. B. Fish Co., had long been neglected and had become absolutely dangerous to the occupants.

This work was completed in December and accepted by the Committee on Wharves.

In the month of August, fire damaged the building known as the Potter Building, located on the wharf property. The Committee voted to award the contract for repairing same to Charles L. Faunce, lowest bidder, for the sum of \$786.00.

Other minor repairs were made to the several piers during the year.

WILLIS STREET POLICE STATION.

General repairs and painting both inside and outside to this building was ordered by City Property Committee in October. The contract was awarded to Jones & Dodge, lowest bidder, for the sum of \$490.00.

VETERAN FIREMEN'S HEADQUARTERS.

During November, a contract was awarded Jones & Dodge, lowest bidders, by the Committee on City Property for general repairs and exterior painting to this building from specifications prepared by this department. The total cost of this work was \$210.00.

PURCHASE STREET WARD ROOM.

This building was painted and repaired during the year by the Committee on City Property from specifications prepared by this department.

BATH HOUSES.

At the request of the Committee on Bath Houses, this department prepared plans for a permanent Bath House building to be located on the shore of West French Avenue opposite Hazelwood Park.

This plan called for a concrete building throughout, to contain 300 compartments, superintendent's room, stock rooms, and large public promenade facing the water.

This shore property being a part of our City Park System, it was necessary to obtain the right from our Park Board to locate this building thereon.

The Park Board refused to grant this right, thereby causing the matter to be tabled by the Committee.

OLD BATH HOUSES.

The lease of the shore property having expired and the owners wishing to use the same for private purposes, the Committee voted to sell at auction the old bath houses located on the shore at the southern extremity of East French Avenue. These houses being of a temporary character, had become so weather beaten and dilapidated that they were unfit to be moved to another location.

NEW CENTRAL FIRE STATION.

At a meeting of the City Council held May 13th, it was voted to purchase the lot northeast corner of Pleasant and North streets, known as the "Church" estate, for the purpose of erecting a new Central Fire Station thereon.

At the same meeting, an order was passed authorizing the Committee on City Property to select an architect to prepare plans for this building, obtain bids and report to City Council for further action.

June 22nd, the Committee selected James S. McIntyre, Architect, of this city, to prepare plans and specifications, he to consult with the Chief of the Fire Department as to the department's needs.

On November 12th, Architect McIntyre submitted the finished plans to the Committee, who referred same to the Superintendent of Public Buildings for a report as to their completeness for the purpose.

December 12th bids were called for by the Committee in two parts:

First. Bids for heating, plumbing and electrical work, to be submitted December 28th.

Second. Bids for general construction, including the above items, to be submitted December 30th.

December 30th, bids were received by the Committee. J. W. Bishop Co. being the lowest bidder in the sum of \$121,990.00.

The matter was referred to the City Council of 1916.

In compliance with Section 2, Chapter XIII, of the City Ordinances, I hereby submit a detailed report of all repairs to city buildings coming under my supervision during the year of which the cost in each case was in excess of ten dollars:

SCHOOLHOUSES.

High School:		
Ordinary repairs,	\$380.84	
Repairs of cornice,	260.04	
		\$640.88
Parker Street School:		
Ordinary repairs,	\$62.60	
Painting outside,	148.00	
		210.60
H. M. Knowlton School:		
Ordinary repairs,		120.20
Middle Street School:		
Ordinary repairs,		136.22
Fifth Street School:		
Ordinary repairs,	\$139.33	
Painting fire escape,	36.75	
		176.08
R. C. Ingraham School:		
Ordinary repairs,		93.94
J. B. Congdon School:		
Ordinary repairs,	\$235.46	
Repairing chimney (struck by lightning),	68.00	
		303.46
J. H. Clifford School:		
Ordinary repairs,		239.61
Thomas Donaghy School:		
Ordinary repairs,		120.71
William H. Taylor School:		
Ordinary repairs,		78.14
T. R. Rodman School:		
Ordinary repairs,	\$209.83	
Painting inside,	175.00	
		384.83
Jireh Swift School:		
Ordinary repairs,	\$98.93	
Metal ceilings,	261.00	
		359.93
Abraham Lincoln School:		
Ordinary repairs,		335.48
Betsey B. Winslow School:		
Ordinary repairs,		112.25

Harrington Memorial School:		
Ordinary repairs,	\$208.73	
New grates in furnaces,	269.00	
Repairing after fire,	52.95	
Repairing after fire, painting,	247.00	
		777.68
Katharine Street School:		
Ordinary repairs,		131.76
Phillips Avenue School:		
Ordinary repairs,		32.45
Cedar Grove Street School:		
Ordinary repairs,	\$224.08	
Painting fire escape,	36.75	
		260.83
Clark Street School:		
Ordinary repairs,		60.31
Merrimac Street School:		
Ordinary repairs,		39.90
Mary B. White School:		
Ordinary repairs,	\$106.34	
Granolithic walks,	218.84	
		325.18
H. A. Kempton School:		
Ordinary repairs,		36.21
Cedar Street School:		
Ordinary repairs,		65.46
S. A. Howland School:		
Ordinary repairs,		220.77
T. A. Greene School:		
Ordinary repairs,		132.81
Acushnet Avenue School:		
Ordinary repairs,		121.62
Thompson Street School:		
Ordinary repairs,		67.54
I. W. Benjamin School:		
Ordinary repairs,	\$239.09	
Painting inside,	501.75	
Painting fire escape,	36.75	
		777.59
Dartmouth Street School:		
Ordinary repairs,	\$139.44	
Granolithic walks,	174.60	
Painting fire-escape,	36.75	
		350.79
George H. Dunbar School:		
Ordinary repairs,	\$87.92	
Copper gutters,	148.00	
		235.92

Plainville School:	
Ordinary repairs,	52.58
Rockdale School:	
Ordinary repairs,	36.66
Sassaquin School,	1.15
Old High School:	
Setting glass, etc.,	14.50
Committee Rooms:	
Miscellaneous work,	275.99
	\$7,330.03

FIRE STATIONS.

No. 1 Station:	
New fence around lot and general repairs,	\$133.53
No. 6 Station:	
Interior alterations to second story,	609.00

BATHING HOUSES.

General repairs,		241.08
------------------	--	--------

CEMETERIES.

New tool house at Oak Grove Cemetery,		212.89
---------------------------------------	--	--------

Total,		\$5,800.58
--------	--	------------------

In compliance with Section 2, Chapter XIII, of the City Ordinances, I herewith submit a statement showing the amount and kind of repairs needed upon the following city buildings, during the fiscal year next succeeding, together with an estimate of the probable cost thereof:

High School:		
Ordinary repairs,		\$300.00
Parker Street:		
Ordinary repairs,		200.00
H. M. Knowlton:		
Ordinary repairs,	\$200.00	
Metal ceilings,	300.00	
		500.00
Middle Street:		
Ordinary repairs,		200.00
Fifth Street:		
Ordinary repairs,		200.00
R. C. Ingraham:		
Ordinary repairs,	\$200.00	
Painting hall,	200.00	
		400.00
J. B. Congdon:		
Ordinary repairs,		200.00
J. H. Clifford:		
Ordinary repairs,		200.00
T. Donaghy:		
Ordinary repairs,		200.00
W. H. Taylor:		
Ordinary repairs,		200.00
T. R. Rodman:		
Ordinary repairs,		200.00
Jireh Swift:		
Ordinary repairs,	\$200.00	
Paint, inside,	450.00	
Metal ceilings,	300.00	
		950.00
A. Lincoln:		
Ordinary repairs,	\$200.00	
Repair brickwork,	300.00

ELEVATOR INSPECTION.

In accordance with Chapter 806, Acts of 1913, it shall be the duty of the Inspector of Buildings in every city of the Commonwealth to inspect all elevators in their respective cities annually, and a practical test of the safety devices and other requirements coming under this act, the Inspector to make a detailed report thereof to the Chief of the Massachusetts District Police upon forms furnished by him, and a complete record of each inspection to be kept by such Inspector; said Inspector also to issue licenses to all elevator operators after a thorough examination as to their fitness, etc.

In compliance with the above law, 244 freight and 20 passenger elevators were inspected by this department during the year; a record filed of each elevator inspected, and a notification sent to the owners of the changes necessary to be made to comply with the law, which in every case has been complied with, or a promise made to have the necessary changes made at once.

Forty applicants were examined for licenses to operate passenger elevators and a certificate granted to each applicant.

INSPECTION OF STREET SIGNS.

As required by Section 16, Chapter 22 of the City Ordinances, 308 applications for permission to maintain signs extending over the public highway were forwarded to this office during the year for inspection as to their method of fastening to their supporting surface, height of same, and distance extending over sidewalk.

Many were found to be existing contrary to law, the owner being notified of the requirements necessary to

comply with the law,—which in every case was promptly complied with. This required in many cases several inspections of one application.

HOTEL AND LODGING HOUSE INSPECTION.

In compliance with Sections 33, 34 and 35 of Chapter 104 of the Revised Laws, relative to hotels and lodging houses having eight or more rooms above the second floor, I have made an annual inspection of every hotel and lodging house in the city coming under this law and reported their condition relative to safety in case of fire to the Chief of Massachusetts District Police.

Also, in accordance with Chapter 129, Acts of 1911, I have made an inspection of forty houses maintained for furnishing lodging to transient persons and not licensed as an inn, in which ten or more persons are lodged, notwithstanding that no price is charged for lodging, and reported their condition as a matter of safety in case of fire to the Mayor and Board of Aldermen.

In every case where the necessary precautions against the spread of fire and giving alarm to inmates had not been provided for, the petitioner for license to maintain such house was given leave to withdraw.

CONCLUSION.

In conclusion, I wish to express my appreciation and thanks to the Mayor and the various committees of the City Council for their cordial co-operation in all matters pertaining to the work of this department.

Respectfully submitted,

JOSEPH L. GIBBS,

Supt. Public Buildings.
Inspector of Buildings.

Respectfully submitted,

PARDON A. MACOMBER, *Clerk.*

Report of Cemetery Commissioners.

Following the economical action served out to the several departments of this city, at the apportionment of the annual appropriations, this department's allotment was cut from a conservative estimate, by \$10,000, allowing funds, sufficient with the possible income of the department to barely provide for the perpetual and annual care of lots under contract, and the proper maintenance of the ever growing city of the dead. Thus, no progress could be made in development or improvement, only as the funds from "Sales of Lots" would permit, and this to a very limited extent.

The Board has sought to meet the requirements of the administration to accomplish the work of its department as far as possible without exceeding its appropriation or requesting additional funds. The Board, however, desires that the incoming administration may become impressed with the fact that the rapid growth in this department does warrant an appropriation sufficient to allow the department to continue along the lines of development, that desired sections can be made available for burial purposes. This is particularly essential in Pine Grove Cemetery, for so much preparatory work has to be done, and permanent improvement and development has to be made before sections and lots are available for burials. The nature of this work consists of the extension of avenues to reach desirable sections, the digging over the entire ground as development extends, to the depth of a grave, and the removal of all obstructions, the macadamizing of avenues, the building of proper drainage, the extension of water mains, the building of the enclosures to protect the grounds, the grading, seeding and embellishment of all new development,—all are essential requirements to properly prepare these grounds for public use.

On September 9th, the following action was taken by the City Council at the request of the Veterans of the Spanish War:

CITY OF NEW BEDFORD.

In Board of Aldermen.

September 9, 1915.

ORDERED, That the Cemetery Board is hereby authorized and directed to set apart a section of Pine Grove Cemetery for the burial of all persons who belonged to the army and navy of the United States during the war between the United States and Spain, and died in service, or were honorably discharged, and for the burial of their wives, widows and children: the section of said cemetery to be set apart and the rules and regulations governing the use thereof to be discretionary with said Cemetery Board.

In BOARD OF ALDERMEN, Sept. 9, 1915.

Adopted and sent down for concurrence.

In COMMON COUNCIL, Sept. 9, 1915.

Concurred.

Presented to and approved by the Mayor Sept. 10, 1915.

A true copy, attest:

(Signed) W. H. B. REMINGTON,

(Copy)

City Clerk.

The Board have already been approached by this body as to the possible layout of this section; the proper site, however, deemed by the Board as appropriate for this purpose is quite remote from the present developed district of Pine Grove Cemetery, and a large outlay will be necessary before this section can be reached, and a special appropriation must be made for proper development of a section for this purpose. Should the wisdom of the City Council lead to such a provision, the Cemetery Board will make every effort to meet the desire of the Veterans.

Through available funds from "Sales of Lots" account, permanent improvements of 701 feet of wall enclosure have been constructed, and 801 feet of foundation for the same have been laid; 17,512 square feet of land was dug over. Thus some small progress has been accomplished.

Acting Superintendent's Report.

To the Cemetery Board of the City of New Bedford.

Gentlemen:—I herewith submit my annual report, together with a statement of the work done during the fiscal year just ended, and recommendations in respect to work which will be needed during the approaching season.

Griffin Street Cemetery, situated in one of the most thickly settled districts of the city, while continuously subject to trespass by many children who live near the grounds and who are indifferent to the feeling of respect which all should have for places of this character, has received constant attention throughout the year. A caretaker has been regularly detailed from the cemetery force to care for these grounds, the grass has been regularly cut, three large flower beds have been maintained, filled with foliage plants. These beds have been thoroughly watered and weeded, and the appearance of the cemetery through the summer was very satisfactory.

RURAL CEMETERY.

For the past two years, no more work has been done in this, our largest and most beautiful cemetery, than was necessary to maintain the grounds here in good condition, and provide sufficient lots for sale to meet the constant demand in this rapidly growing city of the dead. On account of the pressing demand of developing Pine Grove Cemetery, and by reason of the stringency adopted by the Council in appropriating funds for this department, all permanent improvement, extensions, drains, enclosures and new avenues, recommended in previous reports, have been held in check, until sufficient funds are available to warrant their construction.

I would recommend that the south wall enclosure, and 2,000 feet of 15-inch surface drain should be constructed, if possible, the coming season.

The sexton's quarters need re-shingling and painting as well as the tool house.

OAK GROVE CEMETERY.

The general appearance of these grounds has been very satisfactory this year. The work has been confined principally to embellishment and maintenance. Practically all the land in this cemetery suitable for burial purposes has been improved, cut up into lots, and burial rights in the same sold. The park section in that portion of the cemetery north of Parker Street has been most attractive, embellished with a choice variety of specimen trees, flowering shrubs, beds of flowers, artificial ponds, fountains, etc., and all lend their attractiveness to dispel the gloom so often associated with the burial ground.

In these grounds are the greenhouses. These supply all the cemeteries with plants, annual plants for the many flower beds and borders, at a nominal expense to this department. No less than 60,000 plants are raised and distributed for the embellishment of the several grounds.

The old section, south of Parker Street, has received its usual attention and care, the grass regularly cut on the sections and lots, the shrubs trimmed, the walks and avenues properly cared for and cleaned. I not only recommend to the Board, but I wish to impress the great necessity of repairs and painting of the picket fence which surrounds this cemetery.

From some unknown cause, fire badly damaged the tool house in this cemetery, and destroyed many of the tools used by the employees. Repairs were subsequently made to the building. It now needs repainting.

PINE GROVE CEMETERY.

But little progress in the development of this new cemetery has been accomplished this year; available funds from the "Sales of Lots" account have enabled this department to continue construction on the wall enclosure to an extension of 701 feet.

By reason of the sections set aside in the other cemeteries of the city for public grounds becoming filled, all burials of this character are required to be made in Pine Grove and it will require continuous provision for them each year.

An unlimited outlay might be recommended to the Board in this cemetery, for so much must be done before these grounds can generally be made available for burial purposes. The continued construction of the enclosure wall, 1,000 feet of water main laid to connect with the city's service, tool house constructed, sexton's quarters should be built, avenues constructed and many other accessories, all are essential to the building of a new cemetery; this, however, I prefer to leave to the judgment of the Board, as to which will be the most advisable to provide for the coming year.

SUMMARY.

	Rural	Oak Grove	Pine Grove
Sq. ft. land dug over.....	7,344		17,512
Sq. ft. sod laid.....	1,690

Cement box for ashes.....	6.00
Interment in same.....	1.25
Removing and replacing earth.....	5.00
Boughing grave for interment.....	3.00

In effect Nov. 15, 1915.

With the coming of winter, there is to some extent a cessation of activities in the cemetery, and yet it is also the season when plans are being formulated, and perhaps at no other season is there more time devoted to the study of the possibilities of the cemetery. In the study of plans for the building and opening of a new cemetery, the Board realize the necessity of acting slowly to try at least to avoid some of the gigantic mistakes which we see perpetrated about us. More thought is being put into the planning of cemeteries than ever before, that future generations may not be confronted with the problem of the old cemetery to be upturned, bodies to be removed, and emergencies which are daily being placed before those of the present day.

The cemetery has always been a sacred place, particularly in Christian countries, but the ideas and ideals associated with the cemetery have known great changes, especially during the last score of years. Gloom and depression were the only thoughts then connected with the cemetery of other days. Sadness there must of necessity be at the memory of loss, but the cemetery of today is entirely removed in the dominant impressions it makes from the cemetery of other days. Then, mounds were marked with a slab which seemed to carry with it some sense of chill, and there was no attempt made to lessen the impression of desolation. With the coming of the park cemetery, came the thought too of eliminating as far as possible all that was unlovely from the modern cemetery.

Pine Grove Cemetery, the site of which lies in the northwest section of the city, four miles from the city's centre, is on high ground commanding a view of the surrounding country. The quiet grandeur of the location makes it ideal as a resting place for those who for a time have gone before.

With an area of seventy-three acres, the possibilities of development along modern lawn or park ideas are unre-

stricted. The soil is a sand loam, which insures a dry burial, a feature which will be appreciated by those who know how few cemeteries possess it.

Conveyance of Lots to the City in Trust.

One provision which the Cemetery Board has made since its organization is the conveyance of lots to the city in trust. It is a matter of daily occurrence that cemetery lots come into the possession of those who have no relationship or respect for the family, or the memory of the original owner of the lot who may be buried therein. This is the result of changes and lapse of years. To absolutely prevent such conditions and yet retain all rights of use, the Board has provided a re-conveyance to the city of lots which will be held in trust. Such conveyance can be made so as to secure the full use of the lot to the owner and the descent of such use to such persons as may be specified, which will effectually prevent the lot ever coming into the possession of persons not akin to the original owner, a matter which those who have had experience will thoroughly appreciate, and while individual tastes and opinions must of necessity be subordinate to the general welfare and appearance of the cemeteries, it is believed that by co-operation with those in charge, the best results for all will be attained.

The purchase of a cemetery lot is one of the most sacred of obligations. Sooner or later it must be met, and it is so much better to make the purchase when one is calm and undisturbed by grief than when compelled by heart breaking necessity to provide a resting place for some loved one. Many, appreciating this fact, have bought lots in one of the several cemeteries, which are still unoccupied and are a provision against that time which comes into every life. Such lands are exempt from assessments and public taxes, and also from the liability of being sold on execution or for the debts of the individual proprietor.

PERPETUAL CARE.

Since the organization of the Board, it has persistently advocated, particularly to new purchasers, the perpetual care of lots. With many sales, the cost of permanent care is included in the purchase price of a lot, and insures care of the grass, monumental work, and the general and permanent good appearance of the lot, without additional expense to the owner. This care the cemeteries of the city are well equipped to give, since it has its own green-houses for bedding-out purposes, and a corp of competent men who serve under the management.

Number of lots placed in perpetual care in 1915..	59
Number of additional deposits on lots already in perpetual care.....	9
Total number of lots in perpetual care.....	1,582
Amount deposited for perpetual care in 1915.....	\$9,035.00
Total amount now deposited.....	\$192,256.62

In closing this report, we beg to acknowledge the courtesy and helpfulness extended by his Honor, the Mayor, and the City Council, in connection with department problems on numerous occasions. Your co-operation with this unpaid commission has made our executive management a pleasure, while performing a civic duty.

Respectfully submitted,

W. M. HIGHAM, Chairman.
JOHN G. NICHOLSON,
CHARLES H. VINAL, Secretary.

Board of Cemetery Commissioners.

Annual Report

OF THE

CITY CLERK

OF THE

CITY OF NEW BEDFORD

MASSACHUSETTS

For the Year 1915

NEW BEDFORD, MASS.,
MERCURY PUBLISHING CO., PRINTERS,
112 AND 114 UNION STREET.
1916.

ANNUAL REPORT OF CITY CLERK.

City of New Bedford

City Clerk's Office,

Jan. 31, 1916.

To the City Council:

Gentlemen:—During the fiscal year 1915 (Dec. 7, 1914 to Dec. 4, 1915) the City Clerk's Department received and turned into the city treasury the following:—

FOR LICENSES.

Auctioneers,	\$80.00
Billiards, pool, etc.,	1,513.00
Bowling alleys,	162.00
Firearms,	90.00
Carousals,	26.00
Fruit peddlers,	2,320.00
Fruit peddlers, badges,	31.00
Fruit peddlers, wagon plates,	59.00
Hacks and wagons,	82.50
Wagon plates,	89.00
Motor trucks,	20.00
Autos, etc.,	311.50
Intelligence office,	24.00
Junk dealers,	280.00
Junk collectors,	204.00
Junk collectors' badges,	13.00
Junk collector's wagon plates,	33.50
Pawnbrokers,	450.00
Petroleum,	108.00
Petroleum (registration),	124.00
Gunpowder (registration),	1.50
Private detective,	20.00
Scallops,	57.00
Lunch vehicle,	50.00
Dry cleaning,	3.00
Dry cleaning (registration),	1.00
Manufacture of sausages, etc.,	14.00
Garage,	33.00
Garage (registration),	29.00
Motor bus,	278.00
Motor bus seals,	279.00
Motor bus drivers,	352.00
Motor bus drivers' badges,	353.00
Sign permits,	194.00
	\$7,685.00

FEES.

Intention of marriages,	\$1,207.00
Mortgages,	332.20
Assignment of mortgages,	2.75
Foreclosure of mortgages,	1.25
Discharge of mortgages,	39.25
Bills of sale and conditional bills of sale,	64.27
Assignment of wages,	11.75
Married women's certificates,	10.75
Voluntary assignments,	10.00
Writs,	.50
Copies of record,	719.65
Business certificates,	14.75
Transfers,	11.00
Telephone toll call,	.85
Record of partnership,	.50
Found article recorded,	.25
Church incorporation,	1.65
Power of attorney,	.25
Dog fees, (City's share, Ch. 102, R. L.),	522.60
	\$2,951.22

Total of licenses and fees returned to city treasury, \$10,636.22

OTHER FINANCIAL BUSINESS.

Dog fees collected and returned to County Treasurer (County's share, Ch. 102, R. L.),	\$6,020.40
Hunters' licenses issued and returned to Commissioners on Fisheries and Game,	877.00
Non-resident hunters' licenses, ditto, (Chap. 614, Acts 1911),	1.00
Non-resident hunters' licenses, ditto, (Chap. 614, Acts 1911),	10.00
	\$17,544.62

The growth of the business of the office is shown by a comparison of these figures with the figures of 1914. The total receipts over the counter (exclusive of receipts for shellfish commission) were \$17,544.62, which is an increase of \$1,518.29 over 1914. Inasmuch as the items of receipt are individually small, this indicates a considerable increase in the amount of work done by the clerical force in the handling

of the various additional items. The work has been accomplished without increase of office force, and with the same appropriation as in 1914.

VITAL STATISTICS.

The campaign for birth returns, which has been carefully followed for several years, with the slogan "Births must be reported," is beginning to bear good results. Physicians and midwives generally are co-operating splendidly and making their returns promptly.

At this writing the result of the canvass made by the Children's Bureau of the U. S. Department of Labor, under the direction of Miss J. S. Whitney, has not yet been published. Through the courtesy of Miss Julia C. Lathrop, chief of the Children's Bureau, I have been supplied with an advance estimate of the work done in New Bedford by the City Clerk's office as the office for the registration of vital statistics. In a communication, Miss Lathrop says:

"Miss Whitney speaks in the highest terms of the work of the registration office in New Bedford, as does Mr. Drown. Miss Whitney says:

" 'The general work of the registration office in New Bedford I consider excellent. The certificates are all excellently filed by a card index system, the originals are kept in fireproof cases, the employees who handle this part of the work are earnest and capable and the general atmosphere of the office is businesslike and progressive.' "

These words of commendation afford particular satisfaction inasmuch as they furnish the chance "to see ourselves as others see us." Miss Whitney has had opportunity, through long connection with the work engaged in by the Children's Bureau, to correctly estimate the comparative values of registration methods, and her tribute, as the result of her experience in New Bedford, is one of which to be proud. It shows that New Bedford is on the right track, at least. Several suggestions which Miss Whitney made, while in New Bedford, are being followed, greatly to the advantage of the service.

During the year 1915 there were recorded in the office of the city clerk, as registrar of births, marriages and deaths, the following:

Births,	3,724
Marriages,	1,227
Deaths,	1,923

Of the births reported, 129 were stillborn.

Using the Massachusetts state census figures (State census, 1915) the birth rate for 1915 was 32.80 per 1,000, a gain of six hundredths per cent.

Based on the same method of reckoning, the death rate for 1915 was 16.37 per 1,000, a decrease of sixteen hundredths per cent.

There were 115 less marriages recorded in 1915 than in 1914.

There were 104 less marriage intentions filed in 1915 than in 1914.

The 1915 birth canvass, which was very thoroughly made, reveals the fact that during the year 149 births which occurred were not in any way returned to the office of the registrar. While this is a slightly larger number of unreported births than appeared in the figures of 1914, the result seems quite satisfactory, when it is considered that the bulk of the increase in population is from a source where little attention is given to vital statistics, and through the ignorance of the newcomers as to the requirements of law, they are careless in the matter of returns for statistical purposes.

The following table shows the sources of the 1915 birth returns:

Reported by physicians,	2,537
Reported by midwives,	722
Reported at office by parents, etc.,	69
Reported by church records,	116
Reported from death returns,	131
Reported by canvassers, (not otherwise covered),	149
	3,724

The percentage of total births reported from various sources outside the canvass was 95.70 per cent., the canvass completing the remaining 4.30 per cent.

BIRTHS BY NATIONALITIES.

It is a matter of interest as to from what source comes New Bedford's increase in population by birth. The sources of increase by nationality are shown in the following table, by which it appears that the children born of Portuguese parents far out-number the children born of parents of other nationalities. The figures credited to the several nationalities indicate that both father and mother were of the nationality named. Where the father was of one nationality and the mother was of another, the figures appear under the caption "mixed." The table is of further interest as showing what a cosmopolitan city New Bedford really is.

TABLE SHOWING PARENTAGE OF CHILDREN BORN.

Portugal:	
Portugal,	286
Azores Islands,	670
Cape Verde Islands,	145
Madeira Islands,	64
	1165
United States,	711
Mixed,	700
Canada,	332
Great Britain:	
England,	207
Ireland,	37
	244
Austria,	225
Russia	197
Italy,	54
Syria,	34
Greece,	32
Germany,	8
France,	7
Sweden,	2
Norway,	2
Belgium,	2

Turkey,	2
Spain,	2
Brazil,	1
Dutch West Indies,	1
Arabia,	1
Egypt,	1
Asia Minor,	1
Total,	3724

In connection with the general subject of birth returns, a form of acknowledgement to parents of the receipt of the birth report has been adopted, with the idea that it will be of assistance in interesting the people in the matter of more full and more accurate returns. An engraved card, containing the essential facts relating to the birth, made out in the form of a memorandum, signed by the registrar, is sent to the parents of every child whose birth is recorded in the office. This card can be, and undoubtedly will be kept by the parents in most instances. When a birth certificate is desired, the card may be shown at the registrar's office, and will assist in the ready finding of the record.

MINOR LICENSES.

The issuing of minor licenses, under the law and ordinance delegating power to issue to the City Clerk, which has been in force for the past year, has worked very satisfactorily. The only hitch on the operation of the law has been the occasional delays in the receipt of reports from the police, when applications have been referred to the police department for investigation. I have been assured by those in charge of the police department that the recommendation which I have made yearly since 1911, that a police officer be specially detailed for the work, will be carried out. With this change in force, conditions should be improved.

In the matter of licenses and fees it may be worth while for the City Council to consider whether one or two sources of possible income should not be followed up. For instance,

in Boston and other cities, contractors who block the streets and passageways while constructing buildings (under the form of permit commonly known as building obstruction permits), pay into the city treasury small sums for the privilege which is granted to them by the Board of Aldermen or bodies having similar powers. In New Bedford, the custom has been to make no charge for this form of inconvenience to the public. It may be argued that the privileges secured by the permits are special privileges, and that there should be some recompense to the public for the inconvenience caused by the blocking of the streets. A small fee, sufficient to cover the expense of the clerical work of making out and recording the permits would not seem to be out of the way.

The same is true of permits for disturbing the surface of streets, by the public service corporations. It is theory that the streets disturbed are repaired and put into as good condition as before the disturbance, the cost of the repairs being met by the charge of the street department made by regulation of the board of aldermen. But this is mainly theory, inasmuch as when a disturbance of the surface is once made the surface can never be put back into as good condition as it was before the surface was disturbed. Whether or not it would be good policy to provide a fixed fee for every permit for disturbance is a matter which well might be considered. The cost of such fees would, of course, be borne by the patrons of the public service corporations, but this may seem more fair than to make the expense chargeable to the whole public, a part of which receives absolutely no benefit.

ELECTIONS.

During the year 1915 there were three regular elections (the joint primaries being counted as an election).

The results of the state and municipal elections are here given.

STATE ELECTION, NOV. 2, 1915.

GOVERNOR.

Nelson B. Clark, Progressive Party, Beverly,	89
Walter S. Hutchins, Socialist, Greenfield,	257
Samuel W. McCall, Republican, Winchester,	5,133
Peter O'Rourke, Socialist Labor, Medford,	53
William Shaw, Prohibition, Andover,	519
David I. Walsh, Democratic, Fitchburg,	4,664
Blanks and scattering,	137

LIEUTENANT GOVERNOR.

Edward P. Barry, Democratic, Boston,	4,073
Calvin Coolidge, Republican, Northampton,	5,535
Alfred H. Evans, Prohibition, Hadley,	397
James Hayes, Socialist Labor, Plymouth,	110
Chester R. Lawrence, Progressive Party, Citizens Nom. Paper, Boston,	72
Samuel P. Levenberg, Socialist, Boston,	271
Blanks and scattering,	389

SECRETARY.

Edwin A. Grosvenor, Democratic, Amherst,	3,660
Albert P. Langtry, Republican, Springfield,	5,773
Thomas J. Maher, Socialist Labor, Medford,	135
Marion E. Sproule, Socialist, Lowell,	320
Willard O. Wylie, Prohibition, Beverly,	356
Blanks and scattering,	608

TREASURER.

Henry L. Bowles, Democratic, Springfield,	3,577
Charles L. Burrill, Republican, Boston,	5,791
Charles E. Fenner, Socialist, Worcester,	342
William E. Marks, Prohibition, Worcester,	331
Jeremiah P. McNally, Socialist Labor, Salem,	146
Blanks and scattering,	665

AUDITOR.

Alonzo B. Cook, Republican, Boston,	5,716
James W. Holden, Socialist Labor, New Bedford,	489

Blanks and scattering,	2,816

SHERIFF—BRISTOL COUNTY.

Edwin H. Evans, Republican, Taunton,	7,909
Blanks and scattering,	2,943

“Shall the proposed amendment to the constitution, empowering the general court to authorize the taking of land to relieve congestion of population and to provide homes for citizens be approved and ratified?”

Yes,	5,884
No,	2,797
Blanks,	2,171

“Shall the following proposed amendment to the constitution, enabling women to vote, be approved and ratified?”

Article of Amendment.

Article three of the articles of amendment to the constitution of the commonwealth is hereby amended by striking out in the first line thereof the word “male.”

Yes,	3,537
No,	6,396
Blanks,	919

“Shall the following proposed amendment to the constitution, relative to the taxation of incomes and the granting of reasonable exemptions, be approved and ratified?”

Article of Amendment.

Full power and authority are hereby given and granted to the general court to impose and levy a tax on income in the manner hereinafter provided. Such tax may be at different rates upon income derived from different classes of property, but shall be levied at a uniform rate throughout the commonwealth upon incomes derived from the same class of property. The general court may tax income not derived from property at a lower rate than income derived from property, and may grant reasonable exemptions and abatements. Any class of property the income from which is taxed under the provisions of this article may be exempted from the imposition and levying of proportional and reasonable assessments, rates and taxes as at present authorized

by the constitution. This article shall not be construed to limit the power of the general court to impose and levy reasonable duties and excises."

CITY OF NEW BEDFORD,
April 22, 1916.

To the City Council Committee on Finance:

Gentlemen:—The sub-committee on the valuation of city property reports herewith a list of city property and its value. The valuation of real estate has been secured from the Board of Assessors, and the valuation of other property has been secured from the officers in charge of the several departments. The entire valuation is believed by your sub-committee to be a fair valuation of the city.

JOHN T. SLOANE,
GEORGE A. J. LAGASSE,
GEORGE T. DUCKWORTH,
Committee.

CITY OF NEW BEDFORD,
OFFICE OF THE CITY AUDITOR.
March 4, 1916.

The Honorable City Council:

I respectfully report that I have examined the report and investments of the trustees of the Kempton fund and find the same correct. Said investments are represented by securities having a face value of two hundred and fifty-seven thousand dollars, and a savings bank deposit amounting to one thousand dollars and sixty-three cents.

I have also examined the report and investments of said trustees of the Sylvia Ann Howland Educational and Library Fund, of the George O. Crocker Library Fund, the Charles L. Wood Library Fund, the Oliver Crocker Library Fund, the George Howland, Jr. Library Fund, the Charles W. Morgan Library Fund, the James B. Congdon Library Fund and the Jonathan Bourne Prize Fund, and find the same correct. Said investments are represented by securities and deposits of a par value of one hundred eighteen thousand four hundred fifty-four dollars and forty-five cents.

EDWARD L. CRONIN,
City Auditor.

CERTIFICATES.

We have examined the foregoing report and statements of the City Auditor and believe the same to be correct.

EDWARD O. KNOWLES,
WILLIAM J. FRANCIS,
CHARLES L. FISHER,

Sub-committee of the joint standing committee on finance, appointed to examine the books and accounts of the City Treasurer and the City Auditor.

The foregoing report and statements of the City Auditor are approved.

JOHN H. AINDOW,
SAMUEL A. GOODFELLOW,

REPORT OF THE
Commissioners of the Sinking Funds.

City of New Bedford,
March 9, 1916.

To the City Council of the City of New Bedford, Mass.

Gentlemen:—At a meeting of the Commissioners of the Sinking Funds of the City of New Bedford, held at this date, it was

Voted:—To adopt the foregoing statement of the Treasurer of the Sinking Funds as the report of the Commissioners of the Sinking Funds of the City of New Bedford, required by the Statutes of the Commonwealth of Massachusetts to be made annually to the City Council.

WM. A. MACKIE,
CHAS. S. KELLEY, JR.,
Commissioners of the Sinking Funds.

JAMES P. FRANCIS,
Certified Public Accountant.
Masonic Building.

New Bedford, Mass.
March 88, 1916.

William A. Mackie, Esq.
John T. Bullard, M. D.
Charles S. Kelley, Esq.

} *Commissioners of the*
} *New Bedford*
} *Sinking Funds.*

Dear Sirs:—I have finished my examination of the books and accounts of the Treasurer of the Sinking Funds for the year ending December 31, 1915, and hereby certify that they are correct. I have also examined the securities representing the investments, and have found them as stated in his report.

Yours very truly,

JAMES P. FRANCIS,
Certified Public Accountant.

New Bedford, Mass.,

January 1, 1916.

To the City Council of the City of New Bedford:

The Trustees of the Kempton Fund herewith submit the following as their Eighth Annual

REPORT.

During the past year there has been no change of the securities in which the fund of the Kempton Trust, the Gift of Sarah E. Potter, of \$250,000.00 is invested.

Under the provisions of City Ordinances approved by the Mayor February 26, 1914, and March 12, 1914, the Trustees of the Kempton Fund are also charged with the management, direction and control of the investment of the following trusts, viz:

Sylvia Ann Howland Educational and Library

Fund,	\$100,000.00
George O. Crocker Library Fund,	10,000.00
Charles L. Wood Library Fund,	2,000.00
Oliver Crocker Library Fund,	1,000.00
George Howland, Jr. Library Fund,	1,600.00
Charles W. Morgan Library Fund,	1,000.00
James B. Congdon Library Fund,	500.00
Jonathan Bourne School Fund,	1,000.00

The gross amount of income which has been received by the Trustees is \$15,508.16, and this amount less \$15.00 expended by the Trustees for rental of safe deposit box at the Mechanics National Bank, has been paid to the City Treasurer, as provided in the several Trusts and the City Ordinances.

FREDERIC TABER,
ABBOTT P. SMITH,
THOMAS S. HATHAWAY,

Trustees.

SYLVIA ANN HOWLAND EDUCATIONAL AND LIBRARY FUND.

ENGINEER'S REPORT

City of New Bedford,
Engineering Department,
January 1, 1916.

To the City Council of the City of New Bedford:

Gentlemen:—In compliance with section 5 of the ordinance defining the duties of the City Engineer, I respectfully submit the following report of the expenses and operations of the Engineering Department for the year ending December 4, 1915.

EXPENDITURES.

Salaries and pay rolls.....	\$18,282.44	
Telephone	76.94	
Local transportation.....	701.18	
Drawing supplies.....	157.55	
Blueprint materials.....	177.93	
Printing, stationery, advertising, etc....	229.77	
Sundry supplies.....	116.55	
Office furniture and repairs.....	43.45	
Platting system expenses.....	102.10	
General instruments for office and field	312.11	
Traveling expenses, express, postage, etc.	109.56	
Printing annual report.....	48.00	
Public statutes and reference books...	13.75	
Meteorological instruments.....	59.56	
Boundstones	3.15	
Sundry labor not in pay roll.....	49.67	
		\$20,483.71
Balance		16.29
		<u>\$20,500.00</u>

RECEIPTS.

Appropriation, regular.....	\$19,000.00	
" special.....	1,500.00	
		<u>\$20,500.00</u>

EXPENDITURES.

Gross	\$20,483.71
-------------	-------------

RECEIPTS.

By credit to Miscellaneous Revenue of 1915:

Cash from sale of blueprints, printing materials and maps.....	\$531.64	
Plans of poles and conduits under Section 12, Chapter 335 of Acts of 1914.....	513.30	
		<u>\$1,044.94</u>
Net expenditures.....	19,438.77	
		<u>\$20,483.71</u>

The usual work of the department has been carried out during the year, the nature and cost of which is clearly set forth in the table of general classification of work.

The Board of Aldermen this year renewed the practice of referring all street matters to the Committee on Streets, and estimates of the cost on all work considered have been furnished that committee by this department.

The Street Department has purchased equipment this year for doing all permanent street surfacing formerly done by contract. This has required more time from this department than heretofore in giving lines and grades in detail.

In the following pages I have attempted to give a general review of the work done during the year, together with some suggestions for the future.

SEWERS.

There has been a great falling off in the amount of sewer construction during the last two years, although the number of new dwellings for the corresponding period has shown only a slight decrease. This is plainly shown in the following table:

	Expended for Sewers.	New Dwellings.	New Tenements.
1910	\$99,137.05	639	1812
1911	80,696.47	485	1117
1912	165,658.60	379	896
1913	223,452.18	425	820
1914	66,694.96	406	808
1915	72,129.75	383	699

As practically all the sewers petitioned for have been granted, this would seem to indicate that nearly all the sewers needed had been built in the district where the bulk of construction is now in progress.

It now becomes a question of judgment as to the best policy to pursue in the construction of trunk sewers into new and undeveloped country. It would seem better to

do some of the work on the trunk sewers in advance of the demand rather than be forced to construct them at the same time that we do the laterals and thus bring an excessive expense in one year, as in 1913, when nearly a quarter of a million dollars was expended on sewer construction.

The section of the city north of Brooklawn Park and east of Bowditch street is provided with the sanitary sewers of a separate system, and many houses of a good class have already been built in this location. There is at present absolutely no provision for the drainage of the surface water from this entire district, and in the case of Hersom street not even the sanitary sewers have yet been built. Numerous petitions have been received for relief from these conditions, and it would seem that the most urgent need for sewer extensions for the next year is in this district.

The relief for this condition lies in the acceptance of several streets, as approved by the Board of Survey this year, and the construction of a large surface water sewer and sanitary sewer to extend as far as Belleville avenue at least, where the sewage can be cared for in the Belleville avenue sewer, which is soon to be connected with the intercepting sewer system. All of this sewage will require pumping and ought on that account to be kept as free as possible from storm water. The surface water drain, which will follow closely the present water course, can drain, for some time to come, through the brook which lies in this valley from Belleville avenue to the river.

Perhaps the next section in importance is that lying west of Bowditch street, from Query street northerly. There is a summit about 450 feet west of Bowditch street which prevents the drainage of property west of that point through the sewers to the river. The natural drainage is to the swamp and brook near Church street. Considerable building west of this summit has already been done, and numerous petitions have been received for

sewers that could not be provided. This situation will be relieved by the construction of the sewer and surface water drain which now ends at the brook in Query street, followed by the construction of the lateral sewers as petitioned for.

The former owners of the Onoko Mill property set great value on a small pond fed by the above mentioned brook, which lies between Bowditch street and the New York, New Haven & Hartford Railroad, and were insistent upon its preservation for their use. The result has been that where the brook formerly flowed through a marshy district with a dense growth of wood and underbrush, there are today houses, streets and catch basins; and a surface drain 36 inches in diameter replacing the brook. Below the mill property the valley of the brook has been entirely built up, and the brook cut off except for such outlet as it has into small sewers in the vicinity of the mill. The resultant quick rush of storm water, together with the restriction of its means of outlet, has caused flood conditions on the mill property.

The new owner of the mill is as anxious to be rid of the water as the former owners to conserve it. If the city is to furnish such relief, a preliminary study of the case indicates that the best method will be by the construction of a new sewer connecting with the Sawyer street sewer and extending from Sawyer street through Purchase and Deane streets to Brook street and diverting the flow of the surface water drain at this point.

Another section which will require a trunk sewer before it can be built on lies north of Maxfield street and west of Liberty. A large part of this land is now on the market, but as yet much filling is to be done. This section can be drained by an extension of the Tripp's brook relief sewer which now terminates at Kempton street.

The main system for the relief of the Shawmut avenue valley has not been completed and the portion already built, while doing good service in the removal of ground

water and providing dry cellars for the Topham street neighborhood, cannot be utilized for the removal of sewage until after the completion of the entire system.

Acushnet avenue, north of Balls Corner, lies on a ridge, and it will be necessary, in the near future, to care for this district by the construction of sewers both east and west of the avenue. This district is nearly all divided by streets and cut into house lots, and many buildings have been erected. This section will be a very expensive one to drain and will require foresight to secure streets located in the proper place to prevent excessive cost for damages.

All schedules for sewer assessments this year have been prepared in accordance with the order passed by the Board of Aldermen, December 10, 1914, the object of which was to equalize the assessments paid for sewer benefits.

The method seems to be entirely successful as there have been no excessive charges. The sewers built this year have been in the class calling for the maximum assessment of 75% of the cost of the sewer, yet the average cost for the drainage of a 50-foot lot has been only \$37.13 this year, and of a 40-foot lot only \$29.704.

In accordance with Chapter 227 of the Acts of 1915, assessment plans and schedules have been made for the purpose of recording in the Registry of Deeds. The Act requires that the plans shall be made to show the lots as they existed on April first previous to the completion of work, while the description is required of metes and bounds as they exist at the time the assessment is made. As an interval of two years is possible between these events, some of the plans do not bear any resemblance to the lots described. This is sure to be very confusing and I feel that this section should be amended in such manner as to cause the plans and descriptions to be of one date, and that date preferably that on which the sewer was ordered and an incumbrance really placed on the land.

Work on the intercepting sewer has progressed continuously through the year and at the present time the flow of all sewage has been intercepted from the upper part of Clarks Cove and from that part of the city lying west of Second street, Water street, and Acushnet avenue as far north as Logan street. The details of this work, together with the costs, are given fully in the report of William F. Williams, Consulting Engineer, which is made a part of this report.

CITY PLANNING AND STREET WORK.

Under this heading much is being written today, and a city planning board seems to be considered the modern cure-all for the various problems confronting cities. It is true that the only way to secure the best results from large expenditures for streets is by following out a carefully studied and prepared system, which will approach the ideal as near as possible within the limit of funds available and taking into account also existing conditions. The mere creation of a planning board does not secure this, but too often, I think, results in the appointment of new commissions having jurisdiction over the same subjects already under the management of other authorities and with almost unlimited powers to recommend but not to execute. This is sure to lead to conflict of authority and unsatisfactory results.

The Board of Survey of this city was established by law with the idea in view of avoiding some of these difficulties by constituting the Board of Mayor and Aldermen to act as a board of survey or planning board; thus those authorities having the consideration of the acceptance of streets and the providing for the cost of construction of the same have also to consider the planning for the future. Under this act the City Clerk has the custody of all records and plans belonging to this board as well as the acceptance plans; also the same engineer who has charge

of the layout work makes the studies and plans for extensions and projected sewer systems for the same, designed to harmonize with present conditions.

This Board of Survey has now been in operation more than a year. During this time it has passed on eight plans submitted by real estate owners and has projected three plans on its own initiative. These plans cover 17.77 miles of streets and their final adoption was without opposition of any owner or abutter.

It is proposed this winter to make surveys, take levels, etc., as far as possible, in the undeveloped districts of the city with the ultimate object of making a comprehensive plan whereby the future locations of streets throughout the city can be determined.

In May of this year, a committee made a study for the development of heavy traffic streets. At the south end it was decided to extend the block paving laid last year in Front street from Gifford to Potomska streets northerly to Howland street, and at the north end to pave Cedar Grove street from Front street to Belleville avenue, and Belleville avenue from Cedar Grove street to Belleville road. This will eventually give a wide, level street through the heart of the manufacturing section of the north end from the center of the city to Tarkiln Hill road.

During the year, 2.037 miles of streets have been accepted, making the total length of accepted streets at the present time 186.6 miles. Four streets have been widened and the lines of one altered. On two streets the grade has been changed and on West French avenue a plan establishing the grade and method of developing the street as a boulevard was accepted.

This latter plan provides for a 24-foot roadway, so arranged as to be readily widened when necessary, two sidewalks and three grass and tree spaces. The outer grass plot, 14 feet in width, is in full view of the cove, on the shore of which the city owns practically the entire frontage. A large portion of the shore is now under the

jurisdiction of the Park Board. With its exceptionally fine location and arrangement, this street should provide a magnificent parkway for the future. It ought, however, to be constructed as soon as possible as it is now nearly impassable. Also trees of a suitable species to withstand the exposed situation near the salt water should be set out.

Five streets, which have presented a difficult problem for solution for several years have been accepted, viz.: Arlington and Concord streets, across land which was sold in house lots and lying between Acushnet avenue and Bowditch streets where the length of the blocks was over 2,000 feet, these streets dividing the distance approximately into thirds; Elm street, from Reed street to Rockdale avenue, where the original owner had reserved to himself a strip of land 40 feet wide in line of Elm street to the east, and parties buying adjacent lots had built houses fronting on this land, thinking it a street; Mapleview terrace, from Tremont street west as far as thrown out; and Wood street, from Acushnet avenue to Belleville avenue.

On the latter street there still remains an entire block to be accepted before there is a direct connection from Acushnet avenue to the new bridge across the Acushnet river.

Of the above, Arlington, Concord and Elm streets were accepted under the provision of law authorizing the assessment of betterments.

On October 29, 1915, Union street, from Front street to Acushnet avenue, was widened fourteen feet on the south side, making a continuation of the work already completed from Acushnet avenue to Sixth street.

A conference was held with President Elliot, of the N. Y., N. H. & H. Railroad, at which the probability of the location of the passenger station at the foot of Union street was discussed. Mr. Elliot admitted the general desirability of this location. The question is complicated, however, with the problem of handling the boat freight

and the storage of necessary cars in a cramped place. In an undertaking of this magnitude careful study must be given to be sure that the changes proposed will give ample accommodation for fifty years or more, otherwise the expenditure would be unwarranted. This department has submitted plans, sketches and data of various kinds, and the engineers of the railroad are now giving the matter a thorough study.

The construction work of the Union and Purchase street widenings, made in 1913, was fully completed in June and a portion of the cost of the same assessed upon the abutters and on the Union Street Railway. The latter has contested the payment and taken its claim to the Supreme Court where it will be necessary for the City to contest the case. The amount of money involved is \$139,000.

The old stone causeway across Turner's Pond was torn down and rebuilt this year at a cost of about \$6,500. The old structure was rapidly falling to pieces and had become dangerous. The roadway was widened to 30 feet on the top with side slopes of 2 to 1, paved with large stones from the old wall up to a point about two feet above the spillway at the dam at Turner's Mill. The culvert was constructed of reinforced concrete with side walls supporting reinforced concrete slabs. The opening is about 5 by 10 feet and is smooth and free from obstructions. This gives a considerable increase of capacity over the other culvert.

PLATTING SYSTEM.

The following is a record of conveyance of real estate copied at the Registry of Deeds, at New Bedford, and reported to the Board of Assessors each month by this department.

Two full sets of blue prints of the plats, 159 in number, are furnished the Board of Assessors in April of each year. These plats and indexes in this and the Assessors' office are corrected to date each day.

During the year the records of 188 estates have been looked up in the Probate Court at Taunton and the changes in ownership reported to the Assessors.

Thirteen new tracings of plats have been made to replace old tracings, and one entirely new plat has been made to take care of a cut-up in the farming district.

December 1, 1915, there were 39,681 lots shown on the plats.

Sewers have been shown on all the plats.

METEOROLOGICAL RECORDS.

Our meteorological records this year show maximums in several cases.

On January 12 and 13 a heavy storm with snow occurred in which the wind velocity was 90 miles—the highest that we have ever recorded.

On June 18 a rainfall occurred which lasted for 36 minutes with a total precipitation of .68 of an inch. The maximum rate was 4.32 inches per hour for 6 minutes, and a rate of 2.12 per hour prevailed for 17 minutes.

On June 26 there was a thunder storm lasting one hour with a total precipitation of .85 of an inch and a maximum of 6 inches per hour for 6 minutes. This is the maximum rate we have ever recorded. The highest rate fortunately occurred at the beginning of the storm. The dry streets, by retarding the rush of water to the sewers, prevented serious flooding. As we use a rainfall of $1\frac{1}{2}$ inches per hour in estimating sewers, this record gives cause for thought.

On December 26, with a gale of 60 miles per hour, which shifted from southwest to northwest, the high tide was 2.7 above and the low tide 7.85 below mean high water. This is a range of tide 10.55 feet in one day and is the lowest low tide we have ever recorded. The New Bedford Gas & Edison Light Company and the Union Street Railway Company were obliged to shut down their power plants. If this tide had occurred on a week day, all the mills depending on the river for their condense water would probably have been unable to run during the time of the extreme low tide.

POLES AND WIRES.

Under Chapter 335 of the Acts of 1914, all poles, conduits, manholes, etc., of the wire using companies were located, and sectional maps, similar to those used for the assessment plans, have been made covering that part of the city designated in the act. These give, in addition to the above information, lot frontages and a designating number corresponding to the assessment plan in order that the owners of abutting property on any street may be readily determined by reference to the assessment index.

These plans are corrected constantly for all changes and additions and a set of blueprints from them furnished to the Inspector of Wires each year.

The work was done by this department during the winter months without the employment of additional help, one half of the cost being borne by the public service corporations in accordance with the Act.

In January the committee specified in the Act met and recommended the removal of wires from one mile of streets, the section selected being directly west of the business center of the city. The Board of Aldermen ordered this work done and the various companies completed the removal before the end of the year.

The assistants who have been employed in this department during the year are:

Assistant Engineer—Leonard J. Hathaway, Jr.

Field—Arthur C. Kirby, Elmer L. Deane, Edward F. Mulally, Walter E. Wilson, *Ellsworth B. Tolman, Manuel M. Enos, James M. Hayes, Randall S. Coe, *Walter Martin, Merton J. Batchelder.

Office—Clifford L. Wade, Paul G. Covill, Benjamin F. Howe, Wilfred T. Fahey.

Plotting system—Edward M. Slocum and Norman Barstow.

Clerks—Jessie Loughlin and Marion L. Clarke.

*Part of the year.

Respectfully submitted,

GEORGE H. NYE,

City Engineer.

Extreme for year		+ 2.6	—2.6		—1.4	—7.9	

All figures above refer to so called "Mean high water" which has been used at 0.65 below City Datum.

Observations for the last 20 years indicate that :

Average high water is 0.852 below City Datum.

Average low water is 4.393 below City Datum.

Average Range of tides is 3.541.

In the future observations will be based on the assumption that Mean high water is 0.85 below City Datum, and Mean low water is 4.39 below City Datum.

METEOROLOGICAL RECORD 1915.

WILLIAM F. WILLIAMS
CONSULTING ENGINEER

New Bedford, Mass., February 26, 1916.

The Mayor, and Board of Aldermen and Committee on Roads, Bridges and Sewers.

Gentlemen:—I beg to submit the following report on the progress of the construction of the Intercepting Sewer System during the year ending December 4, 1915.

The main interceptor is completed to a point in Logan street about 200 feet east of Acushnet avenue and work is in progress on the extension of the sewer, as now authorized by the Committee, easterly in Logan street to Front street and northerly in the same to Holly street. All work on the intercepting sewer, during the year, has been done by the city with day labor.

Plans are now in preparation for the last section of the intercepting sewer and the North End pumping station to take care of the separate sewer system north of Belleville road. As now planned the gravity section of the intercepting sewer will end in Belleville avenue about 200 feet north of Davis street.

The screen station was placed in operation in January although the boilers did not go into use until a later date. The screenings removed during the last six months of the year amounted to 1149 cubic yards of unpressed material. The pressing reduces the bulk to about one-third of its volume as it comes off the screens. The pressed screenings are burned under the boiler.

The Screen Station and the two pumping stations have performed their work smoothly and without accident during the year. The sand washing apparatus has not

yet been placed in commission but it is hoped to have it in operation in a very short time. In the mean time the heavy matter that passes the screens is not causing any trouble in the outfall as it is small in quantity and the velocity secured in the main sewer is all that was anticipated. The maintenance cost of each plant is given in detail in the tables.

The net cost of the intercepting sewer system to December 4, 1915, including engineering and inspection, was \$1,073,895.91. Total net expenditures for the fiscal year 1915, including engineering and inspection, was \$249,067.39. For details of work done, money spent, and contracts made see tables.

The following assistants and inspectors have been employed on the intercepting sewer work during the year: Stanley G. Proverbs, Walter N. Charles, Robert S. Graham, William H. Chase, Robert A. McIntyre, Jasper Sisson, John N. O'Brien, Jr.

Respectfully submitted,

WILLIAM F. WILLIAMS,

Consulting Engineer.

SUMMARY OF WORK PERFORMED BY DAY LABOR
FOR THE YEAR ENDING DECEMBER 4, 1915.

SECTION 5.

In Water street, south of Union, thence in Water, Bridge Park, High, Second, Water, Acushnet avenue, and in Logan street to about 200 feet east of Acushnet avenue.

Length 6,825 feet.		
Total excavation	27,512	cu. yds.
Rock excavation	5,065	" "
Reinforced concrete masonry.....	5,053	" "
10" pipe separate sewer (no present outlet)	4,236	ft.
18" storm water sewer.....	302	" "
10" " " "	290	" "
6" underdrain	2,575	" "
6" house connections	1,300	" "

This work included 14 regulating chambers at street crossings with siphons for storm water overflow.

SECTION 6.

In Logan street from 200 feet east of Acushnet avenue easterly 525 feet. Work in progress.

Total excavation	2,136	cu. yds.
Rock excavation	196	" "
Reinforced concrete masonry.....	263	" "
10" pipe underdrain	475	ft.

BONNEY STREET SEWER.

In Bonney street north of Brock avenue (Cove road).

Length 350 feet.		
Total excavation	555	cu. yds.
10" pipe separate sewer.....	310	ft.
1 brick manhole.		

FIRST STREET PUMPING STATION.

One concrete manhole with hydraulic gate adjacent to pumping station in First street.

Total excavation	51 cu. yds.
Reinforced concrete masonry.....	19 " "

Overflow in Second street to connect separate under sewer leading to the Cove Pumping Station with the separate sewer leading to the First Street Pumping Station.

Location: Second street across Grinnell street.

Length 68 feet.

Total excavation	72 cu. yds.
10" pipe separate sewer.....	68 ft.

There were 8 sewer outlets into Clarks Cove repaired, —at Hudson, Calumet, Capitol, Lucas, Woodlawn, Shore and Crapo streets, and Acushnet avenue.

The outlet at David street was extended 221 feet.

The outlet at County street was discontinued from beyond the high water line and a new outlet built leaving the old sewer as a possible boat landing.

REPORT.

HEADQUARTERS FIRE DEPARTMENT,
OFFICE OF CHIEF ENGINEER.

December 31, 1915.

To the Honorable the City Council:

GENTLEMEN:—I have the honor of submitting the annual report of the fire department for the year ending December 31, 1915, together with such recommendations as I deem necessary for increasing the efficiency of the department.

APPARATUS.

We have in service the following :—

HORSE DRAWN:

- 3 Second size Steam Fire Engines and Hose Wagons.
- 1 Combination Chemical and Hose Wagon.
- 1 Hose Wagon.
- 3 Aerial Hook and Ladder Trucks.
- 1 Fire Alarm Wagon.
- 6 Exercise and Coal Wagons.

AUTOMOBILE:

- 1 Ahrens Fox Combination Engine and Hose Wagon.
- 1 Robinson “ “ “ “
- 1 Webb “ “ “ “
- 1 White “ “ “ “
- 3 Locomobile Combination Chemicals and Hose Wagons.
- 1 Locomobile Supply Car for Repair Department.
- 1 Locomobile Instruction Car.

IN RESERVE

- 1 Combination Truck.
- 1 Ryan Truck.
- 5 Steam fire engines.
- 4 Wagons

HORSES.

There are twenty-six horses in this department, mostly in good condition.

HARNESSES.

There are nine sets for three horse hitches, twelve for two horse hitches and four single harnesses in good condition.

HOSE.

There are 17,950 feet $2\frac{1}{2}$ in. cotton rubber lined hose in good condition, 1000 feet should be added during the year.

PENSION¹ LIST.

Mrs. Mary M. Nelson, widow of Martin S. Nelson.

Capt. Loring T. Parlow, Engine Co. No. 2 who joined the Department May 21, 1863.

DEATHS.

Fourth Assistant Engineer STEPHEN L. FINNELL died May 26, 1915.

Engineer Finnell joined this department December 3, 1888 as hoseman, Hose Co. No. 2, was elected second lieutenant in May, 1890, and first lieutenant in May 1898, which rank he held until his election by the city council, April 8, 1908, to the position of Fourth Assistant Engineer; re-elected in April, 1912, he served until his death.

His associates keenly regret the loss of a wise counsellor, a just and capable official, a delightful companion and co-worker, a true friend.

CAPT. FRANCIS P. WASHBURN, Pension List;
died September 4, 1915;
joined the department November 28, 1864.

FRANK B. CHADWICK, Engine Co. No. 5;
died October 24, 1915;
joined the department February 1, 1893.

INJURIES.

Lieut. Harry A. Francis and Clerk David A. Cobb of Hook and Ladder Co. No. 1 were seriously injured at the fire at the Hill & Cutler Mill, May 27th, and their cases have been reported to the city council with the recommendation that they be compensated in full for their injuries and loss of time.

THIRTY-SEVENTH ANNUAL REPORT
OF
THE BOARD OF HEALTH
OF THE
CITY OF NEW BEDFORD

To the City Council for the Year 1915

NEW BEDFORD, MASS.:
NEW BEDFORD PRINTING CO., PRINTERS
1916

REPORT

NEW BEDFORD, JANUARY 1, 1916.

To His Honor, the Mayor and Gentlemen of the City Council:

The Board of Health submits herewith its report for the year 1915:

THE DEATH RATE.

The whole number of deaths during the year 1915 was 1719, against 1750 in 1914. The rate for last year, based on the census population of 109,652, was 15.67 for each 1,000 inhabitants. The rate for 1914, based on the estimated population that year of 110,000—which was probably too high—was 15.90.

The deaths of children under one year of age number 495, as against 534 in 1914, a decrease of 39. The infant death rate is usually figured on the basis of each thousand of births, and as the exact number of births is not available, no death rate can be given.

EDUCATIONAL WORK.

Health officers are coming more and more to realize that the promotion of the public health and the prevention of disease—both of which are duties imposed upon boards of health—must depend in large measure on the people themselves. There is a point beyond which, inspection, the enforcement of regulations, the supervision of sources and supplies of food and drink, cannot be carried. That point has very nearly been reached. The activities of boards of health in the past have been largely along these lines. They have produced excellent results which prove that they were

aimed in the right direction, and that they must be carried on in the future with patience and diligence. They must be supplemented, however, by an attempt to awaken among the people what some one has called the sanitary consciousness. The public health officer can fight disease, and in some cases he can do a great deal in the way of preventing disease, as by safeguarding the milk and water supplies; but at a certain point the limit of his effectiveness is reached, and the responsibility of the individual begins. The prevention of disease, both of communicable diseases and of the degenerative or so-called wear and tear diseases of middle life, is in the last analysis in the hands of the people themselves. Each person in the community should be a volunteer health officer, and if that ideal situation is so striven for, it is essential that two things be done; the interest of the people must be awakened, and they must be instructed how to avoid the diseases which now levy such a heavy toll of lives.

It would be hard to say whether indifference or ignorance is the more serious obstacle. Certainly the former is more difficult to overcome. The person who does not know can be taught: the one who does know but does not care is a hard problem. One thing is sure—to educate the ignorant, and to arouse the indifferent to a sense of their responsibility in this important work of promoting the health, and thereby the efficiency and happiness of the community, the most effective agency is publicity.

Printer's ink, it has been said, has been one of the most potent instruments at the disposal of the health officer. At the beginning of the year, the present board determined to make use of printer's ink to the fullest extent its means permitted. It had been the board's policy to send, to families from which cases of typhoid fever and tuberculosis were reported, circulars stating the precautions to be observed with reference to these diseases. Their policy was carried further by drawing up similar circulars relative to scarlet fever, measles, whooping cough and diphtheria. For the

guidance of teachers in the public schools, the rules of the board and of the school committee, as agreed upon in conference were published in book-form, and along with them was reprinted a comprehensive outline of the symptoms of diseases common among school children first published by the State Board of Education. At the beginning of the school year in September 18,000 copies of a circular entitled "To the Parents of School Children" were distributed in the public and parochial schools. From time to time during the year Health Bulletins relating to timely subjects and to diseases during the season of their prevalency, were published in all the papers of the city. In all twenty-five of these bulletins were printed during the year. The week after Christmas the Baby Welfare exhibit of the State Department of Health was displayed in the Free Public Library and a considerable quantity of literature relating to the care of babies was distributed. In the fall, we began the display of brief health bulletins on the screens of six of the moving picture theatres, the proprietors of which generously agreed to enable us to reach the public in this way without charge. The only expense in this has been the cost of the lantern slides. The theatres which are co-operating with the board in this work are the New Bedford, the Orpheum, Thevien, the Savoy, the Pastime and the Comique. Finally, in this connection, mention should be made of a lecture on the work of the public health officer given by the agent of the board, William G. Kirschbaum, before the Howard M. E. Church Brotherhood upon its invitation.

In all of the publicity work the purpose has been chiefly to teach people how to avoid catching and spreading disease, to awaken their interest in public health matters, to secure their co-operation, to instruct them in personal hygiene and to spread the gospel of good health generally. Progress along this line must necessarily be slow, but we believe that the work is valuable and that if continued, as it will be, it must be productive of good. We have not done as much as we should have liked to do; that we did as much as we did

was due in large measure to the liberality of the newspapers which published the Health Bulletins free of charge.

FOOD INSPECTION.

A rather unusual use of newspaper publicity was made in connection with the board's efforts to improve the conditions under which foods were prepared and handled. Attention was directed chiefly to ice cream manufactories and to bakeries. In both we found, along with places in which the conditions under which it was handled were all that could be desired, other places which were highly objectionable and a few which were positively revolting. After the ice cream investigation, which was undertaken first, had been under way for some time, we came to the conclusion that the department's efforts to improve conditions would gain in effectiveness if the general public knew what the conditions were. Here again the question of the responsibility of the public came in. If there was to be any public demand for clean ice cream, it was felt, the public must first know the facts. Accordingly, through co-operation with the New Bedford Sunday Standard, a writer was detailed to accompany the board on its inspections, and to publish, with pictures, an account of the conditions, bad as well as good, as he found them. Subsequently the same course was pursued with reference to the bakeries, some of which were found to be unsanitary and otherwise objectionable. By these means, public interest in ice cream manufactories and bakeries was aroused, and a public sentiment for greater cleanliness created which reinforced the efforts of the department to remedy the evils found.

The board personally visited the ice cream manufactories and many of the bake-shops. In one or two cases where it was found that ingredients deleterious to health were being used the manufacturers were induced to go out of business. The cleaning up of dirty plants was insisted upon; and samples of ice cream were taken from time to time and tested as to the percentage of milk fat contained. Copies of

existing regulations were sent to each manufacturer of ice cream, and a set of rules setting forth what the board required under the regulations was formulated.

In all, the board and the inspector of milk and provisions made 186 inspections of bakeries during the year, with the result that conditions were appreciably improved, and one unsanitary bakeshop was abandoned. The number of market inspections was 702, and here as well many improvements were effected. It was found that regulations are of slight value in this kind of health work. Dependence must be placed in frequent inspections, the number of these was increased as compared with the previous year, and an effort will be made to increase the number still further in 1916.

MEDICAL SCHOOL INSPECTION.

Early in the year a committee representing the board conferred with a committee representing the school committee and drafted rules governing medical school inspection. These rules, we believe, have worked well. With them, as we have stated, we published suggestions to teachers to enable them, the more efficiently to perfect medical inspection of school children by recognizing symptoms of diseases which call for the attention of the physician or nurse.

OPHTHALMIA NEONATORUM.

Up to 1915, the practice of the board has been to have cases of ophthalmia neonatorum and bad eyes in infants treated by oculists whose services were engaged as needed at a flat charge of two dollars a visit. There was paid to oculists in 1914 the sum of \$5,311.87 for 2,655 visits. The board last February concluded that a saving to the city could be effected by supplying an oculist at a fixed annual compensation in return for which he was to perform all services required of him. The compensation was fixed at \$2,000. Up to January 1 he had made 1,969 visits, which under the old system would have cost \$3,938, a saving of \$1,938.

PLUMBING ORDINANCE.

The plumbing ordinance drafted by the board in 1914 and sent to the city council was referred back to the board in February for a conference with the master and journeymen plumbers. At this conference a few minor changes were agreed upon, and the ordinance was enacted to go into effect the first of July.

A CLEAN CITY.

In the early spring complaints were received of the condition of the public dumps which, it was alleged, constituted a nuisance. With the idea of remedying conditions, and of making the streets, lanes and yards in the city cleaner, a conference was called with the Superintendent of Streets, the Chief of Police and the Chief of the Fire Department. The result was an improvement in conditions at the dumps, and, at the suggestion of the board, the cleaning of the streets in the centre of the city early Sunday morning, the Superintendent of Streets co-operating to that end. What was particularly desired was the active co-operation of the police in the abatement of minor nuisances. The chief promised his assistance along this line, and the police have on many occasions rendered valuable service. We feel, though, that more can be done in this direction, and that the police department can without neglect of its other duties enforce health ordinances and regulations to the improvement of sanitary conditions in the city.

BABY WELFARE WORK.

The infant death rate, which has long been a source of concern to the health department, was lower in 1915 than in 1914. At least, the total number of deaths of children under one year of age was materially reduced and was the smallest in many years despite the increase in population. Incomplete birth returns make it impossible to figure the infant mortality rate, but we have reason to believe that that

has also been reduced. Even so, the number of babies dying from preventable causes is high, and the problem of infant mortality demands the best efforts of the department and the community.

It is difficult to determine how this problem can most effectively be attacked. The system of milk supervision, we believe, and the milk stations maintained in the summer by the New Bedford Instructive Nursing Association, safeguard the milk supply upon which so many babies are dependent. There is no relaxation in the effort to maintain good general sanitary conditions. Housing is probably a factor, and here something may be accomplished under the statute which gives the board a better control of tenement houses. It is gratifying to note that the efforts of the department and of other agencies have resulted in reducing the number of infant deaths each year since 1911.

During the past year, a corps of investigators working under the direction of the federal government made a survey of the deaths of infants in this city for the year 1913. The findings of these investigators may, when they are published, shed some light on the factors which contribute to making New Bedford's infant death rate higher than that of most cities in the state. Meanwhile, it seems probable that these factors include improper feeding and unfavorable prenatal conditions. The care of the baby must begin before it is born if it is to have a fair chance in the world. If feeding after the baby comes is important, so are the precautions which the mother should observe before it comes, for her own sake as well as for the baby's. How far the industrial conditions, under which women are employed in the cotton factories, in many cases up to within a few days of confinement, affect the infant death rate, we have no means of knowing, but they are undoubtedly a factor of importance.

If our conclusions are correct, our main reliance must be placed in educational work. Mothers must be instructed in the care of the baby both before and after it is born. The

physician can contribute to this, but as doctors are often not called except at child-birth, and sometimes not even then, other ways of reaching the mothers must be tried. The obvious ways are through printed instructions and public nurses, and of these the latter are by far the more helpful.

For some time the board has been sending to each family from which a birth is reported a brief circular printed in English and foreign languages, explaining how the baby should be cared for. Much excellent work has been done by the Instructive Nursing Association, whose nurses have in many cases visited mothers of the newly-born, and have instructed them in the proper care and feeding of the babies. Some attention is also being given by the district and the department nurses to women who expect to be confined. Copies of the book entitled "The Baby and You," furnished by the Division of Hygiene of the State Department of Health, are being placed in the hands of prospective mothers, while the nurses personally explain the instructions therein given. Special attention will be paid the coming year to this sort of prenatal work.

The problem of infant mortality is a community problem, and the community should unite in this as in other phases of public health work. The complete birth returns, when they are available, will furnish the basis for a useful classification of the baby deaths as to nationality and residential districts. In the meantime the promotion of the Baby Welfare work offers a splendid opportunity for public service to the fraternal, religious and philanthropic organizations of the city.

Board of Health.

REPORT OF AGENT AND EXECUTIVE OFFICER.

NEW BEDFORD, JANUARY 1, 1916.

To the Board of Health:

GENTLEMEN:—The statistical record of the work performed in this department under my supervision is herewith appended.

The value of the services of the nurses connected with the department is more apparent with each year, and as the State Department of Health has relieved the local board from the care of all forms of tuberculosis, other than pulmonary and laryngeal, more attention can be given to the follow-up work of cases discharged from the various sanatoria. Mrs. Chace, who has charge of this work, has rendered valuable aid in many homes. In addition to these visits to sufferers from tuberculosis, she has made 2,331 visits to the homes of the newly born, where midwives have officiated. The following table gives the detail of this work:

	No. of Births.	Reported by Midwives.	Visits by Nurse.	Reports of Ophth. Neon.	Reports of Sup. Conj.
January	276	73	170	4	2
February	271	76	214	7	6

MILK SUPERVISION.

During the year there were made 408 inspections of dairy farms, supplying this city with milk. This work was accomplished with Dr. H. B. Hamilton, milk inspector. With but

few exceptions milk rooms and cow stables were found to be in good condition. As I have stated in previous reports there are always some producers who need continual watching, and the sooner such dairies are stricken from the list the better it will be for the inhabitants of New Bedford. It is gratifying to report that a number of the principal dealers are now pasteurizing the milk distributed by them. In addition to the above inspections there were made 45 inspections of the sources of bad milk. The following table is self-explanatory:

	No. of Samples	Cans	Bottles	Duplicates	below 50,000 per CC	Above 200,000 per CC
January	63	15	48	7	54	5

SMALL POX.

Twenty-three cases of this disease developed in the south part of this city with ten deaths. This epidemic broke out in what is known as the Cape Verde Colony, the first case discovered being a woman in an advanced eruptive stage of the disease. She claimed to have been vaccinated eight years prior to this event, but there was no evidence of vaccination, and it is presumed that she had been treated but without success. She was found in a boarding house in one of the thickly settled sections on South Water street.

The next day after discovery, a similar case was found a short distance from the above location, and on this same day it developed that the parties had visited at a friend's house in the neighborhood, in which was found a man recovering from a mild type of the disease. It was impossible to trace the origin of the disease in this man, but all cases which developed later were directly traceable to this one mild case, the man having been successfully vaccinated thirteen years prior to his attack. The subsequent spread was due to various causes: concealment of cases, ignorance, carelessness and indifference—the last phase of the situation being very noticeable from the fact that these people insisted upon calling at each other's houses during the early stages of the disease and prior to the time of quarantine. It was only after the authorities had prevailed upon the pastors in charge of these people to impress upon them the necessity of keeping away from houses of friends until the epidemic was under control, that the authorities were able to check the spread, so inherent is the practice of neighborly calls by this class of people. The vigorous action of the board in locating, removing, quarantining, vaccinating and segregating the cases finally arrested the progress of the disease, but not until the fatalities were in excess of 43%.

The epidemic was of unusual violence as evidenced by the percentage of deaths noted. In most cases the type of the disease was confluent and of the twenty-three treated at the small-pox hospital four were of the haemorrhagic type. The case first treated, from which others contracted the disease, as stated, was mild, and the tenth case found was also of a mild form, this patient having been successfully vaccinated a few years prior to the attack. Complications in the majority of cases were not infrequent.

A serious phase of the epidemic, one which was not generally known rests in the fact that pupils in the Donaghy, Thomas A. Greene and Cedar Street Schools had been exposed to the disease and they were closely watched for the usual period, the School Inspectors of these schools giving

almost their whole time in supervising scholars daily in the rooms affected. Fortunately not a single case developed and this fact was undoubtedly due to recent vaccinations as the children under observation had but recently entered the public schools.

In addition to the school children mentioned above, 165 persons exposed to the disease were quarantined the usual period.

TUBERCULOSIS.

The financial year, ending November 30, 1915, gave us the highest record yet attained in the treatment of persons suffering with this disease, necessitating a large expenditure of money. In 1914 the expenditure was large, but the past year with its increased demands, brought the expenditures up to \$37,255.83, an increase of \$3,220.37. The fact that during the year 29 persons were discharged as arrested from the disease, should encourage the people of this city to keep on in the good work. The arresting of the disease in 29 persons is a record to be proud of, for it means that that number of persons were discharged as able to engage in some favorable occupation. Otherwise, if neglected, they would have become a continuous charge on the public funds.

During the year there were treated 278 cases, the New Bedford Sanatorium caring for 210 suffering with pulmonary tuberculosis. Treated at their respective homes were 74, 35 of whom were sent to the Sanatorium to complete treatment. Eighteen were given treatment at St. Luke's and Derby Hospitals, most of these cases being for other forms of the disease, while 16 so called State cases were removed to the State Infirmary at no expense to the city. The disposition of these cases, exception being made to State patients and those treated at St. Luke's and Derby Hospitals is as follows:

New Bedford Sanatorium.....	210
Tewkesbury	1
Lakeville	7
Westfield	1
North Reading.....	2
Treated at home.....	74

We began the financial year of 1916 on December 1st with 77 patients at the local institution, 24 at their homes, and one each in Westfield, Lakeville and the Acushnet Sanatorium.

The nativity of the patients treated last year follows:

New Bedford.....	71
United States.....	46
Canada	39
Azores	35
England	15
Cape de Verde.....	10
Poland	10
Ireland	9
Austria	8
Portugal	6
Italy	3
Prince Edward Island.....	2
Sweden	2
Germany	1
Russia	1
Scotland	1
Belgium	1
Wales	1
Brazil	1

The occupations of these patients are classified as follows:

Mill operatives.....	120
Housewives	29
School children.....	50
Laborers	10
Painters	5
Shoe workers.....	5
Carpenters	3
Salesmen	4
Grocery store.....	3
Teamers	3
Farm hands.....	2
U. S. R. R.....	2

ONE EACH.

Reporter	Clerk
Second girl	Steamfitter
Laundress	Linotype operator
Electrical worker	Dressmaker
Fireman	Theatrical manager
Cracker cutter	Stone cutter
Soap factory	Page boy in Library
Ship steward	Insurance agent
Drill cutter	Lumberman
Florist	Inspector cut glass
Bartender	Paper hanger
Solderer	Tailor

It will be noticed that the mill operatives were by far the greatest sufferers, and this fact should impress every textile worker in the community to the necessity of a stricter observance of the laws of hygiene. Too often the textile worker who is forced to take his noonday meal in the mills, prefers to linger within the walls of the mill after eating. If instead, the balance of the noon hour was utilized by walking in the open air, breathing in pure air, great good would result.

At different times during the year there have been long waiting lists for admission to the New Bedford Sanatorium. In some instances attempts were made to find places for the sick at the State Sanatoria, but the policy of the State Trustees of Hospitals for Consumptives forbids the admission of patients in the advanced stage of the disease. Not only do they refuse to take New Bedford cases of this type, but also cases which the Commonwealth is bound by law to support. By this action beds often times have been monopolized by strangers, while our own people, those who have a settlement here, have been forced to a long period of waiting and treatment at home. If this policy of the State Board is to continue, there must needs be a change in the local policy of treatment or increased facilities at the local institution.

Under the old law the New Bedford Board of Health declared Pulmonary Tuberculosis a dangerous disease and made it reportable. This action was taken November 1, 1905. For the two months of that year but few cases of Pulmonary Tuberculosis were reported—but the next succeeding year, 1906, the records show that 149 cases were reported with 124 deaths for that year.

Then under an amended law the State Board of Health was given authority to declare communicable diseases to be reported to the various Boards of Health in the Commonwealth, and among the diseases so declared was Tuberculosis. The record of cases reported and deaths (all forms) for each year since December 31, 1906, is as follows:

Year.	Cases Reported.	Deaths.
1907	139	133
1908	190	124
1909	205	122
1910	204	102
1911	208	129
1912	246	115
1913	342	157
1914	401	164
1915	476	164

When this city began its work of wiping out the "Great White Plague" the outlay was not very large, but there has been a steady increase since that beginning, which was in 1909. During the seven years ending November 30, 1915, there were treated from the public funds of New Bedford 1,239 cases at an outlay of \$148,932.52. Quite a sum when you stop to consider the matter. Prior to this work, say during the year 1908, the expenditures in the Health Department were \$42,691.91, and since then there has been a steady increase year by year, largely due to this most commendable work, which should have the encouragement of every thoughtful citizen. The expenditures for the seven years mentioned above are as follows:

1909	\$50,332.80
1910	60,436.09
1911	67,977.75
1912	81,288.99
1913	97,806.55
1914	101,518.59
1915	111,460.62

Of the above the following amounts were expended for the care and maintenance of persons suffering with tuberculosis:

Year.	No. of Cases.	Expenditures.
1909	81	\$8,000.00
1910	157	10,000.00
1911	137	12,855.76
1912	153	23,468.57
1913	196	23,140.30
1914	237	34,212.06
1915	278	37,255.83

The first payment to the city under the subsidy act for the care of persons suffering with tuberculosis was in 1913,

and the amount has increased with each year since. The total amount received from all sources in the care of tuberculosis patients since 1908 is \$31,430.18, of which sum \$18,390.09 was paid under the subsidy act.

OTHER CONTAGIOUS DISEASES.

During the year this department was called upon to treat many cases of so called children's diseases, which came to us from the physicians of the Poor Department. At the Isolation Hospital we treated during the year, 10 cases of Scarlet Fever and nine cases of Diphtheria, the Scarlet Fever ward being opened 23 weeks, and the Diphtheria ward 16 weeks.

In addition to the regular investigations made by the Medical Inspector there have been made by me 641 investigations of communicable diseases, most of which were in the nature of visits to persons suffering with pulmonary tuberculosis, who needed material aid.

The following tables give the records of communicable diseases together with deaths for the same, covering the year 1915, together with the last nine years.

CASES AND DEATHS BY MONTHS.

OPHTHALMIA NEONATORUM.

For the year ending December 31, 1915, there were reported 291 cases of bad eyes in infants, a falling off in the number for 1914. The policy of employing an oculist permanently has proven a step in the right direction. Where necessary the services of a trained nurse were employed. In this connection I desire to say that Mrs. Edward L. Murphy, who has been employed on these cases, has performed excellent service, having made during the year 834 visits.

INFANT MORTALITY.

There has been a gradual falling off in the deaths of children under one year of age since 1906, the mortality for the year ending December 31, 1915 being the smallest since the date mentioned above. During the past twelve months, with an increased population, the number of deaths was 495, which is the lowest figure since 1906, when was begun a supervision of the city's milk supply by the enactment of regulations governing the same. The following record for the last nine years will be read with interest:

Year.	Deaths.
1907	535
1908	509
1909	543
1910	689
1911	589
1912	552
1913	536
1914	534
1915	495

The nativity of the parents of children who have died under one year of age is as follows:

Portuguese	243
French	90
American	74
English	23
Austrian	14
Irish	13
Russian	9
Italian	7
Polish ..	6

MEDICAL SCHOOL INSPECTION.

The work in this department has been carried on since the new school year in a more systematic manner than formerly, rules governing the conduct of physicians, nurses and teachers, having been adopted by the Health and School departments jointly, the same printed in booklet form and distributed to all concerned.

The following are the number of cases of communicable diseases which have been found in the public and parochial schools since 1909:

	Scarlet Fever	Diphth- theria	Mumps	Measles	Vari- cella	Whoop- ing Cough	Tuber- culosis	German Measles
1910..	7	0	17	7	8	2	3	0
1911..	12	1	8	5	43	45	2	2
1912..	19	0	98	88	16	8	4	25
1913..	25	2	79	66	29	30	1	0
1914..	28	0	0	4	58	12	1	0
1915*..	8	6	32	163	22	19	1	0

*In addition, pupils in three schools kept under close observation because of exposure from smallpox.

Right here it might be said that Miss Catherine F. Lowney, the department nurse for the parochial schools, has given valuable assistance in this feature of the work, her visits to the homes of pupils being most beneficial.

EXPENDITURES—CONTAGIOUS DISEASES.

The expenditure for contagious disease during the year is summed up as follows, and was the largest in the history of the city:

Tuberculosis:

New Bedford Sanatorium..	\$30,729.45
Other Sanatoria.....	1,573.27
St. Luke's Hospital.....	1,348.29
Derby Hospital.....	72.80
Paid other cities.....	1,218.84
Treated at home.....	3,532.02
Court judgment.....	1,221.54

Contagious Diseases:

Smallpox	7,979.25
Ophthalmia Neon.....	3,846.99
Isolation Hospital.....	4,606.77
Paid other cities.....	1,236.87
St. Luke's Hospital.....	1,497.44
Derby Hospital.....	203.39
Treated at home.....	319.24

\$59,385.16

REIMBURSEMENTS—CONTAGIOUS DISEASES.

The amounts which should be credited to the department, due the City of New Bedford, are as follows:

Subsidy	\$9,074.26
Commonwealth of Mass.....	4,957.36
Cities and Towns.....	1,471.99
Other sources.....	419.24

\$15,922.85

The following table gives the expenditures on account of contagious diseases for the last six years:

1910	\$13,000.00
1911	17,580.80
1912	33,306.31
1913	41,874.58
1914	46,606.79
1915	59,385.16

The following is a monthly record of the work performed during the year:

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Contagious diseases investigated....	47	43	51	53	49	54	69	58	45	50	69	53
Houses placarded.....	22	20	33	25	8	20	5	7	15	24	25	34

MEDICAL INSPECTOR'S REPORT.

NEW BEDFORD, JANUARY 1, 1916.

To the Board of Health:

GENTLEMEN:—I herewith submit the following report as Medical Inspector and as attending physician for contagious cases for the board for the year ending January 1st. 1916.

Released 120 cases Scarlet Fever.

Took 139 cultures for Diphtheria.

Diagnosed 179 cases of Tuberculosis.

Investigated the following cases:

Typhoid	104
Measles	45
Whooping Cough.....	15
Smallpox	30
T. B. Meningitis.....	1
Varicella	2
Urticaria	2
C. S. Meningitis.....	2
Anterior Poliomyelites.....	3
Pityriasis rosea.....	2
Myocarditis	1

Vaccinated 165 persons exposed to Small-pox and nine exposed to Typhoid Infection.

Treated 47 cases of Tuberculosis; 7 of Scarlet Fever; 9 of Diphtheria; 10 of Measles; 9 of Whooping Cough. Also signed 30 death certificates.

Respectfully submitted,

A. N. SENESAC,
Medical Inspector.

REPORT OF OCULIST.

NEW BEDFORD, JANUARY 1, 1916.

To the Board of Health:

GENTLEMEN:—In submitting my annual report of the work performed by me as oculist to the Board, I desire to say that I began my duties March 1, 1915, and for the ten months ending December 31, 1915, I made nineteen hundred and sixty-nine (1969) visits to infants suffering with sore eyes, as required by law, and it is my pleasure to add that in no instance was the vision of a child impaired.

Respectfully submitted,

ALPHONSE NORMANDIN.

Oculist.

REPORT OF INSPECTOR OF MILK AND PROVISIONS.

NEW BEDFORD, JANUARY 1, 1916.

To the Board of Health:

GENTLEMEN:—I herewith submit my report as Inspector of Milk and Provisions for the year 1915. During the year I have issued 155 team licenses and 276 store licenses for the sale of milk and 6 team licenses and 31 store licenses for the sale of oleomargarine, making a total of 468 for which the regular fee of 50c. each has been collected and paid to the City Treasurer. In company with Agent Kirschbaum I have made 408 inspections of dairy farms and also traced source and cause of 45 samples of bad milk. The stores where milk is sold have all been inspected and instructions given, when necessary, as to the proper care and handling of same.

The ice cream plants have all been under inspection during the season with reference to their sanitary condition and their various formulas for making cream. A few who were using artificial flavoring, including the hokey pokey people, gave up the business rather than meet the requirements which were in the interests of health. Samples were taken from each manufacturer and analyzed to ascertain the per cent. of butterfat. With very few exceptions they were above the standard and the few whose product was below very willingly added the necessary cream to comply with the law. There have been 702 market inspections made, the larger part of which have been made among the markets where inspection is most needed and a great deal of progress has been made along the line of neatness and cleanliness. There have also been many improvements in the bake shops, one baker having abandoned an unsanitary shop and built an up-to-date plant. Several others have put in new floors, plastered walls and ceiling and made various other improvements, such as changing toilets so that they would not open into workrooms, in fact, in most every case when improvements have been asked for in the interests of cleanliness and better sanitary conditions the owners have been willing to carry out the suggestions.

Respectfully submitted,

H. B. HAMILTON,
Inspector.

NURSE'S REPORT.

NEW BEDFORD, JANUARY 1, 1916.

To the Board of Health:

GENTLEMEN:—I herewith submit my report for the year ending December 31, 1915. During the year I have made 4,137 calls, 2,331 of which were upon the newly born reported to this department by physicians and midwives; the balance of visits being made upon persons suffering with tuberculosis. In several instances among the last named, the persons afflicted suffered with infected bones, which required frequent dressing and close attention.

Respectfully submitted,

SARA W. CHACE, R. N.

REPORT OF NURSE FOR THE PAROCHIAL SCHOOLS.

NEW BEDFORD, JANUARY 1, 1916.

To the Board of Health:

GENTLEMEN:—I herewith submit my report for the year ending December 31, 1915. In addition to the regular inspections in the Parochial schools, I have, during the year, made 592 visits to the homes of pupils, besides investigating other cases in connection with this work.

Respectfully submitted,

CATHERINE W. LOWNEY.

REPORT OF BACTERIOLOGIST.

NEW BEDFORD, JANUARY 1, 1916.

To the Board of Health:

GENTLEMEN:—I herewith submit my report of the year ending December 31, 1915:

Diphtheria—	
Whole number of cultures taken.....	348
Whole number of cultures positive.....	77
Whole number of cultures negative.....	271
Whole number of first cultures positive.....	100
Whole number of first cultures negative.....	153
Tuberculosis Pul.—	
Whole number of specimens examined.....	256
Whole number of specimens positive.....	70
Whole number of specimens negative.....	172
Whole number of specimens unsatisfactory....	14
Tuberculosis Pul. cases examined from the New Bedford Sanatorium:	
Whole number of specimens examined.....	278
Whole number of specimens positive.....	105
Whole number of specimens negative.....	173
Typhoid Fever—	
Whole number Widal Test.....	10
Whole number positive	4
Whole number negative	6

Respectfully submitted,

A. H. MANDELL, M. D.,

*Bacteriologist.***REPORT OF INSPECTOR OF SLAUGHTERING.**

NEW BEDFORD, JANUARY 1, 1916.

To the Board of Health:

GENTLEMEN:—I herewith submit my report as Inspector of Slaughtering for the year ending December 31, 1915:

Number of Beef Cattle slaughtered..	163
Number of Swine slaughtered.....	471
Number of Calves slaughtered.....	340
Number of Sheep slaughtered.....	35

There were 14 beef cattle and 7 calves condemned as unfit for food. The pigs and sheep all passed inspection.

Respectfully submitted,

H. B. HAMILTON,

Inspector of Slaughtering.

PLUMBING INSPECTORS' REPORTS.

NEW BEDFORD, JANUARY 1, 1916.

To the Board of Health:

GENTLEMEN:—Following is the work performed by me for the year ending December 31, 1915:

Inspections, including investigations of nuisances and defective plumbing	2224
Inspections in Marion	2

Respectfully submitted,

LOUIS H. RICHARDSON,
Inspector of Plumbing.

NEW BEDFORD, JANUARY 1, 1916.

ANNUAL REPORT

OF THE

Inspector of Animals

From April 1st to December 31st

1915

Report of Inspector of Animals.

January 1st, 1916.

To the Mayor and Board of Aldermen:

My report as inspector of animals for the City of New Bedford from April 1st, 1915 to December 31st, 1915 is herewith submitted. There have been during that time eight cases of glanders in horses and three cases of tuberculosis in cows disposed of, the carcasses of same rendered and the premises where these animals were found were thoroughly cleansed and disinfected as were also the shops where the horses were shod. All horses brought into the city from New York and Rhode Island have been examined and a report made to the Commissioner of Animal Industry by whom all the duties of this office are assigned and to whom reports are made on each assignment immediately on its completion. The principal duties of this office viz. the examination of all neat cattle, sheep and swine and reporting as to their health and stable conditions has not yet been ordered but will probably come in January and February the account of which will be embodied in a later report.

Respectfully submitted,

H. B. HAMILTON,
Inspector of Animals.

Annual Report

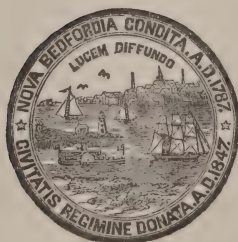

OF THE

Inspector of Wires

OF THE

City of New Bedford, Mass.

For the Year 1915

NEW BEDFORD
THE A. E. COFFIN PRESS, PRINTERS
1916

ANNUAL REPORT.

New Bedford, February 9, 1916.

*To His Honor, the Mayor, and the City Council of the City
of New Bedford.*

Sirs:

I respectfully submit my annual report of this department from December 7, 1914, to December 5, 1915.

INSPECTION OF INSIDE WIRING.

During the year have inspected 1,800 installations, making 6,480 inspections.

Have issued to the N. B. Gas & Edison Lt. Co. 1,992 permits to connect electric service.

Sent out to contractors and property owners 2,056 reports on defective wiring.

REMOVAL OF OVERHEAD WIRES AND CONSTRUCTION.

On January 22, 1915, after several meetings of the Inspector of Wires, City Engineer and Superintendent of Streets, the following letter was sent to the Mayor and Board of Aldermen:

To His Honor the Mayor and Board of Aldermen.

Gentlemen:

In compliance with Section 3 of Chapter 335, Acts of 1914, as follows:

The Inspector of Wires, City Engineer and Superintendent of Streets shall, annually, in the month of January, present to the Mayor and Board of Aldermen a list of public ways and places specified in section two, or parts thereof, from which, in their judgment, the overhead wires and construction shall be removed in accordance with the provisions of this Act.

We herewith present to you the following list:

School St. Purchase to Sixth, 460 ft.; Spring St., Purchase to Sixth, 465 ft.; Pleasant St., School to Spring, 223 ft.; Sixth St., School to Spring, 225 ft.; Sixth St., Mechanics Lane to Elm, 140 ft.; and Elm to Middle, 180 ft.; Pleasant St., Elm to High, 390 ft.; Elm St., Purchase to County, 1180 ft.; Middle St., Purchase to County, 1170 ft.; William St., County to Sixth, 740 ft. Total, 5173 feet.

On February 10, 1915, after a hearing, the following order was sent to the several wire-using companies as follows:

City of New Bedford.

In Board of Aldermen,

February 10, 1915.

Whereas, Under the provisions of Chapter 335 of the Acts of 1914, due notice has been given, and a hearing has been held by this Board; it is hereby

Ordered, That all telegraph, telephone, electric light, electric motor or power, and all other wires, cables and conductors, in and above the hereinafter designated street, and all poles and structures in said streets used for the support of the same, excepting such structures, poles, cables, wires and conductors as are excepted by said Chapter 335, Acts of 1914, shall be removed, within the time named in said chapter, or that said wires, cables or conductors shall be placed, maintained and operated in underground conduits.

Locations for said underground conduits shall be petitioned for in accordance with the provisions of Chapter 509, Acts of 1911, and all acts in addition thereto or in amendment thereof.

The streets or parts of streets designated and affected by this order are as follows, to wit:—

School Street, Purchase to Sixth.....	460 feet;
Spring Street, Purchase to Sixth.....	465 feet;
Pleasant Street, School to Spring....	223 feet;
Sixth Street, School to Spring.....	225 feet;
Sixth Street, Mechanics Lane to Elm..	140 feet;
Sixth Street, Elm to Middle.....	180 feet;
Pleasant Street, Elm to High.....	390 feet;
Elm Street, Purchase to County.....	1180 feet;
Middle Street, Purchase to County...	1170 feet;
William Street, County to Sixth.....	740 feet;

Total 5173 feet.

And the City Clerk is hereby directed to serve notice of the adoption of this order upon the owners of all wires, cables or conductors, in and above said streets, and all poles and structures in said streets used for the support of the same, by mailing to each of said owners, by U. S. registered letter mail, an attested copy of this order.

And the City Clerk is hereby further directed to cause this order to be recorded in the Book of Location Order Records, as provided in Chapter 509, Acts of 1911, and to furnish a copy of this order to the Inspector of Wires, the City Engineer and the Superintendent of Streets of the City of New Bedford.

In BOARD OF ALDERMEN, Feb. 10, 1915.

Adopted and ordered recorded in Book of Location Order Records.

A true copy. Attest: W. H. B. REMINGTON,
City Clerk.

I hereby certify that the foregoing order was adopted at a meeting of the Mayor and Aldermen of the City of New Bedford, Mass., held on the tenth day of February, 1915.

Attest: W. H. B. REMINGTON,
City Clerk.

Received and entered in the records of Location Orders of the City of New Bedford, Mass., Book 5, Page 200.

Attest: W. H. B. REMINGTON,
City Clerk.

I hereby certify that on Wednesday, the tenth day of February, 1915, at eight o'clock P. M., at Room 309, Municipal Building, a public hearing was held on the order herewith recorded, and that public notice thereof was given, according to law, and that thereupon said order was adopted.

Attest: W. H. B. REMINGTON,
City Clerk.

A true copy of order and certificate recorded in Book of Location Order Records, City of New Bedford, Mass., Libro 5, Folio 200.

Attest: W. H. B. REMINGTON,
City Clerk.

OUTSIDE WORK.

Petitions of the Automatic Telephone Co. asked for 240 feet of conduit and 3 manholes.

Petitions of the N. B. Gas & Edison Light Co. asked for 9,100 feet of conduit and 14 manholes.

Petitions of the Southern Mass. Telephone Co. asked for 5,286 feet of conduit and 7 manholes.

Summary of poles as follows:

New locations.....	264 poles
Joint locations.....	424 poles
Attachment of wires of one company to poles owned by another.....	349 poles
	1037 poles

Of the 424 joint locations, there were already installed 395, therefore making 29 new additional poles.

There were 293 new poles set in streets during the year.

During the year I have investigated and reported to the Mayor and Board of Aldermen on 322 petitions of wire using companies, involving 1,037 poles, 14,626 feet of conduit and 24 manholes.

POLICE SIGNAL SYSTEM.

The system when put under this department on December 7, 1915, was in poor condition, not at all dependable, due to the bad condition of central apparatus, police boxes, line and underground cable. The boxes have been overhauled and put in order. Much work has been done on the overhead lines and the underground cables; the most serious trouble with cable was the joints, these having been made up with tape. These have been replaced by proper lead sleeve joints. I have on hand ten thousand feet of lead cable and ten miles of overhead iron wire, so that this year much more can be done on the line and cable work.

Very truly yours,

WILLIAM P. BRIGGS,
Inspector of Wires.

CITY OF NEW BEDFORD.

IN BOARD OF ALDERMEN,

February 10, 1916.

Received, ordered printed in the City Documents
and sent down for concurrence.

W. H. B. REMINGTON,

City Clerk.

IN COMMON COUNCIL,

February 10, 1916.

Concurred.

LILY F. DARCY,

Clerk pro tem.

TRUSTEES' REPORT.

To the Honorable, the City Council of the City of New Bedford, Mass.

The trustees present their sixty-fourth annual report to the City Council in the Report of the Librarian, which has been adopted by the Board.

Respectfully submitted,

BOARD OF TRUSTEES,

GEORGE H. TRIPP,

Clerk of the Board.

LIBRARIAN'S REPORT.

To the Board of Trustees of the Free Public Library.

At the dedication of our library building five years ago last December, in an address by Dr. Frank P. Hill, the Librarian of Brooklyn, N. Y., he said, "It is evident that the Public Library in New Bedford has had a normal and gradual growth. There have been no radical changes in either methods or management, the plan upon which the original work was inaugurated being practically identical with the present ideal of what a public library should be."

In presenting these annual reports to the Board of Trustees, the story of each year's progress and achievement is essentially along the path outlined sixty-five years ago when the library was established. During the past year, as in every year since we have moved into this building, there has been an increase not only in the circulation of books, but in the use of books. Noticeably during the past year every month shows a numerical gain over the corresponding month of the preceding year. From the open shelves in Ingraham Hall alone there was a gain of nearly one thousand for each month.

There have been few changes in the mechanical equipment of the library. The elevator has been repaired to conform to the requirements of the state police. A display case of ornate design and in harmony with the furniture of the Art Room has been installed in the upper corridor. This gives an opportunity for displaying in a dust proof case some of the choicer rarities in the library collection. There has also been purchased a revolving frame for showing prints. This is an attractive piece of furniture, and admirably adapted for its purpose.

To accommodate the greatly increasing demand for illustrative material for use in the schools, one of the study rooms has been filled with boxes and drawers in which are arranged systematically, pictures mounted and unmounted that can be used to illustrate almost any desired subject. In the report of the Art Librarian it will be noticed that several thousand such pictures have been mounted and added to the collection during the past year.

A satisfactory arrangement of the large number of pieces of sheet music, the gifts of various organizations and individuals, has been made by devoting the southeast study room to that purpose, where cabinets around the walls accommodate the sheets. There has been a noticeable increase in the additions to our music collection, and more interest has been shown in the books which we have on that subject.

The constantly increasing use of the lecture room is worth noticing. A tabulated list of all the events scheduled for that room will be given in an appendix, but it is worth while to note the large number of organizations which with more or less regularity have had their meetings in that room. Among these are the Horticultural Society, the Parliamentary Law Class of the Woman's Club, a class for the study of Current Events, Stamp Collector's Club, Committee for Work with the Blind, Equal Suffrage League; Medical Society, Astronomical Club, Teacher's Benefit Association, Young Men's Hebrew Association, St. John's Ambulance Fund, Smith College Club, Framingham Normal School Club, Charity Organization Class, New Bedford Peace Society, and the Forestry Association.

To formulate the rules regulating the use of the room, the Trustees at their meeting in December passed the following vote.

The use of the Lecture Room shall be granted for lectures or conferences on educational, artistic, literary and allied subjects without charge, provided that no tickets of admission or money shall be taken at the door. Admission to such meetings shall be entirely free.

Societies or clubs of similar aims, but of restricted membership may be granted the use of the Hall, but no tickets of admission or money shall be taken at the door, nor shall such meetings be advertised in the public press.

In all cases, application for the use of the Hall shall be made to the Librarian who shall have power to grant the privilege, subject to revision by the Committee on the Library.

[In granting the privilege to societies of restricted membership, it shall be understood that admission shall not be refused to any person who seeks entrance.]

The Lecture Course has proved popular. During the year there have been eighteen lectures given.

All were held in the High School Hall, with the exception of two in foreign languages which were given in our own lecture room. The two foreign lectures were given, one by Alberto Pecorini in Italian, and the other by Mrs. Euphrosyne Corinna Canoutas, in Greek. Accompanying the Italian lecture there was prepared by the library a card which was widely circulated among the Italian residents, calling attention to the opportunities offered by the library to citizens and residents of New Bedford of that nationality.

A unique entertainment was held in the lecture room last month, when a pianola concert for the blind was given which drew out a large attendance, and was much enjoyed.

As in previous years there have been numerous exhibits in the rotunda and the art room, mainly furnished by

the American Federation of Arts. A list of these will be given in an appendix. The most recent of these exhibits was the one on Household Decoration, which was supplemented by a printed list of books in the library on the same subject.

An exhibition of etchings is still continuing. This collection was loaned by the Chicago Society of Etchers.

Also during the month of December there was a Child Welfare Exhibit shown by the State Board of Health. This collection attracted attention and undoubtedly the result will be beneficial. The same exhibit will be later shown in the North and South ends of the city.

The Juvenile Room has followed its usual custom of making a special display of Christmas books, and in this connection printed lists have been circulated under the imprint of the library, giving titles of books for Christmas suitable for the children.

Among other publications of the year have been a list of stories and story-telling for juveniles and a list of dental books in the library, prepared by the Dental Society.

In order to increase the vital connection between the schools and the library, the Librarian and the Children's Librarian have at various times addressed classes and teachers, the director of the children's work especially having made many visits to the schools to give instruction to the higher grammar grades in the use of reference books, on the arrangement of books, on the use of the catalogue. This work has been well received by the schools and will unquestionably prove of mutual advantage.

By arrangement with the City Clerk, municipal reports received by his department are stored in the library, so that the library is accumulating, in addition to its extensive collection of United States government reports

and state reports, the municipal reports of many cities and towns. The municipal reference work continues and seems to be appreciated.

Work on the new bookplate, which has been authorized by your Board, has progressed favorably, and in all probability the completed design will await your approval at the next meeting.

Continuing the work started on the publication of marriages and deaths in the local papers, it has now been carried down to 1874, which will prove increasingly valuable to students of genealogy. The librarian of one of the most important antiquarian societies in the country, on a visit to New Bedford most highly commended the work, and stated that he was able to find material here that he had been searching for in vain for a long time.

The pleasant relations with other libraries continue, evidenced in part by the mutual interchange of books. We borrow very largely from the Boston Public Library, and from others when needed, and lend books very freely to other libraries in this vicinity, and sometimes at a distance. We have especially sent many collections of books to Wareham, Chatham, Vineyard Haven, Nantucket, etc.

It is perhaps not as well known as it should be that groups of individuals are given an opportunity of having collections of books which may be kept out for several months at a time, and which can be renewed at pleasure. Such collections have been sent to the schools, engine houses, the telephone exchange, and elsewhere. There are nearly 200 such deposits in various parts of the city. The library would be glad to supply such collections of books to any reliable persons, to department stores, factories, etc.

In May there was a new registration of borrowers made necessary by many of the card holders having changed their residences, or left the city. Such registrations seem to be necessary every few years to keep the list of active card holders up to date.

Owing to with the increase from one cent to two, in the daily fines for overdue books, there has been a large decrease in the number of overdue postals sent from the library.

The newspapers have given the library a good degree of publicity during the year, and they are always very ready to print interesting notices concerning library activities. The Standard has made special features in their Sunday editions of the lectures in our course, and has given extended and illustrated notices of the lectures and their subjects.

In the work of the Reference Department, the assistant in charge reports that in addition to answering requests for information from local inquirers, material has been furnished on all sorts of subjects to people from Barnstable, Chatham, Acushnet, Cotuit, Fairhaven, Falmouth, Hyannis Oak Bluffs, Vineyard Haven, Wareham, Wood's Hole, and other places.

She says, "The European war has furnished many subjects for essays and debates, and questions concerning armament and the financial resources of the warring countries, international law, etc., have been frequent."

An up to date map of Europe has hung in the Reference Room all the year, and has been studied by young and old alike. Two reproductions of old New England maps of 1680 and 1775 have attracted much attention and comment.

A list of books and papers of interest to the business men of the city was printed and distributed.

The question of publicity which has caused a good deal of comment in library circles has not been a disturbing feature in our library management. As the Reference Librarian has expressed it "We consider a well served patron our best advertisement".

The work with foreign readers has continued as formerly in increasing volume. Besides the minor languages which are represented by a few books, the citizens of New Bedford should understand that the library has very large collections of books in French, Portugese, Yiddish, German, and a reasonably large supply of books in Swedish, Greek, Arabic, and Polish.

The Director of the Art Room reports:-

"The customary work of this department has continued and increased during 1915, and considerable interest has been manifested in the various exhibitions. Much appreciation of the selection of new books has been expressed, many having been examined here which do not circulate frequently. Many places have drawn upon our collection of books and pictures.

The removal of the entire collection to one floor has facilitated our service, though with its constant growth [3426 pictures having been mounted last year] we are needing still more space.

The frequent request for open shelf space for the entire music collection continues, but foremost among the needs of the art department is lighting for the tables and book shelves."

The children's Librarian at the opening of school sent out a circular letter to be distributed among all the children in the rooms served by the school collections of books: probably from 6,000 to 7,000 of these circulars were distributed to the children to read and take home to their parents. These circulars outlined the opportunities offered

to the young, and in alluring form presented the treasures in store for the children on the shelves of their library. A copy of this letter is printed in an appendix. She writes "The Juvenile Room is conducted with a view to interesting and improving the children who frequent it, and both in that room and in the lists of books sent to the teachers suggestions of new titles are welcomed by the library, and such books are bought when possible."

When the available funds for the use of the library are sufficient, it would be desirable to have a Reference Librarian, absolutely under the control of the library but stationed at the High School, to act as an intermediary between the two institutions, and to assist in the reference work demanded by the higher grade pupils. This would not be intended to relieve in any way the work of the Reference Librarian, but would supplement her work greatly, increase its efficiency, and bring about a still closer relation between the High School students and the library which is supplied with the material constantly needed in their school work.

The work of the staff has been satisfactory, and they have shown enthusiasm and interest in their work. There has been an esprit de corps which is necessary for the best work, and I can give hearty commendation to their efforts.

The Librarian wishes to express to the members of the Board appreciation of the interest which they have always manifested in the general and detailed work of the library, and the interest they have shown by attendance on sub-committee meetings and the monthly meetings of the Board.

Respectfully submitted,

GEORGE H. TRIPP, *Librarian.*

REPORT OF THE JUVENILE ROOM

The activities of the Juvenile Department, such as the circulation of books through the Juvenile Room, the branches, the public schools, and Sunday Schools, have progressed as usual.

The important feature of the work this year has been the starting of classes for the purpose of instructing children in the use of the library. This has been made possible through the cordial co-operation of the superintendent of schools and the teachers. Pupils from the graduating classes in the grammar schools come with their teachers to the library where a laboratory lesson is given on the following topics:

1. Free Public Library--its meaning.
2. Arrangement of books.
3. Use of the catalogue.
4. Reference books. [Dictionary, encyclopedia, World almanac. magazine indexes, etc.]

The instruction is necessarily simple as the time given is only one hour. It does however, mark a step in the direction of helping the children to become intelligent users of the library.

In order to make the visit as practical as possible, each child is given a question to answer covering one of the points made in the lecture. The teachers have received the movement with enthusiasm and have helped materially in its success. One teacher gave her class a preliminary talk on the library and followed up the subject by giving the children topics to look up on their own responsibility.

The problem of the intermediate reader is making itself felt. The period of transition from the use of the Ju-

venile Room to that of the main library is a difficult one to adjust. We have attempted to solve the problem by placing on the open shelves in Ingraham Hall a collection of adult books suitable for young people.

Our annual exhibit of Christmas books for children was held this year in co-operation with the movement started by the Boy Scout organization for interesting people in purchasing better books for children. Attractive printed catalogues were distributed and in many instances the attendants in the Juvenile Room were able to help people in selecting good books. One of our local bookstores felt the results of our efforts to encourage the buying of better books, thus bringing to the front again a way in which the library may help the bookseller.

When the new sets of books were sent out to the schools in September, a letter was sent to every child in the rooms where there are class-room libraries for the purpose of emphasizing the source from which the books came. These letters were read in school and then taken home for the parents to read. The letters aroused much interest in the library among the children and many came to register. The children from one room answered the letter and their comments were very interesting.

Respectfully submitted,

JANE E. THUMAN.

Children's Librarian.

DEPARTMENT OF PUBLIC PARKS.

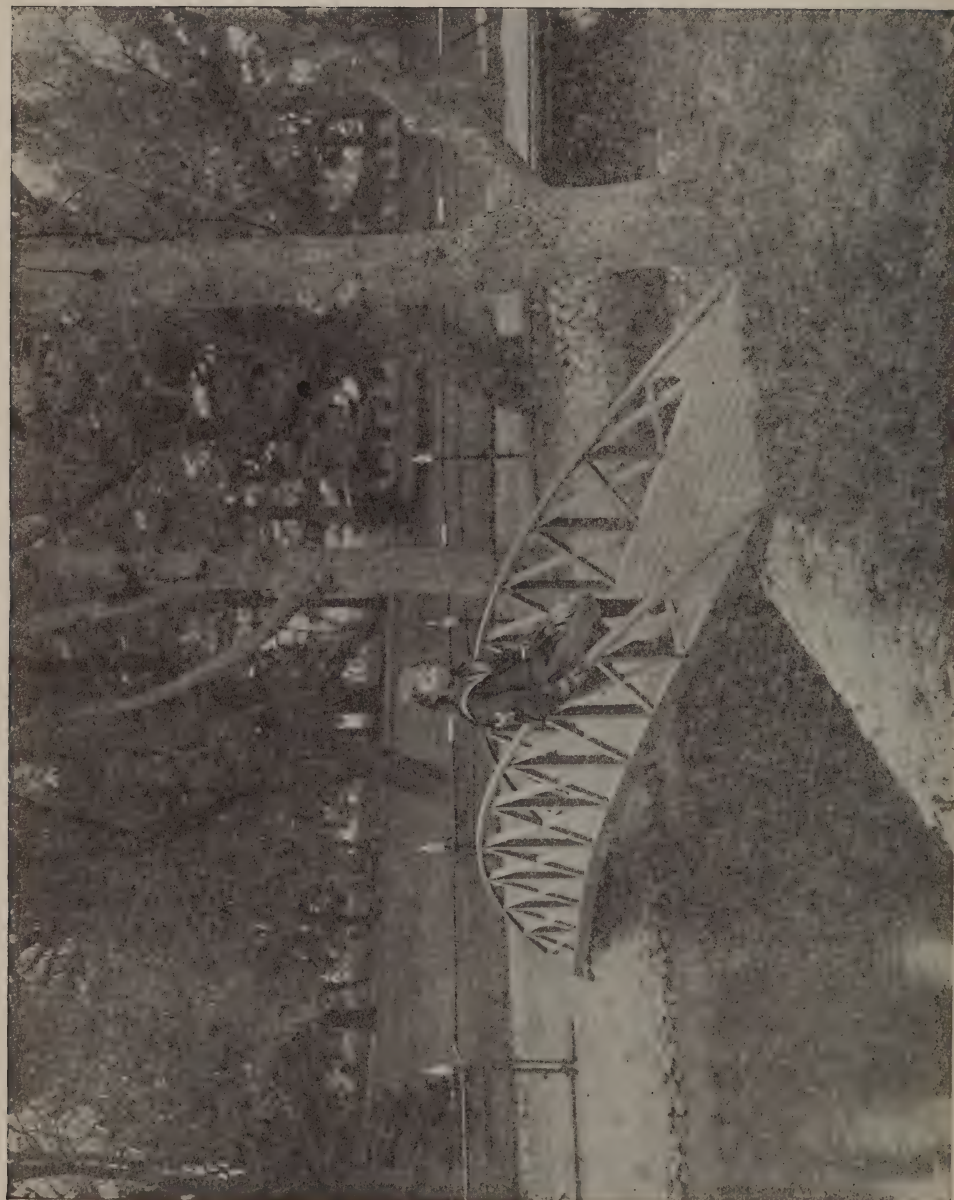

COMMISSIONERS' REPORT FOR 1915.

*To His Honor the Mayor and the City Council of New
Bedford:*

In accordance with the Revised Laws of the Commonwealth of Massachusetts, 1902, Chapter 28, Section 13, the title "Public Parks, Playgrounds, and Public Domain" the Park Commissioners of the City of New Bedford, respectfully submit their Annual Report.

BROOKLAWN PARK

CITY OF NEW BEDFORD.
OFFICE OF BOARD OF PARK COMMISSIONERS.

December 1, 1915.

To His Honor the Mayor and the City Council of New Bedford:

GENTLEMEN!—We have the honor in accordance with the requirements of the law and with the usual custom, of submitting to you the Annual Report of the Park Commissioners in relation to the maintenance, conditions, and requirements of the Department for the year 1915.

The financial report presents the condition of our resources as follows:—

Appropriation by the City Council \$30,000, leaving a balance of \$39.15. Of this amount \$20,692.05 was expended for labor, and \$9,268.80 for materials in maintenance of the parks. The work, care, and maintenance of the parks has been much the same as in former years, but little new work has been accomplished, yet the general condition of the parks show an annual improvement and with an appropriation commensurate with the necessities and requirements of the people who visit the parks and expect to find what the present up-to-date conditions of public parks should be, our City could well invite criticism. The appropriation of \$30,000.00 being the income of the Park Com-

mission, the public will readily understand the impossibility of making any great improvements, but can only maintain and keep in order that which they already have. The expenditures for improvements in proportion to the amount expended for maintenance is small and must continue to be so until larger amounts are allowed by the City Council for park purposes. Already our parks have done a surprising amount of practical work for the amusement and recreation of the public and are only waiting for the opportunity to do more and greater things and we can urge truthfully and with all our energy the benefit that would arise if the department had some comprehensive plan for the development of the future park system, under some such system this department would work with pleasure and satisfaction and the people would realize more conclusively the advantages they were receiving for their money and the greater practical results that would be sure to be evident from such a course. In the park department the growth and prosperity of the City is evident as much or more than any other department, and therefore we feel we can justly appeal to the City Council for adequate appropriations, and they fully realize the conditions under which we work to maintain and improve the parks entrusted to our care.

Among the most urgent needs and to which immediate attention should be given is a Shelter and Comfort building at Buttonwood Park containing toilet facilities, designed in a park like manner, with all modern conveniences.

The park and the portions of other parks set apart for games and athletic sports, have been in continual use during the season, and the efforts of the Board to answer all the demands satisfactory by accommodating all the clubs, and organizations wanting baseball diamonds, tennis courts, and space and room for other games and recreations, accommodations were insufficient to satisfactory answer all the requests made to them.

The laying of Brownell avenue on the west of Buttonwood Park would be a great reason for opening up for development the large tract of land west of the park. It will not be long before this entire section, which is now unimproved woodland, will be built up making a very desirable residential part of the City, therefore, it would seem good to complete the avenue, as it would improve the park and place within reach of people who would build at once and make a most desirable part of the City to live in. Small areas for park purposes should be provided and maintained in all the manufacturing parts of our City, so that the workmen may not after their day's work is over, be obliged to travel a long distance to reach a large park to enjoy the outdoor, health-giving, rest and recreation, which they are deprived of, by nature of their employment. After being shut up in a factory all day, they have no time or inclination to travel far to find that opportunity, but with small areas provided with seats or athletic apparatus in different parts of the City, they could find enjoyment there, rather than seeking it in places less conducive to the welfare of the city, their families or themselves.

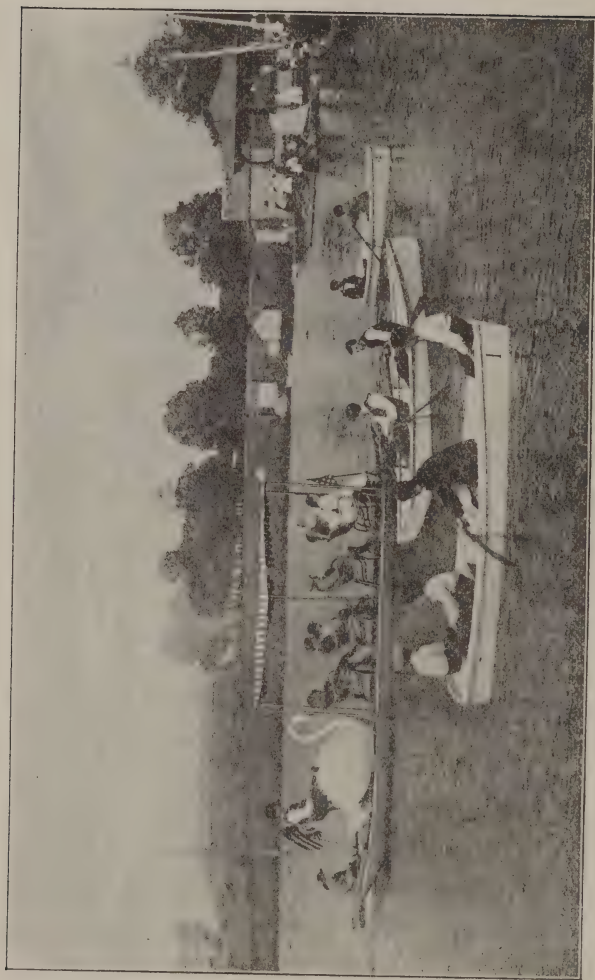

Among the many things that unquestionably are greatly to be desired especially by the younger portion of our community and we might add a considerable part of the older ones, is an addition of a considerable number of baseball diamonds, and tennis courts. The desire to play is so great and the demands for diamonds and courts so numerous and persistent that all sorts of rules and regulations are devised by the Commissioners to the exigencies, and the Board most earnestly hope that the time is not far distant when the arrangement of Buttonwood Park, laid out by Mr. Williams, Engineer, can be accomplished and the same might be said in a degree of Brooklawn Park, both parks having splendid vacant lots of which almost perfection might be attained.

PLANS BY WM. F. WILLIAMS.

CHAIRMAN AND BOARD OF PARK COMMISSIONERS, CITY OF
NEW BEDFORD.

GENTLEMEN:—At your request I have made a careful survey of the large recreation ground at Buttonwood Park and prepared the accompanying plan for draining and grading the same. I also submit for your consideration the following explanation of the plan and an estimate of the cost of performing the work required by the plan.

The area of the recreation ground as shown by the plan is 463,000 square feet or 10 acres and 100 rods. This includes all of the cleared land south of Court street and west of Rockdale avenue to the grove of pine trees. At present the general surface of this ground slopes to the south and west at a fairly uniform grade. The north and east half, being the highest, is comparatively dry during the summer months. The south and west portion of the field is wet and spongy during most of the year. There are also a great many small inequalities in the present surface that are very objectionable in a field for playing football, baseball, or tennis. The southern portion of the field has been recently cultivated and is not only quite rough but has little or no grass. The top soil of the entire field is rather shallow and the greater part underlain by a hard bed of fine sand and clay which is practically im-

BOATING — BUTTONWOOD PARK

pervious to the passage of water. As a result there is no natural under-drainage and the surface water is retained in the top soil until it dries out by evaporation. The field should first be thoroughly under-drained by constructing drains of porous land tile about 3 to 3½ feet below the finished surface of the ground. The location and size of these drains is shown on the plan. The general direction of the flow of this underground drainage will be southerly to a collecting drain running easterly in Arnold street to a brook which now crosses that street about 450 feet east of the park. The fall is sufficient to secure a good flow, and whenever the Grape street sewer is extended to this point the drain can be entered into it.

In estimating the cost of draining this field I have assumed that the work will be done by local labor without particular experience in laying tiles. I have no doubt, however, but what the work can be done by experienced tile layers for very much less than my estimate.

After the field is under-drained it should be graded to a uniform and smooth surface, sloping gradually to the south and crowning slightly from east to west, as shown by the red contour lines on the plan which fix the grade of the finished surface. This will require filling the low ground of the west half of the field, cutting off some of the high ground on the east and north portions of the field to secure the material. The cuts and fills have been carefully calculated to balance each other. If, however, good soil can be bought at a reasonable price I should prefer to reduce the amount of cutting on the high ground

and increase the filling on the low sections, to avoid removing so much of the good soil on the high land.

After the surface of the field has been brought approximately to the new grade a heavy coat of stable dressing should be spaded in, the surface carefully raked to the true cross section, all stones removed, and then sowed with grass seed and rolled.

The work of draining and grading this field can be carried on without interfering with the present use of the north part of the same and grading the south half of the field one year and the north half the next.

This will enable the new grass to get well started before the field is put into use, and it is the only method by which a smooth surface and a good sward can be secured.

This field will make a splendid recreation ground and when completed it will afford ample room to lay out four football fields or four baseball fields, or two of each, besides a number of tennis courts.

ESTIMATED COST.

Under drainage.....	\$3,150.00
Grading	3,500.00
Top dressing.....	500.00
Seeding	500.00
Total	\$7,650.00

Respectfully submitted,

WILLIAM F. WILLIAMS, City Engineer.

In the construction of baseball diamonds and tennis courts, the need of them as growing requirements for the pleasure and recreation of all communities where public parks are maintained cannot be gainsaid.

We have a most desirable city for all purposes, of a delightful residence, or a superior one for all manufacturing projects, and its parks today assist in making it a judicious investment for people to purchase and improve their property not only in proximity to the parks but throughout the City, therefore, there is seemingly great necessity that all the parks should be as rapidly improved as the financial condition of our city will allow.

The playground apparatus of the different parks has been found by experience to be used by the greatest number of children during the afternoon and early evening. The merry-go-round erected at the suggestion of Mr. Wirth, Superintendent of Parks, of Minneapolis, has proved to be a great entertainer for the children. It consists of a circular platform some twelve feet in diameter, the outer edge being used as a seat, and is provided with a platform by means of which the children can get on or off safely even when it is in motion. This platform rests upon ball bearings so that the slightest effort puts it in motion and enables it to run a long time, no motive power is required except that furnished by the children. We are in hopes that they can be installed in all the parks as soon as possible as they surely are a great contrivance for the pleasure of the little ones. The swings for the

smaller children have been a very pleasing source of amusement.

Requests for permission to use the ball grounds were during the season, being constantly received by various organizations who desired to play matched games on Saturday afternoons. The requests were granted when the use of the grounds had not been previously furnished to other parties. Every Saturday for several months when the weather was suitable some kind of games were being played, and at many of the games the attendance amounted to several thousands.

The subject of bathing, wading-pools, and water sports, has long occupied the attention of the Park Commissioners for it seemed that the splendid shore of Hazelwood Park would certainly offer ideal opportunities for the construction of bath houses and all the necessary requirements for superior accommodations, and facilities for safe and delightful bathing and swimming, would meet with the approval of a large majority of the visitors to this beautiful park and shore. The Commissioners are glad to learn that the City Council has taken the matter in hand. Committees of the government have been appointed to consider the matter and if considered feasible construct a modern bath house to answer satisfactory all the requirements of such an edifice, and they have sought the approval of the Legislature for permission to take land from the park for that purpose and the prospect is that another year may see the swimming problem solved

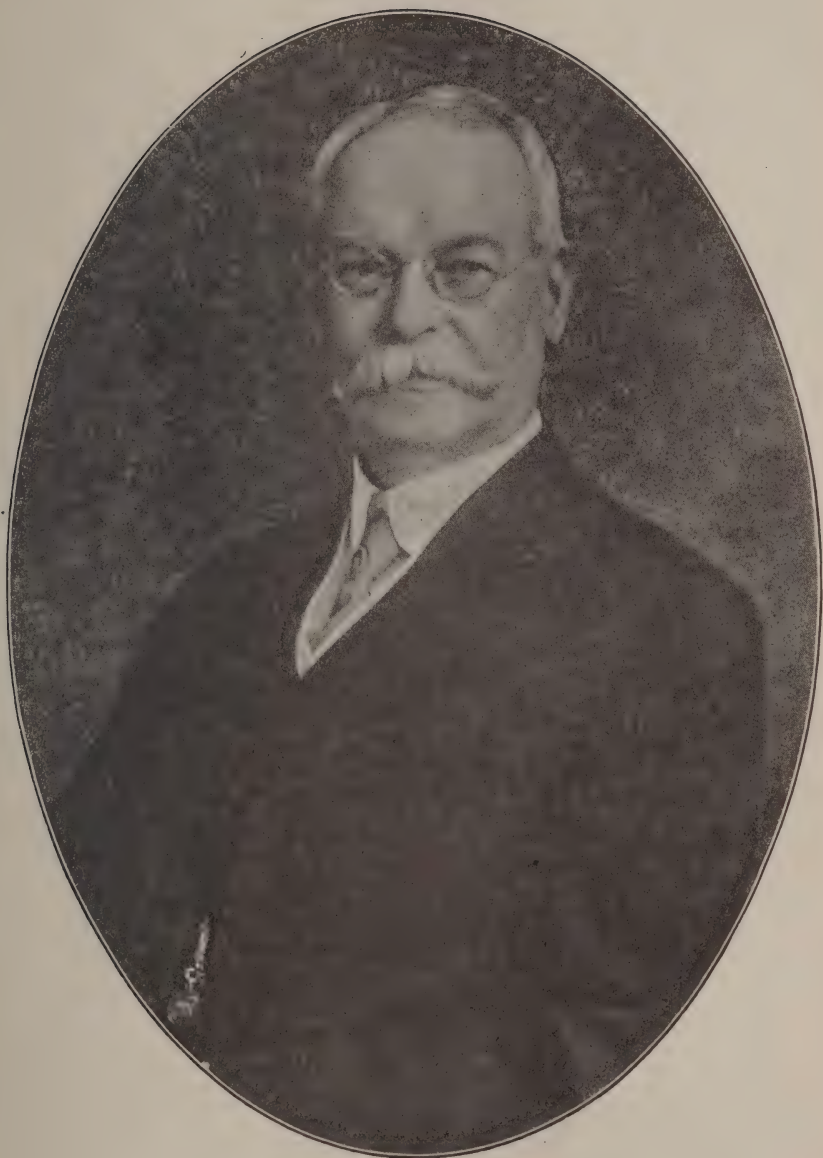

to the infinite delight of thousands of people who delight in salt-water sports.

We might go on extolling our parks and what they are capable of becoming, but what is most desirable now, is the financial ability to transform the incomplete and unattractive portions of them into complete park attractiveness. Although our city has certainly received a rapid growth, it does not follow that we should acquire an extension of park acres for when it becomes imperative to enlarge our park area, it will be so apparent that our citizens will readily acquiesce to the necessary expenditure.

The condition of parks has to some extent improved annually, some of them more than others.

A gratifying increase in the attendance at all the parks has from year to year been very noticeable, and it is apparent that the people are well satisfied with their park possessions and their management. Picnicing, baseball, tennis, and quoits, have been great attractions. The facilities for them should be enlarged and increased as the demands for them are annually increasing. Sunday afternoon concerts should be added to the attractions as when they were provided, they were well attended and enjoyed by thousands of people. A nearer street car approach to Buttonwood Park is greatly to be desired, though it does not prevent its use, it would greatly increase it.

The sad and unwelcome news of the death of Mr. George D. Barnard of St. Louis, Mo., who claimed New Bedford as his birthplace and whose youth and early manhood was passed in our midst and who commemorated the event by presenting to the city a beautiful monument representing the whaling industry to which our city owes so much of its success and progress, was received early in the summer, and it is with sorrow and regret that we have to chronicle the same in this report, for our City has certainly lost a devoted friend and a character whom New Bedford is proud to claim as a product of our City. In connection with this allusion to Mr. Barnard, we present from one of the daily papers the story of his life, and in the future as the multitudes of people who visit Buttonwood Park as they pass and gaze upon the beautiful monument, the name of the generous donor, George D. Barnard, will be active in their thoughts.

MR. GEORGE D. BARNARD

MR. GEORGE D. BARNARD.

George D. Barnard of St. Louis, a native of New Bedford and the donor of the \$50,000 monument at Buttonwood Park to commemorate New Bedford's development from a whaling town into the great manufacturing city it is today, died at his home yesterday from tuberculosis of the bladder. Mr. Barnard was 69 years old.

Mr. Barnard was born in this city in 1846. He spent his boyhood here and attended the public schools. He was employed in Parson's bindery on Union Street. Shortly after the Civil War ended he went west, and there rapidly rose to be head of the firm of George D. Barnard & Co., manufacturing stationers. In 1908 he founded the St. Louis Skin and Cancer Hospital, to which he gave \$200,000. He was one of the original committee of 200 in charge of the world's fair in St. Louis and was a former president of the Merchants' exchange of St. Louis. He was also interested in other St. Louis enterprises. In 1874 he married Mary L. Tindall of Alton, Ill. There are no children.

Mr. Barnard visited New Bedford last September when the monument at Buttonwood was dedicated.

Years before the government took upon its shoulders the enormous duty of collecting the mails, Mr. Barnard found it his duty each morning, as an employee of the New Bedford post-office, to collect the mail from several

boxes fixed in establishments about the center of the city. He was 14 years of age at the time and his office hours began at 6 o'clock in the morning in the sorting of mail. On the occasion of his visit here Mr. Barnard recalled the post-office incident as he was passing the corner of Middle and Pleasant Streets, and it was in a store at the corner that one of the boxes was located by Mr. Chapman, who was then postmaster.

"When I was a boy in the early 60's, there was a drug store over on that corner," said Mr. Barnard, indicating the northwest corner with a sweep of the hand. "Mr. Chapman was postmaster at the time, and he placed locked wooden boxes in that store, the Parker House, and one or two other places about town. On my way to the office each morning at 6 o'clock it was my duty to unlock the store and remove the mail, which I carried to the office to sort a few minutes later. This was years before the government took over the collecting of mails, so that whatever expense was involved in the system was defrayed by Mr. Chapman.

"Mr. Chapman provided me with a leather bag which I believe was identical with the leather bags now used by the letter carriers. At that time there were probably half a dozen employes at the office. For my work I received four dollars a week.

"Previous to and following my employment at the postoffice I worked for a stationer named Parsons, who had an establishment on Union street. Here was the place where I got a start in the business which I was to follow as a life undertaking, that of a stationer.

“My schooling was at the William street, Maxfield street, Bush street and later the Fifth street schools. At the William street school, Miss Avery was head teacher and here I remember well the time when I pushed my seatmate, Robert W. Taber, into the aisle, and got ‘licked’ for it. Mr. Hutchinson, father of the stationer, was principal of the Fifth Street School from which I graduated fifty-three years ago this coming November, to enter High School.

“I do not know whether it is a custom now, but in those days, as a newspaper carrier, I went to the depot every night to get the Boston papers. I had a regular route and many prominent people were among my customers. One of them was the Hon. Thomas Dawes Eliot, congressman from this district. Later, when I left New Bedford and finally settled in St. Louis, one of the first men that I met was Rev. William C. Eliot, brother of Congressman Eliot and pastor of the Unitarian Church.

“The City of New Bedford is honored with the fact that it was one of her native citizens who founded the free school system of the City of St. Louis. Rev. Eliot went from New Bedford to St. Louis when a young man and taught a class in the basement of his church, comprising the children of members of his congregation. Later he taught the children of others, and still later he made a visit through New England soliciting funds with which he was enabled to employ a teacher in Boston to accompany him to St. Louis to take over his duties in the school. The City then contributed and finally took over the school as one of its departments.”

Mr. Barnard said during his visit here that, although he has traveled extensively, particularly throughout the west, he had not seen any cities that have done better than New Bedford. He spoke of the comfortable home conditions in which he had found many of his acquaintances. He pointed out that there were a large number of buildings on Purchase Street that were standing when he was a boy and spoke of the street widening operations as "tremendous," but that the residents of the city would appreciate in years to come.

Determined to make a mark in that stationery business, young Barnard left this City for New York and later changed from New York to Chicago, where he entered the same business. From both New York and Chicago, he went on the road as salesman, although but 18 years of age. At the time of the Chicago fire, he was sent from Chicago to St. Louis to take charge of a branch establishment of the firm. This was in 1871, and since then he had been in business there.

The name of George D. Barnard was one that was widely known, far beyond prescribed craft lines, and was everywhere respected. Through business tact, in its moral application, and the observance of stern principles, Mr. Barnard has long been a successful man commercially, and by the inheritance and cultivation of higher ideals, he had always been socially prominent.

BARNARD MONUMENT — BUTTONWOOD PARK

The area of the City's Parks is as follows:

Buttonwood Park,	94 acres	75.02 sq. rds.
Brooklawn Park,	88 acres	82.45 sq. rds.
Hazelwood Park,	23 acres	8.39 sq. rds.
Water Front,	1 acre	121.94 sq. rds.
Ashley Park,	4 acres	51.39 sq. rds.
Common,	7 acres	32.00 sq. rds.
Bridge Approach,	1 acre	13.86 sq. rds.
Grove Park,		149.54 sq. rds.
Triangle Park,		25.87 sq. rds.
	221 acres	80.46 sq. rds.

Respectfully submitted,

SAMUEL P. RICHMOND, Chairman.

BROOKLAWN PARK

SUPERINTENDENT'S REPORT.

December 1, 1915.

To the Board of Park Commissioners:—

Gentlemen:—As required by law, I herewith present for your consideration my general report of the management of the department of parks for the past year, and while I do not think it absolutely necessary to make a detailed report on the expenditure for each park separately, yet I have added a tabulated account giving the exact amount that was expended for each park for its maintenance the past year and the average cost per acre. It will not differ much from former years.

Baseball diamonds are maintained on all the parks, also tennis courts and other games allowed on the lawns where it could be done without badly damaging the grounds. Saturdays and holidays it is impossible to accommodate all who desire to engage in the sport of the games as there is not sufficient area. Football fields are laid out and goal-posts erected, and everything done to facilitate and promote the desire for clean, sane and respectable sport by the park visitors. The following rules and regulations are posted conspicuously about the baseball diamonds and fields and enforced by the officers of the parks.

BASE BALL — BROOKLAWN PARK

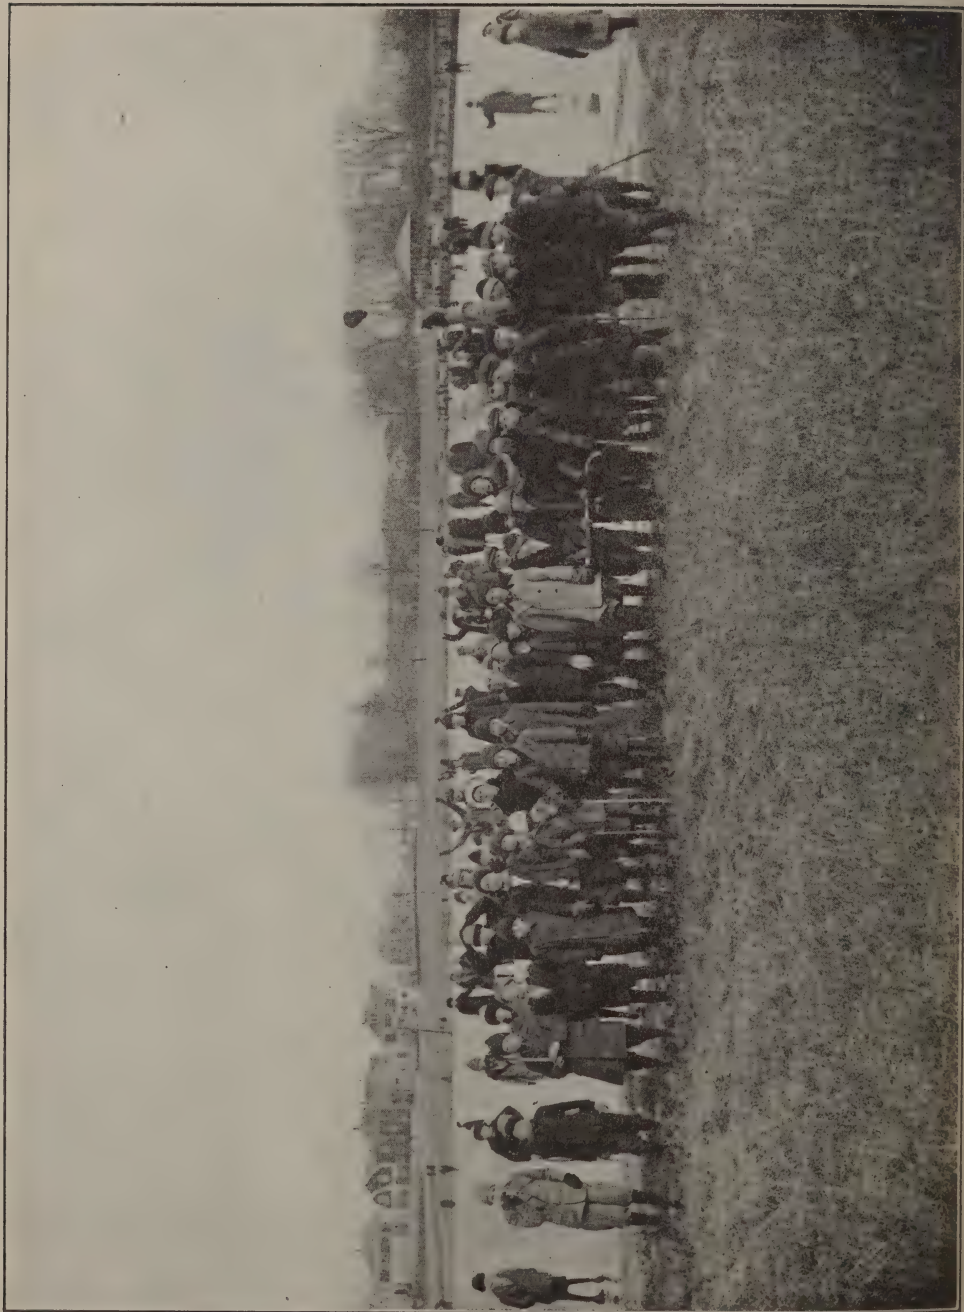

Rules Governing Baseball Games in Parks.

Teams on the ground ready to play at the allotted time, and who have received the proper permission, will be assigned their place. All parties wishing to engage the ball grounds in the parks must apply to the keeper of the park any time after 7 o'clock Monday morning for the use of the same the following week, and the diamond will be reserved one hour after the time scheduled for the game. If not occupied at that time, it will be assigned to any club that may be present. The park policeman will be in charge of the order of procedure and discipline of players and spectators.

Persistent wrangling between players or between players and umpire will be considered sufficient cause for instant dismissal from further use of the ball field.

Teams playing for a money stake or gambling on the game in any manner, will be refused the use of the ball field.

Advertising on uniforms or pennants or in any other way, will not be permitted. "Serub" practice and games will be permitted without written permit, but must give way instantly to holders of a regular permit.

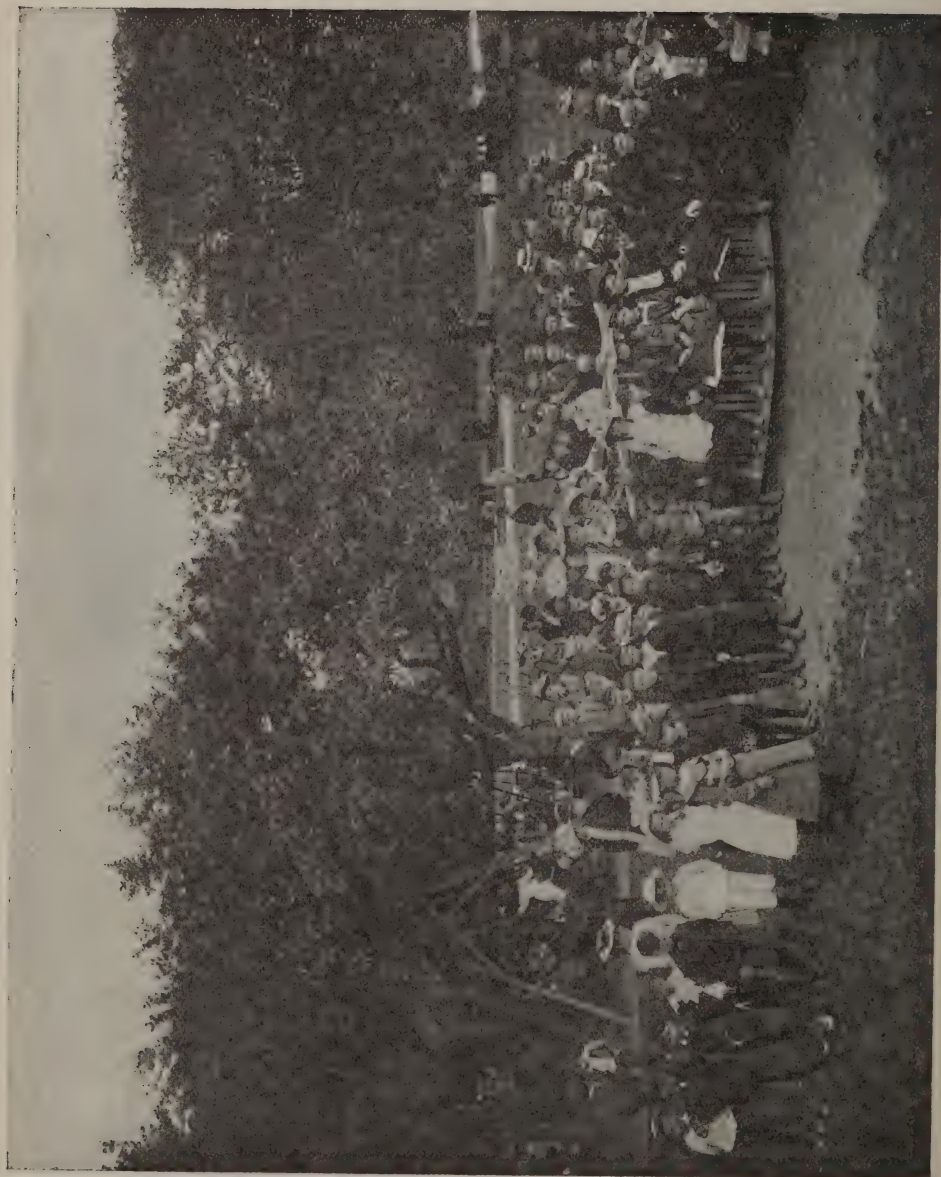

SKATING — BUTTONWOOD PARK

BUTTONWOOD PARK.

But little in the way of improvements has been done in this park during the past year. While there are a great many ways to improve and render it more attractive and desirable to the people, yet the times do not seem auspicious especially financially so. Closely allied to this subject is that of extending or opening for use Brownell Avenue from Kempton Street to Hawthorn Street, while the project is distinctly and entirely outside of the province of the Park Board and must be carried into execution if at all, by the City Council, nevertheless, the Commission is most heartily in favor of such improvements earnestly believing that the same will open up and develop a large amount of property which at present, is practically idle and non-productive, and at the same time afford a much needed thoroughfare for this large and growing section of the City, and present a frontage to the park that would greatly convenience a very large part of the community living in that section of the City, and considering it from a money point of view, it would be a wise and desirable operation for the City to undertake.

The labor expended upon this park was about the same and of similar nature as in former years. During the winter when the pond was in good condition thousands of people, old and young, enjoyed themselves indulging in the healthful exercises of skating and seemed to appreciate the arrangements made for their comfort and pleasure by the Park Board.

MERRY-GO-ROUND — BROOKLAWN PARK

The animal part of the park remains about the same with the exception of an addition of three black bears about fifteen months old, which by their antics have afforded great amusement for the children. This park continues to be a great favorite and the attendance increases in numbers annually.

Labor	\$4,982.67
Maintenance	2,494.00
Total	\$7,476.67
Average cost per acre	\$79.54

BROOKLAWN PARK.

Nothing has been done the past year towards the improvement of the north side of the park which needs so much to put it into proper condition for use and respectable appearance. I would suggest as a plan for the improvement of that section of the park, along the north road side a double roadway, the north roadway to be used for a traffieway and the south roadway for park purposes or pleasure driving. The year has not been an eventful one, no unusual events have occurred, but in most respects the season was most gratifying. Parties from neighboring towns and cities visited the park in large numbers, which showed the popularity of the park

not only to our own citizens but visitors from out of the City. There are many improvements that the Board could and would be glad to recommend to the honorable City Council whenever the financial condition of our city will warrant it, as the Board is assured that the feelings of the City Fathers are in full sympathy with the Board and the citizens in having Brooklawn Park the most beautiful spot of the park system, easily accessible and full of pleasing opportunities.

We are called upon to allude to the death of Holden B. Remington, Assistant Superintendent of the Park, appointed by Mayor Parker, June 14, 1895. Mr. Remington's health had not been good for sometime and in August asked to be relieved from the responsibilities of the position. He continued in feeble health until November 15th, when he died, and so passed away a valuable member of our department, whose earnest and serious efforts in behalf of the park made it what it is, a valuable part of the department of parks.

Labor	\$5,914.61
Maintenance	3,892.55
Total	\$9,807.16
Average cost per acre \$111.45	

SHORE — HAZELWOOD PARK

HAZELWOOD PARK.

This park is located between Brock Avenue on the east and French Avenue on the west. It contains twenty-eight acres and was purchased by the City and placed in charge of the Park Board, November 19th, 1901. It has proved a wise and profitable purchase for the City, wise, in that by its situation on the seashore, it gives to the people what no other park in the City can, an extensive marine and landscape view, and by its location and surroundings invites all lovers of the ocean-view an admirable opportunity to enjoy all that the river, harbor and bay can offer. This park has become a favorite place for picnic parties, Sunday schools, and organizations of many kinds from our own City and many of the towns nearby, who come and enjoy the day in an outing, surrounded by the best possible conditions for summer pleasure, and it must be, therefore, for the children, a health-giving recreation resort.

The park commissioners realize with pleasure that the constant increase in its patronage from year to year is evidence of its superiority as a public park. The health argument in favor of such a park is apparent and a powerful one and sufficient why the City should consider little else in providing such a place as this park.

Tennis courts are provided and the demand for them so urgent that the Board are strongly importuned for

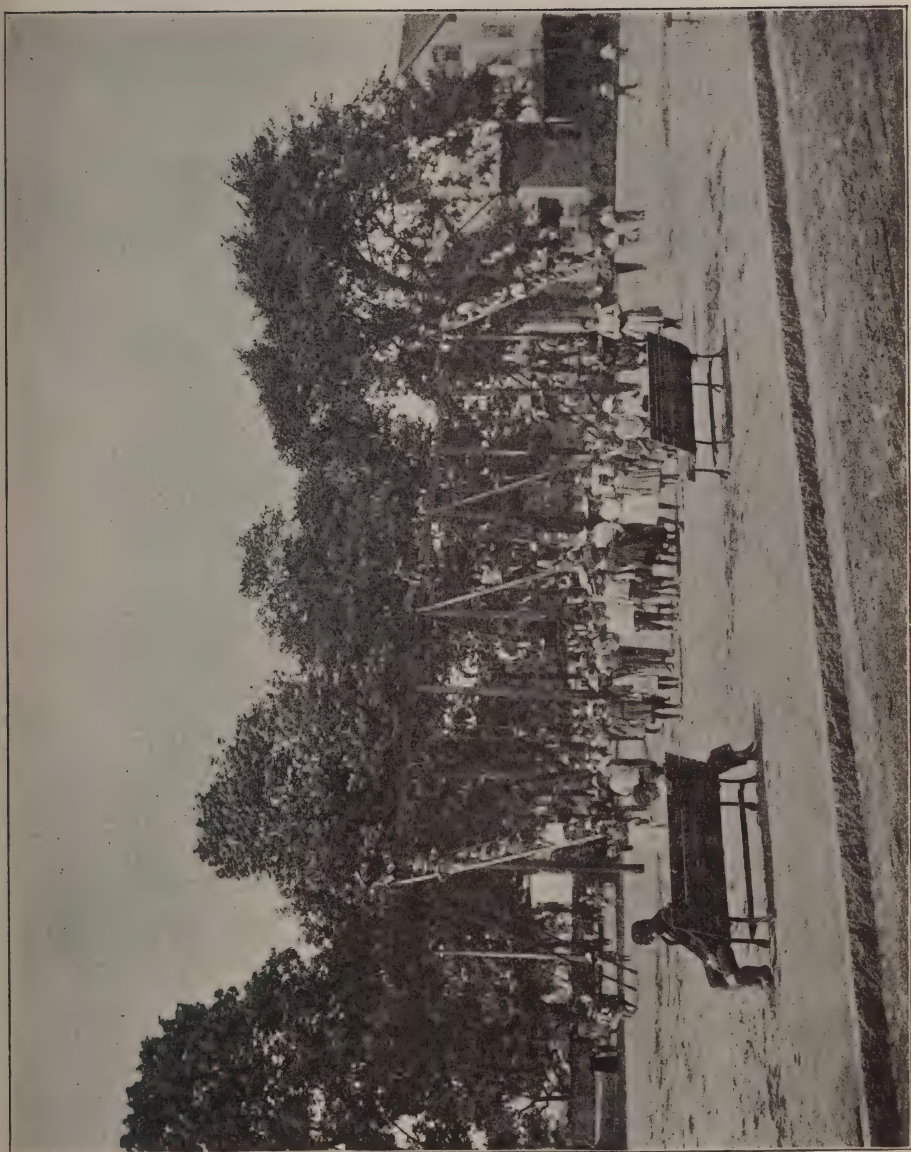

more. Truly Hazelwood is a seashore resort, and capable of great results.

Labor	\$1,892.46
Maintenance	263.82
Total	\$2,156.28
Average cost per acre \$93.75	

GROVE PARK.

As our City increases in population and therefore becomes more and more congested, the good results derived from parks and playgrounds are becoming more appreciated, and each succeeding year finds greater and more numerous demands to meet this increasing desire for more facilities, pleasure, and recreation afforded by the parks. Being located in a very thickly settled part of the City, it has proved to be a welcome and most desirable acquisition to the park system of our City and should be graded and equipped with the most up-to-date athletic apparatus for the pleasure and interest of the boys and girls as well as the older people.

More liberal appropriation should be allowed for installing playground apparatus on all the parks. At present only very limited amount of athletic apparatus is to be found on any of the parks, and while the demands for them are great the desire of constantly growing numbers of children who make playgrounds the mecca of their outdoor desires and ambitions, should be heeded. The present apparatus on this park is made of wood and has been in existence some twelve years, every year needing many repairs until it has become so dilapidated and dangerous that we are constantly in fear of accidents. An up-to-date modern steel equipment should be installed at once so that it would be available for use early in the spring. I can conceive of no more worthy, beneficial, good, or more conducive to the health and happiness of the multitude of children living in that portion of the City, than the complete renovation and provision for a perfect playground. The parents in that neighborhood are justified in insisting that it should be supplied for their children. At the request of the Park Commissioners, Mr. William F. Williams, Engineer, made a report to the Board as to the cost of putting in order and fitting this little park for a playground, as follows:—

GYMNASIUM — GROVE PARK

“THOMAS W. COOK, Esq.,
Supt. of Parks.

Dear Sir:—In reply to your request for an estimate of the cost of curbing the Grove Park and grading same with loam, I beg to state that it will cost about \$540.00 to curb the lot with curbing similar to that used by the City on its streets. I would suggest that the corners be rounded similar to the street curb corners.

I find from inspection of my contour plan of this park that the lot is a little below the grade of the sidewalk. I estimate, therefore, that it will require an average fill of one foot in depth to bring the lot to a uniform grade six inches above the present grade of the sidewalks. This will require about 1,500 cubic yards of material. To be safe I estimate that this will cost \$1.00 per cubic yard or total of \$1,500.00. This seems a very high figure, but I have no knowledge where you can get this material convenient to the park; in fact, you will probably have to buy it and cart it some distance, but if you know of any location you can get the material from, I can give you a more careful estimate of the probable cost. My estimate of total cost for curbing and grading this park will therefore be \$2,040.00.

Very truly yours,

WILLIAM F. WILLIAMS,
City Engineer.”

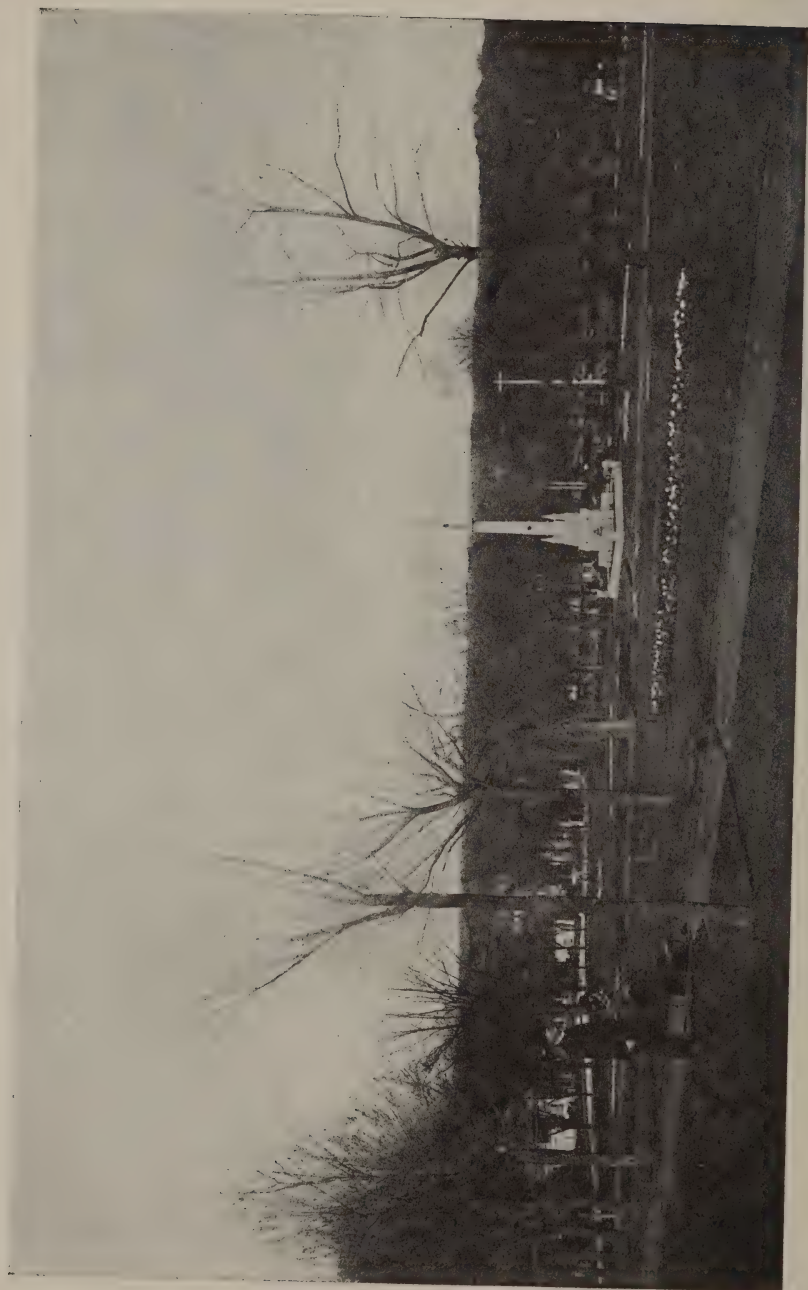

Labor	\$524.25
Maintenance	254.09
Total	<u>\$778.34</u>
Average cost per acre	\$778.34

COMMON.

This piece of park property remains about the same as heretofore. It has been well maintained, and is in excellent condition. But the fact remains that in removing the flower beds some years ago, a great mistake was made and they should be replaced at once. The Common should be considered the public garden of the City and properly present a beautiful display of lawns, flower-beds, and shrubbery, with a view of making it more attractive than ever. It is a very important part of the park department, situated in a popular part of the City and surrounded by handsome residences, and a thoroughfare for thousands of people passing daily through it, and the throngs that occupy the seats when the weather permits.

These grounds could be made the peer of any in the Country, and I would recommend such a change and improvement as soon as possible, such a consideration of the possibilities of the Common, should be considered by the Board, and on account of its situation and surroundings render that vicinity as beautiful and attractive as it can well be. The shrub beds are in a very delapidated condition and should be made entirely new or material additions made to them.

The Greenhouse is too small for the work that is to be done and should be replaced on one of the larger parks by a more modern one. Though small and delapidated, it has provided about all the plants used on the several parks

COMMON

which before its construction were purchased in open market of the local florists.

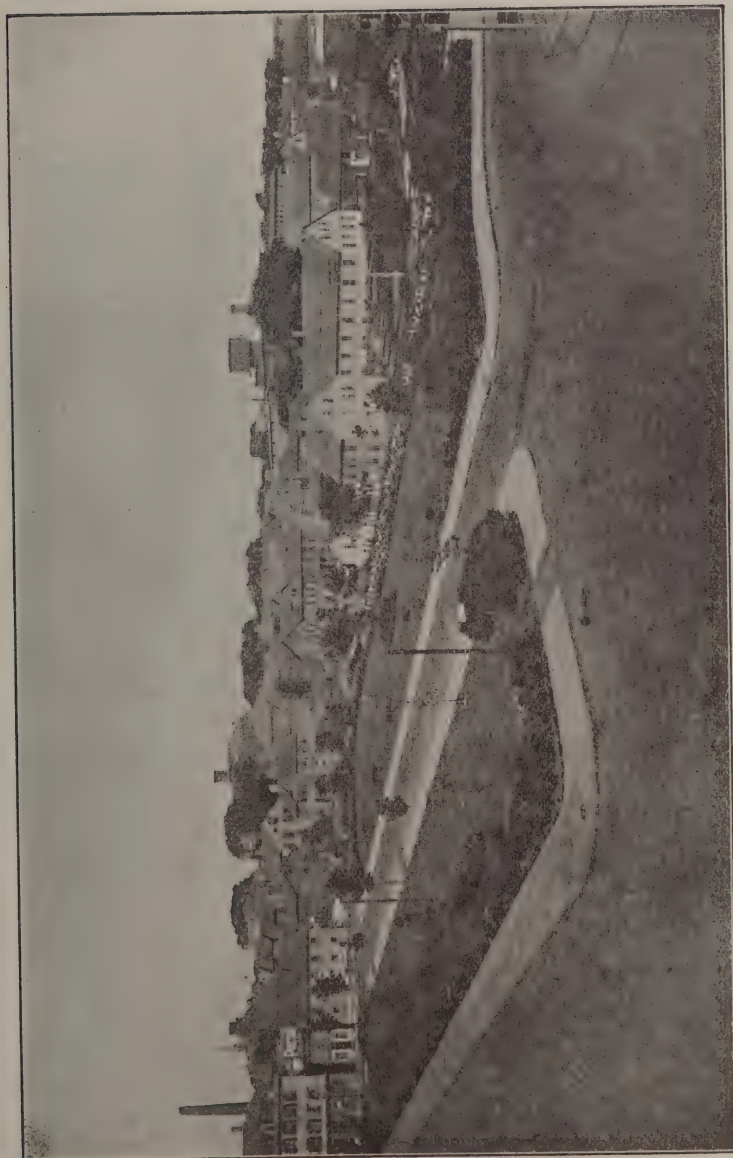

It is to be hoped that the Common may be made to assume a somewhat better appearance the coming season, at least, some effort will be made to attain that end, but it will depend upon how well the City Council consider the wants and necessities of the department.

Labor	\$4,034.89
Maintenance	1,505.98
Total	\$5,540.87
Average cost per acre \$791.56	

ASHLEY PARK.

The trees in this park as well as in the other parks have received proper attention during the past summer and winter, in the removal of dead wood, imperfect, and diseased portions, and careful pruning, and many portions of the park have been improved by relieving them of this crowded condition and poor and unsightly growths. Such as could be used for lumber was sawed into proper lengths, the limbs and dead wood being cut into firewood. The eastern part of the grounds was very low and some very large holes had to be filled which was done to a very large extent by the street department, thus relieving the burden of expense to the park department. Yet some time will elapse before the park can assume the shape and condition it should be, and such it is destined to be, for it is in a most desirable location to afford park desirabilities to the people living in that part of the City. Seats have been provided and they were occupied about all the time and many requests were made for more, but until improvements and the place is put in a little better condition, the present number is considered sufficient. The Commissioners would gladly avail themselves of the opportunity to place the little park in a condition satisfactory to the citizens in that section of the City.

BRIDGE APPROACH

BRIDGE PARK.

This little piece of park property in the very midst of a large and busy part of the city, is indeed a welcome place to all who by business or pleasure have occasion to visit it.

The many flowers and shrub beds maintained here are very much admired, and afford much pleasure to the large number of people who enter the city by way of the bridge. The grass always cut, trees and shrubs properly cared for, roadways neat and clean, is evidence of the devotion of the caretaker's pride in his efforts to have little Bridge Park receive the plaudits of the people.

Maintenance of the Park.

Labor	\$803.25
Maintenance	83.10
Total	\$886.35
Average cost per acre	\$886.35

Respectfully submitted,

THOMAS W. COOK,

General Superintendent of Parks.

PICNIC SCENE BROOKLYN PARK

FINANCIAL REPORT.

New Bedford, Mass., December 1, 1915.

To the Board of Park Commissioners:—

GENTLEMEN :—The twenty-second annual financial report of the receipts and expenditures of the department of parks for the year ending November 30, 1915, which I now have the honor to submit contains in detail information regarding the finances of the department, including the receipts, expenses and disbursements of the park commission, and affords in this summary, which is given herewith, an opportunity for those who are interested in parks and their management, maintenance and improvement, a correct and defined explanation of all moneys provided by the taxpayers and expended by the Park Board for park purposes, not only for the past year, but the total amount charged to the department since the adoption of the park system, is comprehensively made apparent by this report and submitted to our citizens for their consideration.

On September 13, 1915, Officer Edward Prifogle, was shot while in the discharge of his duties, by a man he was placing under arrest.

He was shot at four times, being hit each time, the bones of his left arm being badly shattered.

The plucky officer still clung to his prisoner until help arrived, when the prisoner was locked up and Officer Prifogle taken to the hospital.

He is still suffering from his wounds.

RETIRED ON HALF PAY

Overseers of the Poor
CITY OF NEW BEDFORD.

OFFICE OF THE OVERSEERS OF THE POOR,
Municipal Building,
New Bedford, April 17th, 1916.

To His Honor the Mayor and City Council:

GENTLEMEN:—We, the Overseers of the Poor, herewith submit our annual report for the year ending Nov. 30th, 1915.

The principal reasons for the increased expenditures in this department over the previous year, were the general increase due to the continual growth of the city, and the business depression at the beginning of the year 1915, which was greater than it had been for a number of years previous, but later in the year the conditions improved and the result was that at the end of the year, conditions were about normal.

MOTHERS' AID LAW.

The continual increase in the number of applications for aid under Chapter 763, Acts of 1913, means that we have not yet reached the point whereby we could estimate in advance the amount to be spent for this aid.

While this law has been a great help to a number of widows and to mothers left to care for dependent children, it means a considerable increase to every Poor Department's expenses throughout the State.

ALMSHOUSE.

Conditions at the Almshouse are such that something will have to be done in the near future, to take care of the additional number of inmates, whom this board is called upon to care for, especially during the winter months. During this last winter, every sleeping apartment was filled to

its capacity, and beds had to be put even in the chapel in order to take care of all our inmates. While this board does not wish to recommend any definite plan, we do suggest that the City Property Committee and the Committee on Almshouse, Charities and the Poor, visit the Almshouse and see for themselves the needs of enlarging at least the sleeping quarters.

The Board of Overseers of the Poor will be pleased to confer with either of the above Committees relative to changes or improvements at the Almshouse.

The appended itemized tables under the several heads give full particulars as to the amount expended for each division.

Respectfully submitted,

ULRIC E. COLLETTE, Chairman.

CHARLES E. VAUGHAN,

ANTONIO A. FERNANDES,

Overseers of the Poor.

Douglas L. McGee,

Secretary and Almoner.

ANNUAL REPORT
OF THE
SEALER OF WEIGHTS AND MEASURES

To the City Council

For the Year 1915.

REPORT OF SEALER OF WEIGHTS AND MEASURES.

CITY OF NEW BEDFORD.

July 17, 1916.

To His Honor the Mayor and the City Council of New Bedford:

GENTLEMEN:—On account of the fact that my appointment to the position of Sealer of Weights and Measures took place late in the year of 1915, I have decided to make my report brief, and many recommendations which by this time I believe would tend to make the work of this department of greater value to the citizens of New Bedford will be deferred to my next report to your honorable body. There is, however, one feature I feel that needs to be called to your attention; the need of more assistance in this department to perform the work which the law now requires, and protect the purchasing public. It has now become a practical impossibility to perform all the sealing in a city of this size, not considering the inspection work (which in my opinion is of greater importance) take care of hawkers, peddlers and itinerant venders, and to see that the new laws and net weight laws are enforced.

I sincerely hope that the members of the City Council will give me the additional help in this department as early as possible that is so urgently needed.

A detailed report of the work performed for the past financial year is herewith submitted.

Respectfully submitted,

JOHN HOBIN,
Sealer of Weights and Measures.

ANNUAL REPORT

OF THE

SCHOOL COMMITTEE

OF THE

CITY OF NEW BEDFORD

For the Year 1915.

NEW BEDFORD:
THE J. E. BUDLONG PRESS, PRINTERS.
1916.

IN SCHOOL COMMITTEE.

DECEMBER 31, 1915.

Voted, That the Superintendent and Secretary prepare the Annual Report of the School Board for the year 1915, and that 1500 copies of the same be printed.

Report of the Secretary.

By direction of the School Committee, I submit to our fellow citizens the following report for the year 1915.

STATISTICS.

I. POPULATION AND VALUATION.

The population of the city [census of 1890] was	40,705
The population of the city [census of 1895] was	55,251
The population of the city [census of 1900] was	62,442
The population of the city [census of 1905] was	74,321
The population of the city [census of 1910] was	96,652
The population of the city [census of 1915] was	109,462
Valuation of the taxable property [1915] was	\$111,465,763.00
School houses and lots,	2,672,750.00
Other school property,	231,858 04

II. APPROPRIATION.

Rate of taxation,	\$23.00
Amount for school purposes, not including new buildings,	483,000.00

III. SCHOOL CENSUS.

Location of children between five and sixteen years of age, and illiterates between sixteen and twenty-one years of age, as to school attendance, as reported by the census enumerators, in accordance with the census record taken in September, 1915.

Between 5 and 6 yrs.	3,662
Between 7 and 14 yrs.	13,314
Between 14 and 15 yrs.	3,313
Between 16 and 21 yrs. [illiterates]	1,456
Between 7 and 14 yrs. [not attending school, out with satisfactory excuses]	66

IV. SCHOOL ORGANIZATION, July 2, 1915.

High School,	1
Grammar schools,	6
Mixed schools-Grammar, Primary, and Ungraded,	9
Primary schools,	14
Suburban schools,	2
Fresh Air schools,	2
Cooking schools,	3
Manual Training schools,	4
	—
	41

V. SCHOOL BUILDINGS, JULY 2, 1915.

Permanent school houses,	34
Portable school houses,	15
	—
	49

VI. TEACHERS AND PRINCIPALS.

Whole number in service, January 1, 1916.

High school: 47 teachers, 1 military instructor, 1 clerk,	49
Elementary schools,	354
Special teachers,	23
School nurses,	3
Evening High School,	14
Evening Elementary schools,	93
	—
Total,	536

PUBLIC SCHOOLS.

	1914	1915		
Enrollment of pupils,	14,214	16,256	increase	2,042
Average membership,	13,037	13,176	increase	139
Average daily attendance,	12,146	12,431	increase	285
Per cent. of attendance,	93.1	94.3	increase	1.2

PRIVATE AND PAROCHIAL SCHOOLS.

Enrollment of pupils,	4,528	4,479	decrease	49
Average membership,	4,020	4,247	increase	227

13. March. On the Alert. *Schubert*
High School Orchestra.

CLASS ODE.

Words by Anna Elizabeth Bailey.

Dear Alma Mater,
Life now bids us leave thee,
Far o'er the earth our paths to lead.
Hear softly sounding
Those distant voices
That call us forth to strange, new deed.

Kind Foster Mother,
Guide of our youthful days.
Thy love for us our praise has wrought;
Love that has trained us,
Love that has taught us
To use our hearts, our hands, our thoughts.

Loved Alma Mater,
May we ne'er forget thee.
When on life's path we forward move,
Thee let us honor
With grateful praises
For friends whom we have learned to love.

True Alma Mater,
Give us thy blessing.
Our pledge, "Truth Conquers," is from thee.
Stand thou beside us,
Still whisper to us
These words, our guidance, still to be.

CLASS OF FEBRUARY, 1915.

High School Orchestra.

CLASS ODE.

By Madeline Eleanor Almy.

I

We have reached the day of parting.
At the crossroads now we stand.
Through the hardships of our journey,
There's been oft a helping hand.
Ever onward, ever onward.
In that past, we've learned to see
That with love, dear Alma Mater,
We should think and work for thee.

II

Trails of pleasure we have followed,
Trails of trouble and of strife.
Now in sun and shade before us,
Wind the untrod paths of light.
Ever onward, ever onward,
Stretch those paths o'er land or sea,
Filled with thanks, dear Alma Mater,
Oft our thoughts will turn toward thee.

III

Now we leave this scene of parting.
One last glance and we are gone;
Moved by sorrow at our sunset,
Moved by gladness at our morn.
Ever onward, ever onward,
Yet from wheresoe'er we be,
We'll return, dear Alma Mater,
Some time, some day, home to thee.

WINNERS OF THE JONATHAN BOURNE PRIZES.

Report of the Superintendent.

TO THE HONORABLE SCHOOL COMMITTEE:

Dr. Croacher and Gentlemen:—I have the honor to submit the fifty-fifth annual report of the Superintendent of Schools of this city.

In the supervision and administration of the public school system it has been my aim to carry on the work as any good business is conducted, that is, strive for greater efficiency and economy that our dividends may be larger in proportion to the amount of money expended. As the dividend of the schools must be paid in well trained and efficient citizens I feel that our department represents the most important activity in our public service. No matter how good our teaching may be the right kind of constructive criticism will make it better. Rigid economy, the kind that searches out our real needs and then supplies them liberally, must constantly be practised in the administration of the department. Constant surveys within the system should be made if we would benefit by experience. In all our work the active, constructive assistance of parents and friends is most cordially invited.

THE COST OF THE SCHOOLS.

In view of the constantly increasing cost of the school department I wish to place before you the following information in order that the items which show additional expenditures may be set forth and the reasons for the larger appropriation explained. To do this I have prepared three tables, taking the years 1900, 1905, 1910 and 1915 as a basis of comparison.

TABLE I.
SALARIES — INCIDENTALS — REPAIRS.

	1900	1905	1910	1915
Teachers' Salaries,				
Day	\$137,243.96	\$181,126.71	\$247,846.00	\$357,638.91
Evening	3,557.00	7,010.00	6,337.50	9,641.50
Incidentals,				
Salaries	\$23,383.60	\$30,598.67	\$39,383.32	\$57,603.76
Miscellaneous	30,055.80	35,482.15	48,105.55	47,376.77
Repairs,	\$14,467.93	\$9,281.51	\$9,944.21	\$7,330.03
Valuation school prop.	\$906,964.00	\$1,404,289.00	\$1,735,225.00	\$2,888,083.04
Teachers, High School	15	18	22	47
Elementary	202	265	304	383
Average no. pupils belonging				
High School	350	389	501	1,072
Elementary	7,014	8,490	9,839	12,660

TABLE II.
AVERAGE COST PER PUPIL.

Teachers Salaries,				
High School	\$51.54	\$60.29	\$52.81	\$55.94
Elementary	16.99	18.57	22.50	23.51
Incidentals,				
Salaries	3.17	3.44	3.81	4.19
Miscellaneous	4.08	3.99	4.65	3.45

TABLE III.
TEACHERS' AND JANITORS' SALARIES.

	1900	1905	1910	1915
Teachers' Salaries.				
High School,				
Principal	\$2700.	\$3000.	\$3000.	\$3000.
First Asst.	1700.	1900.	1900.	2200.
Dept. heads	1700.	1800.	1800.	2000.
Male assts.	1600.	1600.	1600.	1700.
Female assts.	1000.	1000.	1000.	1200.
Elem. Schools,				
Principals, Class A.	1900.	1900.	2000.	2200.
Class B.		1600.	1600.	1800.
Primary	600.-950	700.-900.	775.-1000	850.-1000.
Assistants.	600.-675	625.-750.	700.-825.	750.-875.
Janitors' Salaries,				
High School,	1000.	900.	900.	1200.
Elementary,	500.-800.	600.-800.	700.-1100.	750.-1225.

In table I it will be noted that in each period there has been a large increase in the teachers' salaries account. The increased per capita cost in high school teaching for 1905 is hard to explain. The 1915 cost, while much lower than in 1905 is due to the general increase in salary granted the high school teachers in 1912. The per capita cost in the elementary grades is due to increases in salary as follows: twenty-five dollars in the first period; seventy-five dollars in the second period; fifty dollars in the third period and to the revision of the supervisors' and principals' schedules. The rapid growth in the school population has made it impossible for us to reduce the number of pupils in each room to the standard which we have tried to establish, that is, single grades forty-five, double grades thirty-six, ungraded thirty, fresh air twenty-five, special fifteen.

The incidental account includes all salaries other than teachers' salaries and the miscellaneous running expenses of the department. A steady increase in the salary account is shown in each period and is explained by revised salary schedules and the large additional overhead cost of the engine room and janitor service at the new high school over similar cost at the Summer street building.

The miscellaneous account in table II shows a per capita cost of three dollars and forty-five cents in 1915 as compared with four dollars and eight cents in 1905, notwithstanding the increased cost of fuel, books and all other materials. City water was furnished free until 1909 but last year we paid thirty-seven hundred dollars and seventeen cents for water. The large per capita cost for 1910 is explained by the large number of new books needed in the high school due to the admission of the first mid year class.

The valuation of our school property has advanced over two hundred per cent. in the past fifteen years and yet, by referring to table I it will be seen that the appropriation for the upkeep of this property in 1915 was fifty per cent. of the appropriation in 1900. This small appropriation has made it ne-

cessary to make temporary repairs in many cases and such a course is decidedly wasteful. Our inspector will again make a detailed estimate of necessary repairs and I trust that this year the appropriation asked for may be granted.

FIRE HAZARD.

The report of Inspector Gibbs and Chief Dahill must be very gratifying to the School Committee and reassuring to our citizens. Fire prevention has been the watchword of all the employees of the department and the fact that the Harrington school fire was extinguished with slight damage is due to the care exercised in the disposition of inflammable material. In considering the recommendations of the special committee I would suggest that metal paper balers be substituted for metal containers. This would allow us to take care of all waste paper in a fire proof receptacle at a profit and eliminate the troubles that arise from burning the rubbish. At present we have a uniform fire signal for New Bedford but I believe most heartily in the recommendation that we have a uniform signal for the state.

A special appropriation to cover the cost of installing new fire gongs, automatic sprinklers and fire proof stair towers as recommended should be promptly granted that the work may be completed at the earliest possible date.

FRESH AIR CLASS.

The special committee, Dr. Croacher and Mr. Geoghegan, appointed to investigate the advisability of establishing fresh air classes in connection with the regular school work recommended, at the September meeting, that such class rooms be opened for pupils who are in special need of fresh air treatment. The superintendent was instructed to open one such class as an experiment. A portable building was made available at the Thomas Donaghy school and a class of twenty-two pupils began work on Monday, October eighteenth, with Miss Marguerite E. Budgen as teacher. The extra equipment

consists of thirty movable and adjustable desk chairs, thirty steamer chairs, a Jones bath room scale and thirty warm blankets. The blankets were prepared by the girls at the Industrial school and with the dishes necessary to serve the lunches were donated to the class by the New Bedford Anti-Tuberculosis Association. The lunch is prepared at the Industrial school and is served to the pupils at a cost of two cents per day. The candidates for the class were selected by the school physicians and nurses, their homes visited and the plans explained to the parents. Membership is voluntary and it is pleasing to note that in every instance parents were glad to take advantage of the opportunity. I desire to express my appreciation of the co-operation of physicians, nurses and principals and especially of Miss Jenkins and her assistants at the Industrial school.

As opportunity offers additional classes should be opened at the north and west ends of the city. I look forward to the time when these classes shall have proven of such great benefit to the pupils in attendance upon them that the value of fresh air will have been sufficiently well demonstrated to lead all of our teachers to make the rooms over which they preside fresh air rooms.

The fresh air class at Sassaquin now has a home of its own in the new portable building erected in November. This class now numbers twenty-six pupils and is meeting with great success under the leadership of Miss Hoxie.

SUMMER SCHOOLS.

It is a matter of regret that it was necessary to discontinue the summer classes during the year 1915. These classes, made up of children who for one cause or another failed of promotion, have done much to reduce retardation in the grades. The more experience we have in this work the more effective it is and just how much is accomplished for those pupils, who through illness or slowness, have failed in the regular classes, is difficult to measure. The encouragement to the

pupil which comes from promotion with the class coupled with the financial gain to the city certainly warrants the continuation of these classes.

CONSERVATION OF EYESIGHT.

The Massachusetts Commission for the Blind has during the past year made a careful study of the records of the eye tests annually made by the teachers in our schools. The serious cases were selected and investigated by our school nurses and the Commission has recommended the opening of a special class for the benefit of those children who, under present conditions, are losing ground and who, if given proper treatment, might conserve and improve their sight. Twenty-two children have been recommended as candidates for the class and more names are to be added as the investigation progresses. I heartily endorse this recommendation and trust that such a room may be opened near the center of the city.

NATURALIZATION CLASSES.

Increased interest in the education of the adult immigrant has been very marked during the year just closed. The fact that his preparation for citizenship was a legitimate part of the work of our evening schools has been recognized in many of our cities and in New Bedford two classes, the special work of which is to prepare for citizenship, have been established. The Bureau of Naturalization at Washington is co-operating with the department that we may search out those in need of this training and place its advantages before them in the right way and through the proper channel, the public school system. I am sure that the success of the two classes opened this year will lead to a demand for such training in every evening school in the city.

SPECIAL CLASS WORK.

An exhibition of the hand work of the special classes of the department was held in the Board rooms in June. The quality

of the work proved that the Committee was justified in establishing such groups. Every pupil in the school is benefited by the separation into special groups of those pupils who cannot do the regular work, but who, when given work suited to their capacities and special needs make marked progress. Through the special syllabus prepared by Miss Stuart and the special teachers, children who have been in the habit of depending on others have come to have confidence in their ability to stand alone.

SCHOOL GARDENS.

Mr. Ralph Gaskill, County Agent for the U. S. Department of Agriculture, visited our large schools early in the spring term and gave a most practical talk on home gardening. This fall we had an exhibit of the garden products raised by school children at the Jireh Swift, Abraham Lincoln, Parker street, Fifth street, William H. Taylor, James B. Congdon, Betsey B. Winslow and Thomas R. Rodman schools. Ribbon prizes were furnished by the Massachusetts State Board of Agriculture. This general exhibition was a revelation to the principals, teachers and friends of the schools and proved decidedly that we could benefit in a substantial way by expert supervision of the home garden. Mr. Gaskill pronounced the work of the pupils as superior to that which had received expensive press notices and commendation in other communities. Productive work which will keep the boys pleasantly employed and off the streets should receive every encouragement.

SUMMER PLAYGROUNDS.

With the excellent park system which the city owns it seems to me that we are duplicating our work more or less when we establish an independent system of playgrounds. The parks are so located that with slight additional expense the playgrounds could be taken over by the Park department, thus making the parks of more actual use to the community

HAND WORK OF THE SPECIAL CLASSES

with decided gain to the children of the city. Few cities have such an excellent park system and it has been a source of regret to the writer that the people as a whole do not make more use of this means of recreation.

NO SCHOOL SIGNAL.

At the regular meeting of the Committee held January 29, 1915, it was voted to discontinue the no session signal. The buildings are now open on every school day and the responsibility for the attendance of the pupils rests with the parents. The records of attendance have not been greatly affected and I believe that this action has been a decided benefit to the children attending our schools.

USE OF SCHOOL BUILDINGS.

The rule of the Committee allowing the use of our school halls for any legitimate purpose that can be called educational and for which no admission fee is charged is not taken advantage of by the people of the city to any extent with the exception of the auditorium at the high school, which is in almost constant use. Outside activities cannot be taken up by this department without a special appropriation for such purposes and under the existing financial conditions I do not feel that we can justly ask for an appropriation for this form of extension work.

BUILDINGS.

Six new portable school buildings have been purchased and equipped during the past year. All are located at the north end of the city. The need of a new building located near the lot recommended east of Acushnet avenue, is imperative and should be planned for at once. A building located on the site suggested would relieve crowding at the Cedar Grove street, John H. Clifford, Phillips avenue and Abraham Lincoln buildings. At the latter building we are now using one room

for two classes and conditions are not at all satisfactory for the best work.

A sixteen room building on the old high school lot will relieve conditions temporarily in the west end but the time is not far distant when a new school on the North-Hillman street lot will be necessary to relieve classes at the Thomas R. Rodman and Harrington Memorial buildings.

I would again call your attention to the need of additional room at the south end of the city between the I. W. Benjamin and William H. Taylor schools. With new tenement houses constantly being erected in this district it will be a difficult matter to properly care for the pupils in this section of the city.

The rapid growth of the high school during the past five years has completely filled the new building and we are face to face with the problem of additional accomodations. As we already have an ample heating and lighting plant the erection of a building for commercial school purposes at the rear of the present building would seem to be the economical plan. This would allow also the use of the auditorium and laboratories of the present school and the whole plant would be under one administrative head.

The land at the rear of the Jireh Swift school which was purchased for playground purposes should be put in condition for such use at once by the City Property Committee and turned over to the school department.

New Bedford offers rare opportunities to its young people through the day and evening classes of its elementary and high schools, with many varied and special programs, the Industrial school with its well equipped shops, the Textile school with no superior of its kind, the Swain Free School of Design, an exceptional institution to be located in an industrial city, each ably supported by one of the best public libraries in the country. Let us all unite in awakening the citizens of this community to a realization of the advantages here offered to the end that each institution may be constantly used to its fullest capacity.

Such success as may have been attained during the past year has been made possible by the constant and sympathetic support of all interested in the work of our public schools and I take this opportunity to express my appreciation for such assistance.

Respectfully submitted,

ALLEN P. KEITH.

Report of the Assistant Superintendent of Schools.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS.

Dear Sir:—In compliance with your request I herewith present the tenth annual report of the assistant superintendent of schools.

In many parts of the country there is an increasing demand that while the annual report concerning school matters should contain facts of interest to the School Board, yet since taxpayers and parents as well as teachers are definitely responsible for and hence vitally interested in the schools of a community, they also are entitled to a report which will furnish a clear-cut and truthful picture of the aims, the achievements, the progress, the deficiencies, and the needs of their schools.

Achievement and progress are dependent upon no one official or group of officials but must be wrought out through the combined efforts of each individual connected with the schools, but often the needs and deficiencies which hinder progress can be supplied through administration or remedied through supervision or can be healthily influenced by public opinion. Because of this these needs and deficiencies may appropriately be presented in a school report, though not till effort has been made to remove the cause without this publicity.

PROGRESS.

At the close of the first half-decade of supervision in the primary grades a report was presented which reviewed the progress made in that department during the five years of supervision. The present year which marks the close of the

HAND WORK OF THE SPECIAL CLASSES

decade is an equally appropriate time for such a survey. The cumulative effect of the work accomplished by the schools during these years has accelerated the rate of advance, but instead of reporting this progress in detail it may be more profitable to survey the work with thoughts turned toward our deficiencies rather than toward the progress. Special supervision in grade work has been given for a much shorter period in the grammar grades yet it may be equally profitable to note here the hindrances as well as the growth.

THE COURSE OF STUDY.

One of the disadvantages attending the use of a definite course of study is that some teachers and principals will hold to a too literal interpretation of its aims and bounds. Again, we may teach a subject or topic because the course calls for it and yet may fail to teach the child, for the memory drill which enables the pupil to give back the fact or words presented by the teacher may leave him still untaught along the broader lines of real education. A third objection to a definite course of study is sometimes voiced in the complaint that teachers working with such a course feel their lack of freedom to be a disadvantage.

A lack of freedom may seriously hamper a teacher and may even suppress that element of inspiration which is the medium for the contagion of ideals as well as of knowledge. But on the other hand unlimited freedom may work as a detriment. Uncontrolled freedom permits a teacher to spend time and energy upon teaching facts which the consensus of educational opinion would assign to higher grades, or it allows her to use the subject matter and text of the grades immediately following, thus robbing the pupil of the freshness of approach which should be conserved for the work of each grade.

The present course of study for the primary grades aims to meet the needs of the schools in the matter of freedom. While outlining the minimum requirements in subject-matter, in methods of teaching and discipline, and in standards for the

promotion of pupils, it allows freedom to modify the time assignment when in the judgment of teacher and principal this adjustment is required to meet individual or class needs, leaves freedom for much opportunity for project-work on the part of each teacher, and it sets no limits to the amount of work parallel to the course which may be accomplished as a maximum.

Freedom should not be interpreted as freedom to evade or to fail to meet the minimum requirements of the course, requirements which call for training in habits as well as in knowledge. The teacher whose method of teaching fails to reach these minimum requirements is not granted freedom to continue the unproductive use of her method and for a time she may protest against this lack of freedom. The teacher who has previously measured her success by knowledge alone feels at a loss when she is required to develop initiative and self-direction in her pupils; but the teacher who studies the course in its entirety, who perceives, in its connection with the whole, the part the work of her grade is expected to perform in the child's education will recognize that the organized freedom indicated by the course is more productive of results than disorganized freedom can be.

Yet we must be upon our guard that the desire to secure unification does not lead us into the straight-jacket of uniformity, that the letter of its instructions shall not be substituted for its aim and its spirit.

In a great measure the progress in this department during the past decade has been due to the teachers' comprehension of the aims of the course of study and to their loyal adoption of it as the foundation of their work. This progress can best be measured by those who can recall the time lost, the effort wasted, the confusion due to varying standards, the irritation and discouragement resulting from transfers, and the not infrequent demotion of pupils, which hindered the work before these minimum essentials were understood and insisted upon.

At present our chief hindrances to good results to be gained from the course of study are:—too little familiarity with the

course as a whole and a consequent failure to review the work of earlier grades and to build upon this foundation; failure to recognize that the progress of the duller section of the class is the real test of teaching power; failure to recognize the habits which are being inculcated by the teacher's methods; too great a dependence upon supervision for the help which should have been made a part of the teacher's preparation or which might be obtained through the teacher's personal effort and study; and too great a tendency to neglect the methods which will secure not only the knowledge but "the essential habits, ideals, and attitudes for individual and community needs."

In the grammar grades some adjustment of the present course is needed to secure a closer coördination between these grades and those below. This is specially needed in language and arithmetic in the lower grammar grades, and a revision of the over-crowded course in history is needed here. The teachers and principals of the grades from 4 A through 6 A are now engaged in making a study of the work in arithmetic and in language as a basis for this readjustment.

A thorough revision of the course in geography has already been accomplished. The prominent features of the new course are the motivation of the subject--the work being based upon the needs of mankind--and the motivation of the pupil which has shifted a large part of the work from the teacher's to the children's shoulders and has made the pupil's work less wearisome and more vital. Instead of hours spent as formerly in filling notebooks with comparatively unrelated facts, carefully collected and arranged by the teacher, half-learned and half-digested by the pupil but faithfully copied by him from blackboard and text-book, the present course seeks to give the pupil so clear a memory picture of the map of the country studied, so firm a memory grip upon the essential facts needed by any intelligent person, and such skill in finding in text-books and other books of reference the facts he needs to learn or recall that it will be unnecessary and unprofitable to spend time in compiling note-books. It is sometimes claimed that a note-book is desirable that the pupil may take it with

him to higher grades and have it at hand to refresh his memory. The present course aims to teach the subject so intelligently and effectively that the pupil will be able to take these facts with him not only into the higher grades but into adult life, not in note-books but as a part of his mental equipment for life. The habit of turning to standard works of reference rather than to individual note-books is a valuable part of this equipment.

This method of teaching the subject has greatly widened the scope of the knowledge gained by the majority of the pupils, resulting in a thoroughness of knowledge and a richness of detail undreamed of under the note-book plan, and it has helped the slower pupils to reach the minimum requirements of the course more successfully and in less time than under the old plan. It has lifted the pupil from the passive state of a recipient, often an unwilling one, and has used his intelligence, his craving for activity, and his interest in acquisition, as active forces in his education. In the hands of some of the teachers it is resulting in an increased attention to and power in oral expression in good English, and in addition to the marked gain in knowledge and in thoroughness, there is noticed some development of "gumption" and common-sense.

It is the lack of "gumption" and common-sense, these two products of thought and experience, which is usually the foundation for the complaints brought against the graduates of our schools. These are products which knowledge alone will not bring and the individual whose time has been spent mainly in acquiring knowledge is not infrequently lacking in the ability to adjust himself to new conditions, to exercise judgment, or to fulfil requirements not explicitly defined.

The teaching in geography is intended to strengthen the pupil's judgment, to throw him upon his own resources in meeting a given requirement, and to develop self-confidence and self-direction, these to be the result of and to be gained through the facts he commits to memory.

It should be recognized that we have but made a beginning in the application of this method and it must be admitted that

HAND WORK OF THE SPECIAL CLASSES

thus far it has been followed with widely varying degrees of success. Yet the least satisfactory work is an improvement upon that teacher's former results, and greater familiarity with the aim will do much to lessen the gap between the best work and the least successful. The teachers who have been most successful in adapting the new course to the needs and abilities of their pupils have been those who were already awake to the present day trend in education.

MOTIVATION OF THE SUBJECT.

Training in judgment and common-sense as well as in knowledge is being secured through the experience gained by means of the project-work which the more thoughtful and skillful teachers in each grade are employing. A recent visit to one of the sub-primary and kindergarten rooms furnished an illustration of what may be done in this direction even at the beginning of the child's school course. Last spring the class had visited some of the school-and-home gardens and had watched the planting of the corn and in later visits they had observed its growth.

In the fall stalks of corn bearing the ears were brought into the school room. Some of the ears were hung up to dry for seed while others were shelled and some of the kernels ground between stones till the children saw how meal is obtained. Later the pupils made paper bags to hold the corn and paste-board carts to represent the vehicles used for carrying the corn to the mill.

From pieces of unbleached cloth and from paper towels they contrived aprons and caps which were intended to insure cleanliness while they were churning cream into butter and cooking the corn meal. (The neighboring day-nursery had invited them to store their butter in its ice-chest till they were ready to use it). When the children were ready for their Thanksgiving party they mixed the corn-meal with water and made johnny-cakes which they cooked at school and ate with the butter they had made.

In the special classes this idea of project-work dominates all the hand-work executed by the pupils. The work executed by these classes last June showed that nothing was made merely for the training which the making furnished but that each article was intended to supply some need of daily life and that while its worth was enhanced by the excellency of the workmanship yet its main value lay in its fitness to satisfy some need, for use or for beauty.

The same aim is shown in the hand-work executed by the pupils in the open air class at Sassaquin. The child recognizes the need for the article or the use to which it can be put before beginning to make it.

In the regular grades the making of an article, the playing of a game, some field lesson or class trip is often made the basis of language work; actual measuring, building, buying, estimating, in other words *experience*, is made the basis of some of the work in arithmetic.

Far too little advantage of this means is taken in teaching this subject and our work should be strengthened by motivation in each subject.

PROGRESS.

One of the factors tending toward progress in the last half-decade has been the adoption of the plan which placed each large school in the primary department in charge of a supervising principal. This has not only strengthened these schools through the opportunity it offered for more efficient administration but the quickening of mental life and progress in each school has been measured by the extent to which the principal has grasped and applied the best in present day thought and practice. The course of study with its frequent revisions to adapt it more closely to our needs has been a means of progress, as has been shown by the work of those teachers who have made themselves most familiar with its aims. Another means of progress has been the extension of closer supervision into the grammar grades and the appointment of a grade supervisor to assist in supervision.

CONCLUSION.

The definite aims toward which our efforts are now being directed are:—1. to use the child's mind "not only as a store house but as a power-house." 2. to measure our teaching power by the progress of the duller half of the class. 3. to widen the scope of our teaching so that it shall include the aim to furnish "the essential knowledge, habits, ideals, and attitudes for individual and community needs".

Respectfully submitted,

JOSEPHINE B. STUART,

Assistant Superintendent of Schools.

Report of the Principal of the High School.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—I respectfully submit my sixth annual report on the New Bedford High School.

The total number of pupils enrolled from September 1914 to June 1915 was 1140; but this included the class which graduated in mid-year. Of this total number enrolled 152 left school for various reasons, and 102 graduated. The highest average membership of any month in the year was 1075, in the month of February; and the lowest was 929, in the month of January. The total number of teachers employed was 47 regular and 4 special teachers. The increase in the number of pupils enrolled over the preceding year was 133, and the increase in the total number of teachers employed was 6.

The large increase in the enrollment of the school made it necessary for us to make several changes in the weekly time schedule of classes. The practice we had followed for several years of taking the last period each Wednesday for military drill and band rehearsal had to be discontinued, and the period assigned to regular class recitations. The cadets and band now practice each Wednesday from 1:15 to 1:45. The former custom of having only five recitation periods with a school assembly period on Friday had to be changed to six short recitation periods with a school assembly period. The number of pupils electing singing had become so large that it was necessary to provide an additional period for singing, making the singing periods the fifth and sixth each Wednesday.

The problem of providing a sufficient number of rooms to accomodate the increase in the number of classes has become a very serious one. There are only 38 class-rooms in the building. These include the science laboratories and typewriting rooms, which are unsuitable for ordinary recitation work. We have 46 teachers who teach from 20 to 27 periods a week. This lack of sufficient number of rooms has compelled us to reorganize the school for each day's classes. It is evident that within a year or two we shall not be able to accomodate the increasing number of pupils unless we use the library and auditorium for class rooms, or hold afternoon sessions.

TEACHERS' PROFESSIONAL READING.

During the year the faculty of the High School has undertaken to stimulate greater interest on the part of teachers in professional reading and study. A committee has been appointed to select and recommend books from the latest educational publications for purchase by teachers; the books thus selected are to be intensively studied and then criticized under the direction of a leader at each monthly teachers' meeting. The first book selected by the teachers is, "Methods in Teaching in High Schools", by Samuel C. Parker, Dean of the College of Education of the University of Chicago.

REVISION OF ENGLISH COURSES.

I have appointed two committees of English teachers to revise our courses of study in English. These committees are to submit new outlines of the English work to be done in the High School in each semester. They are to outline the work in composition [written and oral], rhetoric, and literature. They are to consider and offer plans for the differentiation of the English work in the college, scientific, general, and commercial curricula; and they are to select the several books to be read and studied in the four groups of curricula, and plan for better co-operation with the work of the grammar schools.

SCHOOL ORGANIZATIONS.

The High School orchestra, school band, girls' glee club, and boys' glee club help greatly in the musical instruction of our pupils. They all are doing excellent work. The concerts given by the orchestra and band, and the singing on several occasions by the glee clubs have been greatly enjoyed. The debating society debated several times before the school at Friday morning assemblies. The past year was one of the most successful in the history of the society.

MISS MARY E. AUSTIN

AND

MISS LYDIA J. CRANSTON.

The past year was one of the saddest in the history of the High School, because of the loss by death of two of our oldest teachers. Miss Austin died January 20, 1915, and Miss Cranston followed her on July 5, 1915. The new Bedford High School never had on its faculty two more efficient and loyal teachers than Miss Austin and Miss Cranston. New Bedford was highly favored by having two women of so high professional ability and strength of character to serve its High School for so many years. Miss Austin taught here nearly forty years, and Miss Cranston taught here forty-three years. Because of the unusually long terms of their service, and the powerful influence they had exerted on the lives of their pupils and friends, appropriate memorial exercises were held by the school in the auditorium; and the school paper published many testimonials sent by pupils and teachers. My appreciation of the character and ability of Miss Austin and Miss Cranston has been expressed several times during the past year. I add again that I hold in grateful remembrance the fact that I had the honor and pleasure of associating with them as a teacher.

Following are the statistics for the school year:

	Commercial Courses			General Courses			Technical Courses			College Courses			Total		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
8	13	17	30	0	25	25	15	0	15	14	22	36	42	64	106

Respectfully submitted,

G. WALTER WILLIAMS,

Principal.

Evening High School.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—I respectfully submit the following report of the Evening High School for the year 1914-1915:

The school opened on the evening of October 5 and continued for twenty weeks, closing on the evening of March 13. During the Christmas recess the school was not in session for a period of three weeks.

The total enrollment, 596, was over forty per cent greater than the preceeding year and nearly the same per cent greater than the largest enrollment the school has ever had. The average attendance was also very good, being nearly sixty per cent greater than the preceding year, thus showing an increased tendency on the part of the pupils to attend the sessions more regularly. The enrollment continues to show a balance in favor of the male sex, the registration being 349 males and 247 females.

Classes were conducted in Bookkeeping, Stenography, Typewriting, Penmanship, Arithmetic, Civil Service, Mathematics and French. All these classes were well attended with the exception of the French class. While this class started out well, it was necessary to drop it before the end of the year because of lack of attendance. I recommend that in the future when new classes are requested by a group of prospective students, a deposit be required to insure their good faith. The class in mathematics had a fine record in attendance and accomplished some very good results, especially along the line of solutions of practical problems

brought in by members of the class, many of whom are employees in machine shops.

From the point of view of enrollment and attendance the school has, during the past year, made the most successful record in its history. If it were possible to accurately estimate the value of that which has been acquired by the pupils during this same time, I am sure the school would register a success from this standpoint also.

Respectfully submitted,

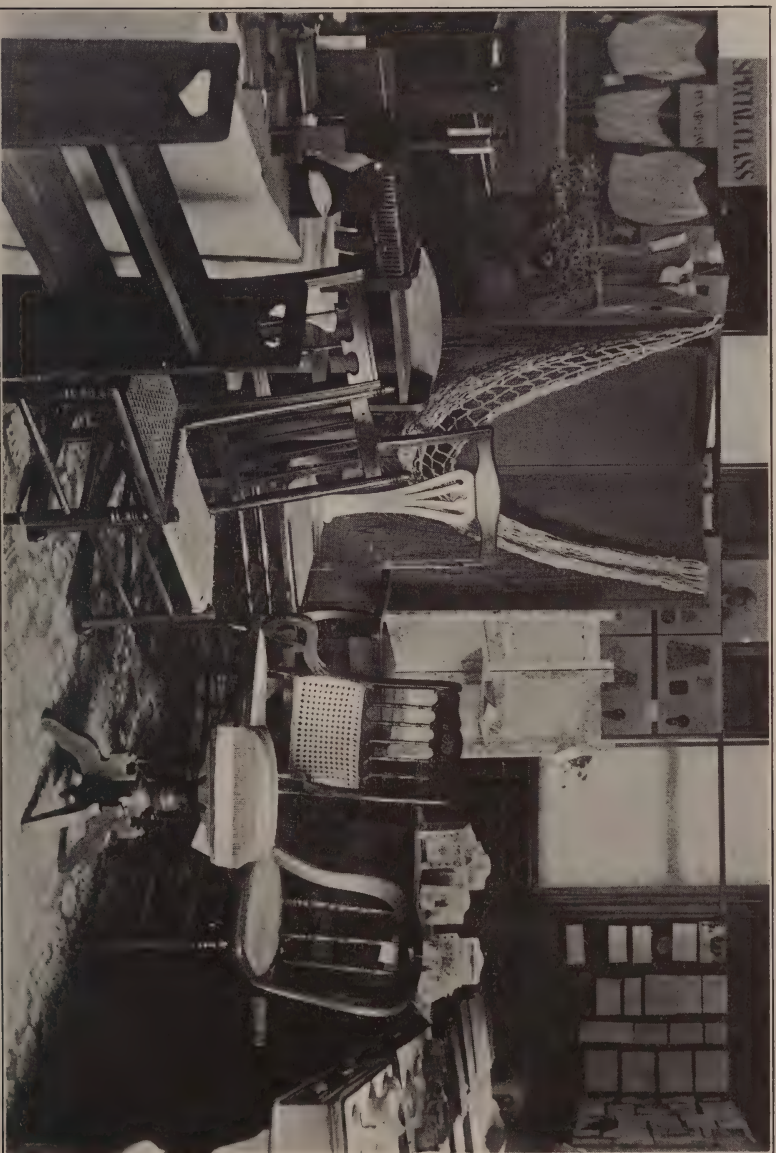

A. R. DORMAN,
Principal.

Report of the Supervisor of Drawing.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—Not long ago the writer had occasion to consult a workman in regard to placing some plaster casts upon the wall. As we talked he drew on paper the section of a bracket, showing how it supported the cast, the position of the bolts necessary for security, the depth and curve of the moulding—a shorthand sketch speaking to the eye, giving more direct and definite information than any expenditure of words addressed to the ear. It was the natural action of the man trained to work with his hands who wished to express structure so that another might realize it. We get our impressions of the outside world through our senses, more especially those of sight, hearing, and touch. Many of us are more dependent upon eye impressions than we are aware. Describe an object and our mental image is still vague. Give us something to look at, as a sketch or diagram, and we at once endow the object with form and structure. “Seeing is believing”, in more senses than one. Thus drawing is a language—a sort of visible speech. When the writer was teaching in a school for the deaf and watched children gain power to use this silent speech of form the parallel was often in mind.

Many persons seem to think that ability to draw is a heaven-bestowed gift dependent upon something called “talent”. Artistic expression does depend upon sensitiveness to impressions and is conditioned by individual power to express effectively, but drawing pure and simple, plain representation of the appearance of form or the setting forth of structural facts is within the grasp of anyone who will make the ne-

HAND WORK OF THE SPECIAL CLASSES

cessary effort to use his eyes and train his hand. It does require some effort and patience; so does success in any field. Good drawing calls for attention, observation, comparison, judgment, imagination, feeling, concentration, decision. Skill of hand comes with practice, like playing the piano or violin, in this case the pencil or brush being the instrument.

Everyone accustomed to work with children in school recognizes that they need training in habits of accuracy. Drawing is excellent as a means of teaching careful observation, clear thinking and accuracy of expression.

Drawing gives training in expressing the facts of form. Ability to read and to make a working drawing is necessary in the skilled trades. Drawing with the tool is the basis of all constructive work.

Nature has clothed animals and birds and decided the matter of their color, although even they have worked changes in protective coloring, but we human beings have the privilege and responsibility of selecting the color of our clothing and the furnishings of our homes. A girl needs to know what colors are harmonious and how to combine them. The future homemaker may be helped to distinguish between well designed and badly made furniture, a carpet which by reason of crude color and pattern has the effect of striking one in the eye or that keeps its proper place on the floor, and wallpaper which provides patients for the oculist or one that is restful and comfortable to live with, to select table furniture adapted to its purpose, pleasant to handle, agreeable to look at. A knowledge of some practical principles of design should help both boys and girls to appreciate what is well designed and structurally beautiful. When criticism is made of the design and color of fabrics or other articles for sale in the shops dealers invariably say that manufacturers supply what purchasers will buy.

Quite as important is it to lead the average boy and girl to see beauty of form and color in nature. Beauty lies about us on every side but often our eyes are closed until they are open-

ed for us by the finer vision and skilled hand of the artist. A knowledge of the principles underlying correct representation of the appearance of form leads to appreciation and enjoyment of good book illustration and of the work of the painter and sculptor.

Pupils should study the exhibition shown at the Swain Free School of Design and the New Bedford Public Library. The Public Library is most generous in its co-operation with the schools by lending photographs and prints, plates and books of reference.

Drawing touches all sides of school work. The supervisors wish it might be possible some time to have space in the annual report to illustrate by photographs the inter-relation of drawing with the various school activities. Such illustration would demonstrate more plainly than pages of description the aim and vitality of school drawing.

In primary and grammar grades drawing has to be done at the ordinary desks in the class rooms. An ideal arrangement would be to have a drawing room properly lighted and equipped in each grammar building where the pupils could work in charge of a special teacher, but in the present crowded state of the schools that is out of the question. In the High School, however, pupils work under conditions more like those of the studio and there are opportunities for craft work in metal, leather, embroidery. Students who are to enter technical schools may prepare themselves in mechanical drawing.

Students who possess special ability should take advantage of the excellent instruction offered by the Swain Free School of Design either in the Saturday morning or evening classes. It is greatly to be desired that the young people should realize the privileges afforded them which may be theirs for the asking and for the manifestation of an earnest desire for artistic cultivation.

High School pupils who are preparing for Normal School should be required to take drawing. In the elementary schools drawing must be taught by the grade teacher and some know-

ledge of the subject and practice to go with it is a necessary part of professional equipment.

The teacher's preparation for a drawing lesson should be as careful as that for a lesson in arithmetic or geography. The teacher's interest kindles the pupils' interest. A teacher who can draw is sure of an enthusiastic class.

There is a subtle influence which comes from environment; for that reason we try to make our school buildings attractive and beautiful and to have the pupils feel a pride in the appearance of the school. During the past year appropriate decorations have been placed in some of the schools, notably the library of the High School.

This leads to the thought of civic art and the development of a beautiful city. New Bedford is rapidly growing in industrial importance. It is beautifully situated and in common with many old New England towns is fortunate in possessing some stately buildings, dignified houses, and delightful gardens. While welcoming what is new we must not fail to hold in appreciation the fine things that have come to us from former days. As the city expands we must see that the new buildings are good in architecture, that streets are well planned and well kept, that there are sufficient breathing spaces and parks and that we may feel well-founded pride in our city. This spirit may be cultivated in the schools. The making of home gardens and the effort to beautify yards in which the children have shown such interest are ways in which they can help towards the city beautiful. The children of today are the future citizens and in their hands lie great possibilities.

Respectfully submitted,

LUCY C. BEDLOW.

Report of the Supervisor of Music.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—I herewith submit my report for the first complete year of my service as Music Supervisor in the New Bedford Schools. Since my first report there have been few changes in the schedule except an increase of five hundred per cent. in the time devoted to the High School, and the discontinuance wherever possible of the grouping of two or more classes. Where one hundred children sing together and are visited once a month by the supervisor a personal knowledge of the individual work done in the class room is impossible. I hope by a slight further change in the program to visit separately all classes except the eighth grades. I must report also that the supervisor's time is so required in the actual work of teaching in the class room that there is no time for supervision in its real sense. Under the present schedule the music teacher is in each room about one-half hour per month, and until there is an increase in the number of rooms this allotment of time can be maintained. The pupils have been uniformly courteous and there has been no lack of interest or enthusiasm in any class throughout the city.

Work in the primary grades is, in some respects, quite satisfactory but is handicapped by a lack of printed material preparatory to the use of our first book. The children enter the grammar grades as a rule with a very good idea of the way to use their voices. The methods used for the proper treatment of children's voices is so radically different from that used for adults that few appreciate the importance of this training. There is a decided improvement in the interest and

love of music. The time allowance for music in these grades is somewhat less than the general practice in this country.

In the grammar grades I am pleased to report that we have eliminated the study of the purely theoretical problems which are of little interest except to the professional musician. This has been of great benefit to the work. Classes have more time to sing, and are making good use of their time, and such tests as I have been able to give show that there has been no falling off in the knowledge of the really essential. The four upper grades are all using the same book which answers for the first three, but with the increased power to read and intelligently interpret these songs, more material is necessary for efficient work in the eighth grade. I would recommend the introduction of an additional book for that grade. While the day is long passed when public demonstrations of the value of school music were necessary, it is still desirable as a part of the musical training of children that they should sing in public more frequently than has been the local custom.

I am able to report a considerable gain in the music in the High School. The number of those electing music has increased from ten per cent. of the membership to about fifty per cent. and the interest has shown a corresponding improvement. The chorus has been divided into two sections of over two hundred each; the senior classes have also given one period a week to singing and about one-half of the members of the two glee clubs are availing themselves of that opportunity for music because conflicting studies prevent their attendance at the regular classes. While the growth of the work during the year has been very marked, it is necessary, if the music in the High School is to have the same high standing maintained in its other branches, that it be furnished with equipment in proportion to the number of pupils electing it and also suitable to the increased ability to appreciate good music. A number of musical selections have recently been furnished the school, and with additions to this from time to time we shall be able to avoid repetitions in the work. The two divisions are now ready to undertake the grade of work which high schools in

general have adopted and given the right material and opportunity, I am quite certain the High School would do its part toward the musical culture of the city.

The two glee clubs, which are entirely independent, have made a good start for boys and girls not having any previous musical training except that furnished by the schools; but like all new organizations, need the financial and moral encouragement which is naturally given older activities. While this is to be expected, the members have shown by their regular attendance after school hours, their faithful work, and their self support that no consideration except their interest in music has been the inducement for membership. I ask for them an increasing support for new music and an opportunity to appear before the public under favorable conditions.

The immense amount of money spent every year by the parents of pupils in our schools for private instruction in music in one form or another, seems to warrant the conclusion that the schools are not meeting the demand for musical training the majority of the parents desire their children to have. And if the wishes of the parents are to govern in this matter, it seems that the time has come for the schools to broaden somewhat in their relation to music. Practically every high school of the size of ours has introduced an elective course in music in some form in addition to the choral work. Such a course is especially needed by those who through the study of any one instrument have reached a point where they feel they have had a broad musical training. It would therefore seem desirable if our High School is to rank in music as it does in other subjects that the matter of the introduction of courses in Musical History, Appreciation and Harmony be investigated thoroughly, and if the number of those desiring such courses is such as to bring the cost per capita to a reasonable figure, that such work be added to our High School curriculum.

The value of musical instruments owned by the city and used in the various schools is considerable, and the Supervisor is making an effort to familiarize himself with those instru-

ments not so frequently under his observation as those with which he has to work in his routine visits. It is his intention to be of assistance to the principals in the care and proper use of this equipment, and also to have available such data regarding its length of service and efficiency as may be required.

Respectfully submitted,

HARRY E. WHITTEMORE.

Report of Playground Supervisor.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—I herewith submit the report of the Supervisor of Playgrounds for the season of 1915.

The sessions opened on July 12 and continued for a period of six weeks, closing on August 20. This was one week less than the session of the preceding year. In order not to take too much of the limited playtime of the children for organized classes, most of that type of work was eliminated. In its place was substituted athletics for the older girls. Classes in dancing were organized only where requests were sufficient in number to warrant taking the time. This allowed more latitude in the entertainment of the children and did not force work upon them that they considered disagreeable. The athletics for the girls was decidedly popular and proved to be a very satisfactory addition to the list of sports. Four grounds held special classes in dancing and all taught the dancing games to the smaller children.

The athletic meets were better conducted this year than ever before and a larger number of children participated in them. I believe one reason for this is that the men instructors were older and more experienced in teaching, and consequently were respected more by the children and more interest was taken in the undertakings they presented. Also the fact that the girls competed along with the boys added interest to the meets.

While there are faults that can be found with individual members of the playground corps, on the whole it was an exceptionally good force. The instructors were always ready to co-oper-

ate with the supervisor and they maintained very good discipline on the grounds throughout the session. The results they accomplished were demonstrated at the field-day.

The annual field-day was held at Buttonwood Park on Thursday, August 19. It was very largely attended and one of the most successful and satisfactory the playgrounds have ever held. Weather, the Park Authorities and the Teaching Corps united in giving the children a time to be remembered. The exercises were lengthened in order to keep the children occupied until six o'clock, as it was impossible to get the return trolley cars until that time. However, the day was occupied with some form of amusement up to the last minute. One of the most pleasing features of the day was the concert, from 1.30 to 4.30 given by the New Bedford School Band. The supervisor and the instructors are very grateful to the boys for their services.

Following is the program for the day:

MORNING.

Athletics.

- Boys' 75 yd. Dash.
- Girls' 50 Yard Dash.
- Boys' Potato Race.
- Girls' Relay Race.
- Boys' High Jump.
- Girls' Baseball Throw.
- Boys' Standing 3 Jumps.
- Boys' Running Broad Jump.

AFTERNOON.

1. Free Arm Exercises. All schools.

Norwegian Mountain March. Knowlton School.

[a] Swedish Schottische

[b] Dutch Dance

Lincoln School.

Gipsy Dance. Kempton School.

- [a] Clap, Clap, Clap.
- [b] How Do You Do, My Partner.
- [c] Hop Mor Anika.
All Schools.

- 2. Championship Newcombe Game.
Lincoln [North] vs. Congdon [South].
- 3. Championship Baseball Games.
First Teams--
Lincoln [North] vs. Hathaway [South].
Second Teams--
Lincoln [North] vs. Hathaway [South].

Winners--

Athletics—Lincoln School.
Newcombe—Congdon School.
Baseball—First Teams, Hathaway.
Second Teams, Lincoln.

I wish to thank Mr. Keith for his interest and kindly advice, and Mr. Ferguson, Inspector of School Property, for his valuable assistance.

Respectfully submitted,

A. R. DORMAN.

Report of School Nurses.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—I respectfully submit the following report for the schools of the centre.

Number of visits to the schools,	581
Number of visits to the homes,	760
Cases of defective vision,	205
Cases of defective hearing and breathing,	89
Tubercular tendencies,	10

The number of cases receiving attention are as follows:—

Defective vision,	125
Defective teeth,	64
Adenoids and tonsils,	61

Tubercular tendencies are having treatment at the Clinic.

For the kindly co-operation I wish to thank the Superintendent, Principals, and Teachers, also the Charity Organization, Children's Aid and the Tubercular Clinic.

Respectfully submitted,

FLORENCE RICKETSON, R. N.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—The report of the school nurse for the north end schools the past year is as follows:—

Number of visits to schools,	395
Number of visits to homes,	913
Number of cases of defective vision,	141
Number of cases of defective teeth,	317
Number of cases of adenoids and tonsils	} 151
Number of cases of defective hearing	

The number of cases that have received special medical attention, for defective eyes, teeth, adenoids, tonsils and ears are:

Defective vision,	88
Defective teeth,	350
Adenoids, tonsils, and ears,	70

The large increase in the number of cases of defective vision this year, comes from the investigation made by the Massachusetts Commission for the Blind. Although numbers of these cases had been treated and were wearing glasses, many had to be re-examined and new glasses provided.

The Charity Organization Society has more than met all our demands on their time and co-operation, and has supplied glasses in many of these cases.

A great need is felt in this work, by the school nurses, for a general clinic, where prompt medical attention may be given in all cases, thus avoiding long delays, which under the present system are unavoidable.

I wish to extend my thanks to the various clinics, organizations, teachers, principals, and all others to whom I am indebted for kindly co-operation.

Respectfully submitted,

MARGARET J. DIAZ, R. N.

MR. ALLEN P. KEITH, SUPERINTENDENT OF SCHOOLS:

Dear Sir:—The report of the school nurse of the south end schools for the year past, is as follows:

Number of visits to schools,	376
Number of visits to homes,	876
Number of cases defective vision,	252
Defective eyes with scars on cornea,	12
Conjunctivitis,	55
Keratitis,	15
Glasses provided for children,	174
Defective hearing,	54
Otitis Media,	54
Adenoids and tonsil cases,	135
Number of such cases operated upon,	80
Children in need of fresh air class,	24

An analysis of this report shows there are three needs which ought to be met.

First:— A greater number of fresh air classes so that all necessary cases may be sent to them.

Second:—An eye clinic is most urgently desired. This need is manifested by the great number of cases of defective vision. In such cases where glasses have been provided, there has been a noticeable improvement.

Third:— If there could be a nose, throat, and ear clinic, the health of many children would be better, and there would be fewer excluded cases. Many children have Otitis Media which involves a running ear. A clinic would take care of these cases and remove a cause of further disease, a certain bad odor from the school room, and a source of exclusion.

I wish to express my appreciation of the hearty co-operation of the Superintendent of Public Schools, Principals, and Teachers. My work has been made a great deal more effective by

the aid of the Charity Organization Society, Society for the Prevention of Cruelty to Children, Children's Aid, and several private charities. In addition to these, the Dental Clinic has continued its very satisfactory work.

Respectfully submitted,

M. THERESA McGRATH, R. N.

**REPORT OF THE DIRECTOR FOR THE YEAR ENDING
NOVEMBER 30, 1915, TO THE BOARD OF
TRUSTEES OF THE NEW BEDFORD
INDUSTRIAL SCHOOL.**

This report covers the period from November 30, 1914 to December 1st., 1915.

BOYS' DAY SCHOOL.

There has been real progress in all departments of the school during the past year, but it is clearly evident that much greater progress should have been made.

No manufactured product that can be readily marketed has yet been found for the Electrical Department, although some advancement has been made on definite lines. Mr. N. S. Rounds who was promoted to the position of Head of the department has given some evidence of fitness and potential ability to bring his department up to a high standard of efficiency. There have been but two instructors in that department since September 1st., making necessary a waiting list of pupils desiring to enter, and retarding the development of some product which has been started.

Some satisfactory progress in the matter of a marketable product has been made in the Machine Department, as a result of the liberal policy of the Board in the purchase of modern equipment, and also because of the conscientious efforts of the men in that department.

The three story addition 20ft. x 29ft. in size, planned and built by the boys in the Carpentry Department and located on the south side of the Cannon Street building, is practically

finished and the Machine Shop tool room has been moved from the center of the Machine Shop, where it covered valuable floor space, to the lower story of that addition. This change has made possible a new and much more practicable arrangement and location of the machines in that department.

In the Carpentry Department there is decided improvement in the quality of the work turned out. The faculty has been strengthened by the employment of E. M. McCracken as assistant, and he has been given classes in pattern making and cabinet work, also some classes in related subjects.

The product of the Power Department must of necessity consist of service to the school. The operation of the boilers and gas producer and the steam and gas engines for furnishing power, heat and light, with the care of steam, water and gas piping in all the school buildings, afford productive work of much educational value. When the real value of the opportunity in this department is better realized by the community, there will be a much larger renrollment there.

Under the Department of Related Work comes the arrangement and teaching of all class work, which includes the following; Mathematics, English, Drawing, Science, Civics and Business Law. The course of study in each department is carried out under the Head of that Department.

It is an advantage, whenever possible, to have the shop man teach the classes in Mathematics and Trade Science, because of their intimate connection with the work, and although for economic and other reasons, it has been found absolutely necessary to form classes, the school does provide special instruction, where it appears to be best for the pupil, up to the full capacity of the institution.

In the last year, the time given to drawing has been shortened, and Trade Science work introduced in its place. Under a more systematic method of teaching, the time now given to drawing is producing better results than formerly. This we are confident is a step toward the more efficient training of boys who will be skilled and capable mechanics, due to their technical knowledge and mechanical ability.

All pupils are now accepted on probation for one month, and this period may be extended at the request of the head of the department. At the end of this period of probation, the head of the department recommends the boy either for acceptance on regular standing in his department, trial in some other department, or that he go into some other school or employment. If at any time during his course a boy is not making reasonable progress in his work and studies, his parents are advised of the fact, and if after this notice there is no permanent improvement, the parents are requested to take the boy out of the school. This method has resulted in the prompt elimination of those boys who for any reason demonstrate that they are not fitted for the Industrial School work at that time, and by insistence on real progress and efficiency of the pupils, the quality and value of the school is increased, rather than its size.

As may be seen by the table of enrollment, the number of advanced boys in the school capable of commercial grade work was in 1913 ten, in 1914 fifteen and in 1915 thirty-one, a condition which is one of the factors making for increased efficiency in the school.

GIRLS DAY SCHOOL.

The most important change in the method of instruction the past year has been to organize the second year cooking class with the purpose of developing speed. The noontime meal for the ten teachers who patronize the lunch room has been put in charge of these girls, but instead of using the whole class as heretofore, this luncheon is assigned to four girls for a month, who do the marketing, plan the menus, prepare the food and keep the accounts. The cost must come within the twenty cents per meal paid by each teacher. This plan gives to each girl in the class such training that both teachers and girls feel confident that the girls are gaining a greater efficiency in the preparation of meals than they gained from last year's method of class work.

In the interests of health, with a six and a half hour day, these girls from fourteen to sixteen should have definite hours of physical training, especially when some of these days are given over so largely to sewing. A tentative arrangement is being worked out by which Miss Parker, the assistant in physical training in the public schools, will give what time she can spare to classes in the industrial school. When we can make these periods regular and frequent enough, the girls are sure to receive great benefit. Miss Mae Chandler, one of the regular teachers of the school, has this year volunteered to give much extra time to organizing and coaching a basketball team.

The development of the homemaking course throughout the state is in the line of developing the broader interests and sympathies of the girl as well as her skill in cooking, sewing and millinery. The registration this year again demonstrates the wisdom of shortening the course to two years. Only five girls returned this fall to enter on third or fourth year work. If there could be added to the two years homemaking course a term or a year's training for a specific occupation, there is little doubt that some of our more promising girls would avail themselves of this opportunity. A survey of the occupations in New Bedford open to girls from sixteen to twenty years of age, giving in detail the preparation required, working conditions, range of wages, opportunity for advancement, etc., would be a great help to trustees, advisory council and teachers, in developing a course in the school which would meet the needs of girls over sixteen who have completed the two years homemaking course. One possibility is a course in salesmanship, if co-operation can be established between the school and the merchants. But some certainty of employment at good wages would be a necessary incentive to the girls to prepare themselves for the work. The employment of several of our girls in the Little House-keepers Classes at the City Mission is giving valuable training. The girls might also get practice work in connection with the Day Nurseries of the city.

WOMEN'S EVENING CLASSES.

In the evening classes for women the work has been systematized and given definite direction.

The registration fee with the requirement of the State Board of Education that in the interests of good work no new member shall be admitted to any unit course after the third meeting of the class, is having its effect on the enrollment in the classes. A comparison of the figures for 1914 and 1915 is of interest in this connection.

	1914	1915
Registered in October and November	870	530
Number of classes organized,	37	33
Placed on waiting list,	130	35
Dropped out of classes between		
October and the Christmas vacation	350	58

These figures show that with better organization of the work, we are avoiding the unnecessary work and expense of providing classes for girls who enroll without serious motive.

There is persistent request for admission to the evening classes by girls under seventeen years of age. As the State will not reimburse a class for such girls, the suggestion is made that the Trustees consider establishing such classes under separate ordinance.

MEN'S EVENING CLASSES.

A smaller number registered for the evening classes in 1915 than in 1914, due in part to the registration fee required, for the first time this year, but in larger measure to the fact that many of our mills and factories are working at high pressure, and all mechanics, with the possible exception of the carpenters, are working full time. or more, at good wages.

The above report, together with the following statistical information, is respectfully submitted.

ARTHUR S. ALLEN,

Director.

ANNUAL REPORT

OF THE

SUPERINTENDENT OF STREETS

OF THE

CITY OF NEW BEDFORD, MASS.

TO THE
CITY COUNCIL

FOR THE YEAR 1915.

NEW BEDFORD
THE A. E. COFFIN PRESS, PRINTERS •
1916

Report of the Superintendent.

To His Honor the Mayor and City Council of the City of
New Bedford, Mass.—

Gentlemen:—In compliance with the requirements of the City Ordinances, I have the honor to submit herewith the annual report of the Street and Sewer Departments for the year ending Nov. 30, 1915.

ADMINISTRATIVE.

Pursuant to the policy adopted by the administration, contract work was practically eliminated during the year, two contracts only having been awarded for construction work, one for wood block paving and the other for granolithic sidewalks. It has been demonstrated that the construction work of the department can be done by the city forces as cheaply and as well as by contract.

STREETS.

During the year an asphalt plant was purchased for the purpose of mixing our own asphalt pavements and while the men employed on this work were without experience, the results obtained were generally satisfactory. I anticipate a marked improvement in this type of construction next season due to the experience gained this year.

A laboratory is being established at the City yard where materials of construction will be tested and proper mixtures secured.

Bituminous macadam has supplanted water bound construction and will gradually decrease the cost of maintenance, by reducing the amount of worn out stone (which

becomes mud when wet and dust when dry) that eventually finds its way into the gutters and catch basins, making this branch of street cleaning extremely expensive. The bituminous surface will also overcome the necessity of street oiling to lay the dust.

STREET CLEANING.

Bearing in mind that public health and comfort depend to a large degree upon the sanitary condition of the streets, the matter of street cleaning has been given considerable attention and study, and the various methods have been investigated, to determine if possible, the most suitable method to pursue in this city. From the experience of other cities, the conclusion reached is that permanent pavements should be flushed with water at least three times weekly, at night, supplemented by hand sweeping during the day.

In order to carry out this system the city purchased a power flusher which was used to good advantage and gave general satisfaction.

COLLECTION OF ASHES AND REFUSE.

Owing to the increasing difficulty in securing suitable dumping places and to the numerous complaints made relative to odors, smoke, loose papers, etc., coming from the dumps, the matter of disposal is one which will require serious consideration in the near future. The question of separate collection and disposal of ashes and combustible waste is being studied with a view to either burning the combustible materials or baling for commercial purposes.

An appreciable reduction in the cost of collection and disposal was made this year and it is hoped that a further reduction can be made in 1916.

BRIDGES.

It was found necessary during the year to lay a new deck on the Fairhaven bridge draw and on orders from the United States Government Engineers the cables carrying the power to operate the draw were lowered to a depth of five feet below the bottom of the channel. It will be necessary to replace about 700 feet of the railing on this bridge next season.

Considerable repairs were necessary to the floor of the Coggeshall Street bridge and the under structure was painted. It will be necessary to lay a new upper floor on this bridge early in 1916.

A reinforced concrete bridge of 10' span and a causeway 350 feet long with masonry slopes was built during the summer to replace the old double culvert and bank walls at Turner's Pond on Shawmut Avenue.

FORESTRY.

The work of this division has been carried on in a satisfactory manner throughout the year and I am pleased to state that the agent of the State Forester reports conditions throughout the city as being excellent. It probably will be necessary to expend a larger amount of money on spraying next season, in order to prevent an increase of insect pests, and to properly care for the young trees set out during the last two or three years. There is also an increasing demand for removal of trees.

SEWERS.

A comparatively small amount of sewer construction was done in 1915. The Tripps Brook Relief Sewer was completed to Kempton street and a 36 inch segment block sewer was built in Orchard street. The balance of sewers built were of vitrified clay pipe of various sizes. The department is well equipped to do this work efficiently and economically.

EQUIPMENT.

Although about \$14,000 was spent for new equipment during the year, further additions are required before the department can be brought up to date.

A tractor for hauling materials for construction, street oiling and flushing, is very much needed, as is also a larger truck for the street cleaning division, the small truck now in use to be used for delivering tools, etc., to the various jobs. A maintenance roller can be used to great advantage for rebuilding macadam streets, and a considerable saving in the cost of this work can be made thereby.

RECOMMENDATIONS.

The following recommendations are made for your consideration:

That the lot on North street owned by the City be sold and the two lots adjacent to the City Yard, which are now hired for storage purposes, be purchased.

That pockets for the storage of broken trap rock be erected on one of the City wharves or at a suitable point on the railroad.

That a new building be erected in the City Yard for storage of machinery and cement, it now being necessary to leave much of the apparatus in the open during the winter months.

CONCLUSION.

I should indeed be ungrateful did I not at this time express my appreciation of the many courtesies and assistance given me by His Honor, the Mayor, and the Heads of the various departments, and of the cooperation of my assistants and the men of the department to whom is due in a large degree whatever success has been achieved during the year. To these I extend my sincere thanks.

Respectfully submitted,

W. P. HAMMERSLEY,

Superintendent.

NEW BEDFORD — 1915.

GENERAL STATISTICS.

Population, estimated 111,000.

Valuation, \$111,346,538.00.

Area, about 19.39 sq. miles.

Accepted streets 186.60 miles.

Three bridges over the Acushnet River. New Bedford and Fairhaven bridge, 70 feet wide and $\frac{9}{10}$ mile long; $\frac{4}{5}$ maintained by New Bedford. Coggeshall Street bridge, $\frac{3}{4}$ maintained by New Bedford. Concrete bridge between New Bedford and Acushnet, built by County Commissioners in 1913.

11.13 miles granite block paving, area 166,959 sq. yds.

0.02 miles asphalt block paving, area, 273 sq. yds.

10.96 miles bitulithic and similar paving, area, 181,906 sq. yds.

0.34 miles brick paving, area, 12,128 sq. yds. New Bedford and Fairhaven Bridge.

0.04 miles cement concrete paving 261.00 sq. yds.

6.45 miles cobble paving, 67,874 sq. yds.

94.94 miles water-bound macadam 1,269,122 sq. yds.

10.24 miles bituminous macadam, 54,288 sq. yds.

136.02 miles curbing.

30.53 miles flag walks 89,908 sq. yds.

32.94 miles tar concrete walks, 142,547 sq. yds.

28.60 miles granolithic walks, 123,662 sq. yds.

126,223 miles Sewers.

Cost of sewer system to date (including intercepting sewer)
\$3,099,454.73.

1526 catch basins.

792 eye-holes.

REPORT

CITY OF NEW BEDFORD, MASS.,
OFFICE OF THE NEW BEDFORD WATER BOARD,
JANUARY 1, 1916.

To the City Council of the City of New Bedford:

GENTLEMEN:—In accordance with the provisions of the Water Ordinance, the New Bedford Water Board respectfully submit their forty-sixth annual report. Accompanying it, will be found the reports of the Water Registrar and the Superintendent.

The following abstract, drawn from the report of the Water Registrar, shows the financial operations of the past year in condensed form:

RECEIPTS.

Balance December 1, 1914,		\$ 4,241.07
Receipts from water rates,	\$304,717.29	
Receipts from other sources,	39,221.50	343,938.79
		\$348,179.86

PAYMENTS.

Management and repairs, less interest, bonds paid, and sinking funds,	\$117,479.76	
Extension of works,	80,897.97	
Interest paid,	75,300.00	
Interest paid Sylvia Ann Howland fund,	0,000.00	
Bonds paid,	21,000.00	
Sinking funds	27,930.00	322,607.73
Balance December 1, 1915,		25,572.13
		\$348,179.86

The actual outlay for the construction of these works, exclusive of debt, interest and management and repairs account is \$4,730,909.48.

On June 26th, William H. Pitman was elected a member of this Board for a term of three years ending June, 1918.

On September 23rd, Frederic H. Taber was elected a member of this Board to fill a vacancy caused by the death of Francis P. Washburn for the term ending June, 1916.

Of the forty-five petitions for the extension of main pipes received, forty have been granted, and the main pipes have been extended 3.08 miles.

In the matter of furnishing a supply of water to the Town of Dartmouth, we stated in our last report that on November 4th, 1914, we had sent a copy of a form of proposed agreement to the Water Supply Committee of the Town of Dartmouth for their consideration. On May 21st, a conference was held with a delegation of said Water Supply Committee, at which City Solicitor Woodward was present, for the purpose of adjusting all details covered by said agreement. At a meeting held on July 2nd, the following action was taken:

Voted:—Whereas the City of New Bedford proposes to supply metered water to the Town of Dartmouth, under authority granted by Chapter 188 of Legislative Acts of 1914, and upon the terms and conditions contained in an agreement dated July 1st, 1915, which has been executed between said City of New Bedford and said Town of Dartmouth, it is now,

Ordered:—That the Superintendent be instructed to proceed with the installation of the necessary piping, including the meter installations required to deliver water to the Town of Dartmouth, in Dartmouth Street and Kempton Street, at approximately the boundary line between New Bedford and Dartmouth. After the installation of pipes is completed and all terms and conditions complied with, the Superintendent shall, upon application from the officials of the Town of Dartmouth, deliver the water.

This order has been executed. The installation of piping in the Town of Dartmouth has been made in two sections, one in Dartmouth Street in the vicinity of Bliss Corner, supplied by the Dartmouth Street pipe, which supply was turned on October 1, 1915; the other in Kempton Street in the vicinity of Smith Mills, which supply was turned on November 12, 1915.

On February 5th, a hearing was held before the Legislative Committee on Water Supply at the State House, Boston, on a proposed bill authorizing the City of New Bedford to supply water to the Town of Acushnet. As the proposed bill was drawn in similar form to the enactment in favor of the Town of Dartmouth at the previous session of the Legislature, no objection was offered by the City, who was represented at the hearing by the Clerk of this Board. The following enactment was passed later.

[CHAP. 129.]

AN ACT TO AUTHORIZE THE CITY OF NEW BEDFORD TO SUPPLY
WATER TO THE TOWN OF ACUSHNET.

Be it enacted, etc., as follows:

SECTION 1. The city of New Bedford may furnish and sell by meter water to the town of Acushnet at the boundary line between said city and town at a rate to be agreed upon by the city and town, but which shall not be less than that prevailing in New Bedford.

SECTION 2. The town of Acushnet may at its own expense install mains, service pipes and all other equipment in the highways and other places of the town necessary to receive and distribute water purchased from the city of New Bedford. [*Approved March 8, 1915.*]

At this date no further move in the direction of introducing water into the Town of Acushnet has been made.

The long drawn out controversy between the United States Engineers and this department in regard to the removal of the syphon pipe upon river bottom, across the draw channel, south of the New Bedford and Fairhaven bridge, which pipe has for many years furnished the water supply to Popes Island, has been brought to a conclusion by the removal of said pipe and the dredging of the bottom to the depth prescribed by the government.

A complete history of this undertaking from the beginning is outlined in our last two annual reports. Last year we reported that the project for tunnelling the draw channel for the purpose of accommodating the passage of cables and pipes of the New Bedford Gas and Edison Light Co., the cables of the Union Street Railway Co., and the

pipes of this department, had, after a long study of the conditions been abandoned, and that the City Engineer had been requested to prepare plans for the installation of a new flexible jointed pipe to be located at sufficient depth to conform with all requirements set forth by the United States Government Engineers.

It was apparent early in the year that the government expected the removal of the pipe in question as speedily as possible as will be seen by the items which follow:

January 26th. Col. John Millis inquires regarding present status of the subject of pipe and when it is likely to be adjusted.

February 15th. Col. John Millis suggests that perhaps it would assist in the solution or facilitate some action if it were made known that the government suspends all channel improvement above the bridge until the pipe question is adjusted.

May 17th. Col. John Millis states that it does not appear profitable to pursue the subject further and accordingly no further (dredging) work at the pipe or above the bridge will be contemplated by the Government until such time as the City may be in position to correct the obstruction caused by the pipe.

May 21st. The New Bedford Water Board

Voted:—That the Superintendent be directed to proceed with the work of installing a proposed intermittent supply for Popes Island, and upon completion of same to remove the pipe upon the river bottom in accordance with plan outlined at this meeting.

July 14th. Superintendent requests permission of Col. Millis to delay removal of pipe for the period required by the Union Street Railway Co. to install salt water fire protection facilities at their car house on Popes Island.

July 23rd. Col. Millis names October 1st as the date that the removal of pipe will be satisfactory to the Government.

August 30th. Contract signed with Frank C. Taylor for a suitable lighter with appurtenances necessary for removal of water pipe from river bottom, including services of diver.

September 27th. Shut off supply on river bottom and commenced to remove pipe.

September 30th. Pipe entirely removed from river bottom.

October 2nd. Contract signed with John R. Burke of Boston, for dredging draw channel at location where pipe was removed, as agreed upon with Col. Sanford in 1908.

October 27th: Dredging contract completed.

December 14th. Under date of December 20th, Col. Millis writes that by direction of the Chief of Engineers and approval of the War Department, the Federal revokable permit issued to this City, August 12th, 1903, to lay a six-inch water main in the Acushnet River from Fish Island to Popes Island, was revoked on December 14th, 1915.

The total cost and maintenance of this Popes Island syphon pipe from the beginning of its service to the time of its complete removal this year has been:

FIRST PIPE 1898—1903.

1898, April-July	Pipe and Installation....	\$2,673.55	
1899, April	Repair leaks.....	303.92	
1899, Nov.-Dec.	Repair leaks.....	1,079.54	
1903,	Removing pipe.....	490.30	
			\$4,547.31

SECOND PIPE 1903-1915.

1903-1904	Pipe and installation...	\$4,571.06	
1905, May	Repair leaks.....	86.30	
1908, October	Repair leaks.....	278.52	
1912, August	Repair leaks.....	697.51	
1915, Sept.	Removing pipe..\$	262.11	
1915, October	Dredging contract	1,010.80	1,272.91
		\$6,906.30	
	Less value of scrap rescued	79.67	6,826.63
			\$11,373.94

The completion of the removal of the pipe from the river bottom, and the dredging of draw channel to a depth satisfactory to the United States Engineers, brings a long standing controversy to a final close.

The placing of a new permanent flexible jointed pipe beneath the river bottom and at a depth sufficient to be well below all government requirements we found to be such an expensive proposition that when we considered the small revenue assured by this supply we decided not to proceed in this direction at present.

As a substitute we have had a temporary intermittent supply placed. This consists of a two inch wrought iron pipe located on the south side of the bridge and crossing the draw. Detachable joints are maintained at both ends of the draw. This small pipe allows only a limited supply and it can be operated only in the night when the draw is not being used. The idea is to fill at night such tanks, cisterns or reservoirs as the users on Popes Island choose to maintain. They to apply this stored water for their daily requirements. This two inch pipe was laid during the summer. It was first used on September 27th. Its installation cost \$490.10. This cost includes changes in the brick well in Popes Island abutment, whereby a fire engine may attach suction and obtain a salt water supply through pipe which formerly connected with the fresh water syphon pipe.

In our last report we devoted considerable space to the recommendations offered by State Forester, F. W. Rane, in the direction of suppressing the spread of the gypsy moth within the forest reservations bordering upon the Quittacas Ponds. Immediate action was deemed necessary at that time to prevent the destruction of all the trees. P. D. Kneeland, Assistant State Forester, reports as follows regarding the operations of the past year:

"In view of the serious moth infestation threatened on the lands of the Water Works and after a thorough examination and inspection by the State Forestry Department, it was decided by the Water Department to cooperate with the State Forester in carrying on cutting operations along the lines suggested in the last annual report. These operations had the intention of removing most of the oak from the Water Shed and leaving and encouraging the pine so that in the future no further trouble from the moths could be anticipated, and the land could be put into the best possible condition, both from the forestry and aesthetic standpoints, as well as from the standpoint of conserving the water supply in its purity. The operations

were two fold. They consisted first in lumber and cordwood cutting, and second, in spraying with modern apparatus which was purchased for the purpose, of such oak and infested trees as were left uncut. To carry on the lumber operation a camp was built in regular Maine woods manner, a saw mill hired to put into lumber all the logs which were suitable. The remainder were chopped up into cordwood; about 600,000 feet of lumber were sawed up, much of which has already been sold to the railroads as ties and car stock, and the remainder is now drying in the lumber yard, and will soon be ready for sale. Over 3,000 cords of wood were cut and all of that is now either sold or under contract for sale at a price which will result in a small profit to the Water Works. The brush was all cleaned up and the land left in an orderly condition. It is already springing up to pine in many places, and in other places where it was possible to leave seed trees, it is confidently expected that pine will result. In a few places it will be necessary to plant. This year it is planned to continue the operation so as to complete practically the whole work. Not quite as much lumber or cordwood will be cut this year, but much of it is of better quality and so it is hoped that the operation will yield a larger profit to the city.

When the operation this year is finished, practically the whole area will be cleaned up and the moth problem will be solved. No future work need be expected except in a few cases where it was necessary for reasons of beauty to leave oaks, and also in a few places where brush cutting or planting are indicated.

A short time ago a working plan was made for these lands in which it was planned to accomplish these results in fifteen or twenty years. They are being done instead in two years and the results will be much better."

At a meeting of this Board held on October 20th, it was decided to continue the work of improving the forestry conditions through the coming winter.

In February last, the State made an appropriation to be distributed throughout the State for the benefit of the needy unemployed class who were willing to accept work upon the State Forest lands. Mr. Kneeland appeared before us with the statement that the State Forester, Mr. Rane, desired to allot a portion of this appropriation to the

work of thinning and clearing up along the roadside on the Quittacas Water Shed. The State to take charge of the hiring and payment of the men, and the City to pay the State \$1.50 per cord for each cord that should be produced that way. We accepted this proposition.

Twice, during the year, our opinion has been sought concerning the advisability of using the reservoir on Coggeshall Street for swimming and skating purposes. In both instances we replied at considerable length, stating that such use would render the water totally unfit for distribution to the water takers and consequently should not be considered as it would render useless, a most valuable asset which the City now possesses.

The following are the principal contracts which have been executed this year:

Date. 1915	Contractor.	Supply.	Consideration.
Feb. 8	The J. E. Budlong Press, New Bedford, Mass.	Printing reports	700 complete pamphlets \$185.00 400 extra printed sheets \$20.00
Feb. 10	Fitzhenry-Guptill Co., Boston, Mass.	Spraying machine.	\$1769.00
Mar. 26	E. Anthony & Sons, Inc., New Bedford, Mass.	Printing books, "Location of Stop Gates."	30 complete books \$109.00
April 3	Greene & Wood, New Bedford, Mass.	Cypress planks Cypress boards Spruce planks Spruce boards	\$51.50 per M. \$47.00 per M. \$27.00 per M. \$27.00 per M.
April 24	The Grasselli Chemical Co., Boston, Mass.	4000 lbs. arsenate of lead	\$0.04 ½ per lb.
June 12	New Bedford Boiler & Ma- chine Co., New Bedford, Mass.	Genuine wrought iron galvan- ized pipe	19 34/100c per lineal foot
July 1	The B. F. Smith Co., New Bed- ford, Mass.	Repairing chim- ney	\$890.00
July 23	The B. F. Good- rich Co., Bos- ton, Mass.	Rubber jacketed fire hose	70c per lineal foot

Aug. 30	Frank C. Taylor, New Bedford, Mass.	Removal of C. I. pipe from river bottom of channel be- tween Popes & Fish Islands.	Labor per day for oper- ation of lighter \$35.00. For diver and necessary ap- paratus \$20.00 per day
Oct. 2	John R. Burke, Boston, Mass.	Dredging	50c per cu. yd. meas- ured in scow
Nov. 10	Donaldson Iron Co., Emaus, Pa.	C. I. pipe and special cast- ings	30" pipe \$25.80 per ton 10" pipe \$27.10 per ton 8" pipe \$27.10 per ton 6" pipe \$27.10 per ton Specials \$54.00 per ton
Nov. 22	The Darling Pump & Mfg. Co., Ltd., Wil- liamsport, Pa.	Water valves	24 inch \$217.00

On July 12th, a contract was made by the Fuel Committee of the City Council with Garfield & Proctor Coal Co. for fourteen hundred gross tons of best quality Pocahontas coal, for use at the Little Quittacas Pumping Station, the same to be delivered at Braley's Station, at the rate of \$4.20 per gross ton.

In Memoriam

FRANCIS PETER WASHBURN.

Born September 23rd, 1842.

Died September 5th, 1915.

WHEREAS, A vacancy has been suddenly created in the membership of this Board by the decease of our highly esteemed associate, Francis P. Washburn.

RESOLVED: That we feel it to be fitting to testify our appreciation of the just conception of official duties and the thoroughness of their discharge which has always characterized Mr. Washburn's actions. Quick to perceive that which public interests required, he was equally prompt in taking measures to secure them. It is simple justice to his memory to record our full conviction of his clear perception, his practical good sense, his fidelity and integrity; and our regret at the loss which the public sustains in the death of so energetic and public-spirited a citizen.

RESOLVED: That in our official and personal relations with Mr. Washburn he has won our affection, respect and esteem by his admirable qualities and cheery disposition. He was always the optimist. The value of such a life is no more to be measured than the sunshine, for like the sunshine it brought joy to those with whom he came in contact and its wholesome influence will endure long beyond the sunset. To us his death is that of the loss of a cherished associate and friend.

RESOLVED: That these resolutions be spread upon the records of this Board, and a copy be transmitted to the family of the deceased.

Respectfully submitted,

EDW. R. HATHAWAY,	} <i>New Bedford</i>

Balance December 1, 1915,			25,572.13
			\$8,466,096.70

For many years an itemized list of the actual cost of construction has been omitted from this report. I have realized its importance, but urgent matters incidental to our rapid growth had to receive first attention.

This statement has not been compiled in itemized form since 1893, which was previous to the commencement of the "Further Supply," and several years before I took charge of this office.

In studying the last published itemized list I was convinced that many of the items were distributed into the wrong accounts.

For many months, as opportunity admitted, I have been engaged in an exhaustive examination of every item of expenditure from the commencement of the Water Works activities in 1869 up to the present time, in the determination of the proper classification of each item.

The result is shown in the following statements:

It will be noticed that there is no change in the total expenditure, but that many items belonging to maintenance appeared upon the construction account and vice-versa. The itemized list of costs herewith presented is based upon my work of revision.

Outlay for debt and management and repairs in 1915,	241,709.76
Outlay for extensions in 1915,	80,897.97
Less receipts other than water rates,	\$322,607.73
	39,221.50
Net expenditures in 1915,	\$283,386.23
Water receipts in 1915,	\$304,717.29
Water receipts in 1914,	303,487.60
Increase in 1915,	\$1,229.69
Received from City Departments:	
Water rates,	\$9,502.36
Miscellaneous accounts, labor, material, etc.,	12,358.78

There remains unpaid of 4 per cent interest: \$40.00 of 1914, and \$1,820.00 of 1915.

Respectfully submitted,

CLIFFORD BAYLIES,
Water Registrar.

REPORT OF SUPERINTENDENT.

NEW BEDFORD WATER WORKS,
SUPERINTENDENT'S OFFICE,
DECEMBER 1, 1915.

To the New Bedford Water Board:

GENTLEMEN:—The forty-sixth annual report of the Superintendent, for the year ending November 30, 1915, is herewith submitted:

Copies of the rainfall records at the Little Quittacas Pumping Station, and at the Long Plain Storage Reservoir appear upon the following pages.

The quality of the water continues to be excellent. The result of chemical examinations, made by the State Department of Health, of samples taken at various locations indicated is given in the following pages. The following communication received from X. H. Goodnough, Chief Engineer, State Department of Health, is in reply to an inquiry made by your Superintendent:

“In response to your request for an examination of the water supply of New Bedford, concerning which a recent communication to your department states that the chemical analyses made by this Department indicate considerable pollution, the State Department of Health has caused your sources of supply to be examined by its engineer and has considered the results of analyses of water as shown by the records in this Department and by samples collected recently from various parts of the system.

The water supply of New Bedford is taken from Little Quittacas Pond, which is supplemented with water flowing from Great Quittacas Pond, the water of these ponds being derived from an aggregate watershed area of 12.85 square miles, of which the area of the ponds comprises 2.35 square miles.

Analyses of the water of Great Quittacas Pond, which is the larger of the sources, show that there has been little

variation in the quality of this source for many years. The amount of chlorine in the water is approximately normal for the region, and the average amount present in the samples of water examined in 1914, for example, was a little less than was present in the samples examined in the year 1897, indicating that there has been no increase in the pollution of the water at least within a period of seventeen years. In other respects there is no evidence of deterioration within the long period covered by the examinations of this source.

The water of Little Quittacas Pond also, which has normally a low color, shows no material change for many years, except a slight increase in color due to an increasing admixture of the water of Great Quittacas Pond, which has a higher color.

A careful examination of the entire area of the watersheds of these ponds shows no evidence that pollution is entering the ponds or their tributaries at any point throughout the extent of their watersheds. At the extreme upper end of Black Brook, a tributary of Great Quittacas Pond, there are two small villages, but no pollution was found to be entering the streams from any of these buildings, and a very few of them are located in the neighborhood of the streams.

Many years ago the city wisely purchased the shores of these ponds throughout their extent and thus secured immunity from danger of pollution of the water by settlements in the neighborhood of the ponds. Their shores are clean and free from debris, and the works in general are in excellent condition from a sanitary point of view. The only dwellings in the country about the ponds are located remote from their shores in a region composed of a porous gravelly soil, from which there is no danger that serious pollution can find its way into the ponds.

Finally, bacterial examinations of the water at different points throughout the system during the present year show that the number of bacteria is very low and that the objectionable kinds are absent.

The results of these investigations show that the water supply of New Bedford as taken from these ponds is entirely satisfactory from a sanitary point of view and that no treatment of water, whether by chlorine or any other process, is necessary."

These samples were collected from
Old Storage Reservoir.

Scale of Color :—0—Colorless.
1—Yellowish brown tint.
2—Deep yellowish brown tint.

The surface of Great Quittacas Pond has varied from elevation 48.55 on January 1st, to elevation 51.80 on February 14th. At this date it is at elevation 49.65.

The surface of Little Quittacas Pond has varied from elevation 50.14 on January 26th, to elevation 43.79 on November 30th. At this date it is at elevation 43.81.

The forestry operations of the past year have been mentioned elsewhere. The planting of seedlings has been continued on a large scale.

The Quittacas Pumping Station, the Force Main, and the High Hill Distributing Reservoir are in excellent condition.

It was found necessary to further repair the chimney at the Purchase Street Pumping Station by removing the outside course of brick and replacing same with new brick and providing a new top. This was done under contract with the B. F. Smith Co., consideration \$890.00.

The distributing mains have been increased 24,250 feet and 7,983 feet of pipe laid in previous years have been removed. The total length of distributing mains at this date is 165.55 miles.

The thirty inch Encircling Main is now fully completed from Union Street south. The installation of this year included that portion in First Street, from Rivet to South; South Street, from First to Second; Second Street, from Madison to Union. To fully complete the plan of this Encircling Main there remains for installation that portion which lies between Union Street on the south and Bowditch Street, a short distance north of Weld Street at the north. I recommend that plans be made to do at least half of this work the coming year with the anticipation of fully completing the main in 1917.

The execution of your order for supplies to the Town of Dartmouth required the extension of our mains in Dartmouth and Kempton Street to the town line. In both cases the supplies are furnished through a six inch Hersey Detector meter, located upon a by-pass. These meters are placed in a brick pit and are easily accessible. Insulated joints have been placed by the Town of Dartmouth every 550 feet in the pipe line in Dartmouth Street from Rockdale Avenue to the end of the pipe, south of Bliss Corner and in Kempton Street from the town line to west of Smith Mills. There are six of these joints in Dartmouth Street

and fifteen in Kempton Street. This department has also placed one insulated joint in Kempton Street, 33½ feet east from the Dartmouth town line.

There have been twenty-five leaks upon the mains the past year as herewith shown:

			Cinder fill	

One thousand seventy-eight feet of small sized distribution pipe (less than four inch) has been laid. The total length now in use is 5,800 feet.

Eighty-eight new stop gates have been set and twenty of those previously set have been removed. The total number now in use is 2,207.

Four new small sized stop gates have been set and one of those previously set has been removed. The total number now in use is 109.

Four new waste gates have been set. The total number now in use is 168.

Twenty-five new stop gates for private supplies have been set and eight of those previously set have been removed. The total number now in use is 346.

Three new air taps have been set. The total number now in use is 170.

Seventy-five new hydrants have been set and twenty-nine of those previously set have been removed. The total number now in use is 1,350.

One watering cart hydrant of those previously set has been removed. The total number now in use is 73.

Four hundred thirty-one new service pipes have been laid and sixty-eight of those previously laid have been removed. The total number now in use is 14,770.

Two hundred nine service taps have been cleaned as follows: Sediment, 176; rust, 31; trouble inside, 1; eels, 1.

The total number of meters set in 1915 was	467
Number removed,	115
To be added,	352
Number in use December 1, 1914,	13,788
Number in use December 1, 1915,	14,140

This list may be divided as follows:

Manufacturing supplies,	226	
Domestic supplies,	13,914	
		14,140

The following is a list of the different makes of meters in commission: Crown, 216; Empire, 199; Empire Compound, 12; Nash, 423; Gem, 6; Trident Compound, 13; Trident Crest, 16; Trident Disc, 242; Hersey Torrent, 15; Hersey Rotary, 95; Hersey Disc, 3,007; Hersey Compound, 4; Hersey Detector, 5; Watch Dog, 5; Union Rotary, 118;

King, 7,312; Lambert, 1,276; Thompson, 3; Worthington Turbine, 7; Worthington Disc, 1,161; Keystone, 5.

Totals,	193	1014	1207	\$3340.88	

In my last report I stated that all of the horse drinking fountains throughout the City had been closed by reason of requests received from the Commissioner of Animal Industry, State House, Boston, and the local Board of Health. This was occasioned by the rapid increase of glanders in this City, it being suspected that the horse bowls were a contributing factor in the spread of the disease. Early in the Spring came many requests for a resumption of the service, but the bodies named above, together with the large owners of horses in this City, strongly advised against any measure which would allow two or more horses to drink from the same receptacle. We were requested to devise a fountain that would serve horses through individual pails, to be supplied by the driver. This we investigated, and found that it was not an easy matter to maintain such a type of fountain through freezing weather. We finally decided upon the type recently adopted by the Boston Water Department to meet exactly their condition. Most of the fountains in this City were of the horse bowl type known as the H. F. Jenks pattern. The horse bowls upon all of this type of fountain have been removed and new

castings containing three or more self closing faucets have been placed on the standard formerly supporting the horse bowl. This is designed to be a non-freezable device and no trouble is expected from that cause. The accompanying photograph gives a good idea of their appearance. I may add that this apparatus, as now maintained, is giving entire satisfaction to the community. I herewith include a list of these fountains.

Following is a complete list of the drinking fountains now in use:

1.	West French ave., at Cove st.,	3	Faucets
2.	Bolton st., at junction of Rivet st.,	3	Faucets
3.	Sixth st., at junction of County st.,	4	Faucets
4.	Allen st., at junction of Dartmouth st.,	3	Faucets
5.	Front st., at corner of School st.,	3	Faucets
6.	Union st., at corner of Bethel st.,	3	Faucets
7.	Hathaway rd., 1,964 ft. E. of Rockdale ave.,	Horse bowl	
8.	Kempton st., at junction of Mill st.,	3	Faucets
9.	County st., at corner of Smith st.,	Nash	
10.	Shawmut ave., at corner of Durfee st.,	3	Faucets
11.	Acushnet ave., at junction of Weld st.,	3	Faucets
12.	Acushnet ave., south of Tarkiln Hill rd.,	3	Faucets
13.	Belleville rd., between Acushnet ave. and No. Front st.,	3	Faucets
14.	Acushnet ave., at junction of Water st.,	4	Faucets
15.	Acushnet ave., at corner of Braley rd.,	2	Faucets

Jenks Type of Drinking Fountain as Remodeled, 1915.

An unusually interesting test of the capacity of the distributing system was made on Saturday afternoon, June 5th, 1915, in the yard of the Manomet Mills in this city. The underground yard systems of four mills, Manomet, Nonquitt Spinning Co., Nashawena, and Whitman are connected by 10" and 12" mains. The valves in these connecting pipes are normally kept shut, but when opened for an emergency, the combined fire protective equipment has available for a primary supply, public water through one 8" and six 10" connections, and for a secondary supply six 1000 gallon and four 1500 gallon Underwriter steam pumps, taking suction from the Acushnet River. In the test, hose streams were concentrated at the yard of the Manomet Mill where the fire pumps alone delivered 13,600 gallons per minute at an average hydrant pressure of 85 lbs., the public water supply alone 5,300 gallons per minute at 70 lbs. hydrant pressure, and fire pumps and public water supply combined gave a total discharge of 15,000 gallons per minute at 74 lbs. hydrant pressure.

The test was conducted by the Inspection Department of the Associated Factory Mutual Fire Insurance Companies, assisted by the officials of this department, in the presence of a large delegation of interested parties. The test was divided into three sections. In the first test, the fire pumps supplied all the water; in the second, the fire pumps and city water were combined; and in the third, the city water alone was used.

No attempt was made to make a spectacular demonstration by running the pumps at high speed and abnormally high pressure. In fact, the pressures were purposely kept down to those ordinarily used for fire duty and after the test it was found that some of the pumps had actually been run below normal speed.

The length of hose lines varied from 50 to 150 feet, according to location of hydrant.

The normal pressure upon the city hydrants in Riverside Avenue hydrants in front of the Manomet Mill is 86 lbs. This pressure was lowered only twelve pounds by the maximum draft, and on Bowditch Street it was lowered about two pounds. The gauge at the office of the Water Department, Municipal Building, about two miles distant, recorded a drop of only two pounds during maximum draft.

In the third test the excellence of the city water supply

was demonstrated when twenty 1 1/8" streams were obtained at 70 lbs. hydrant pressure, delivering more than 5000 gallons per minute.

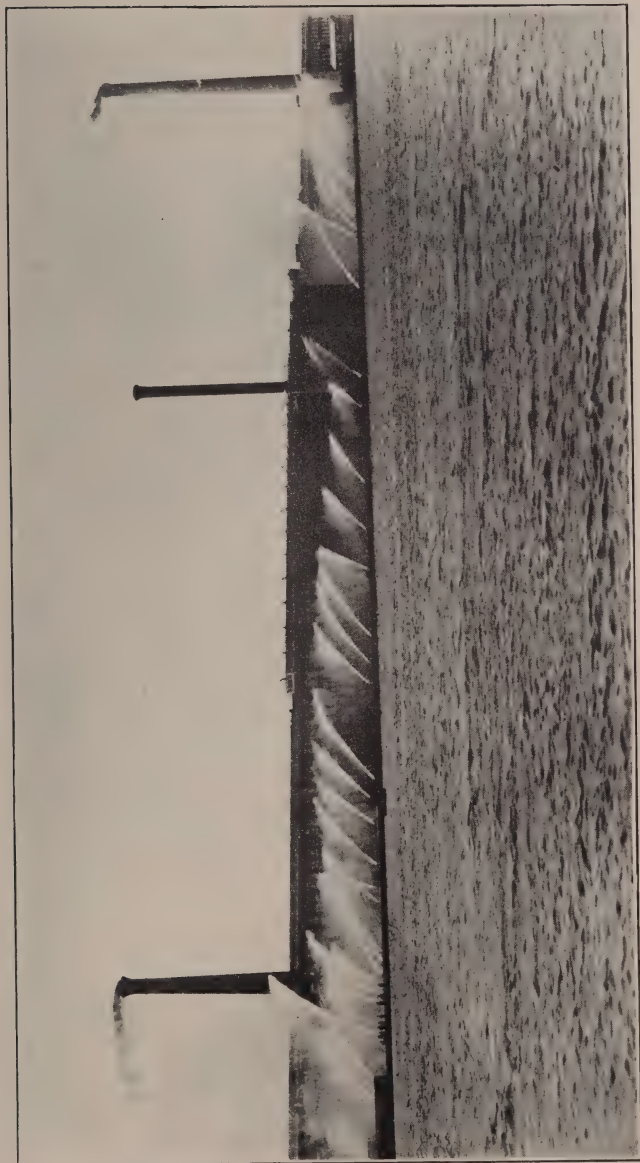

A searching investigation of the fire protective facilities of this city was made in August last by Engineers representing the Committee on Fire Protection of the National Board of Underwriters. Every detail of the Water Works plant was carefully inspected. All records and plans were examined and in some instances copies for future use of the committee were made. Tests of the capacity of the distributing system in various selected locations throughout the city were taken, and methods of operation in case of emergency were reviewed.

The published report of the work of this Committee is dated October, 1915. It states that the *special* recommendations contained in their previous report (March 1908), which they considered of such importance as to urge an early adoption had been complied with. The only suggestions, made in the report just issued, were those in the direction of continuing the best recognized practice in the installation of all new work.

It is safe to conclude, as the result of the two unusual tests just described, and from the complimentary statements which those conducting these tests have made to the writer that the entire plant is "up-to-date" and ample in capacity for present requirements, and that all parts are in excellent condition.

Respectfully submitted,

R. C. P. COGGESHALL,
Superintendent.

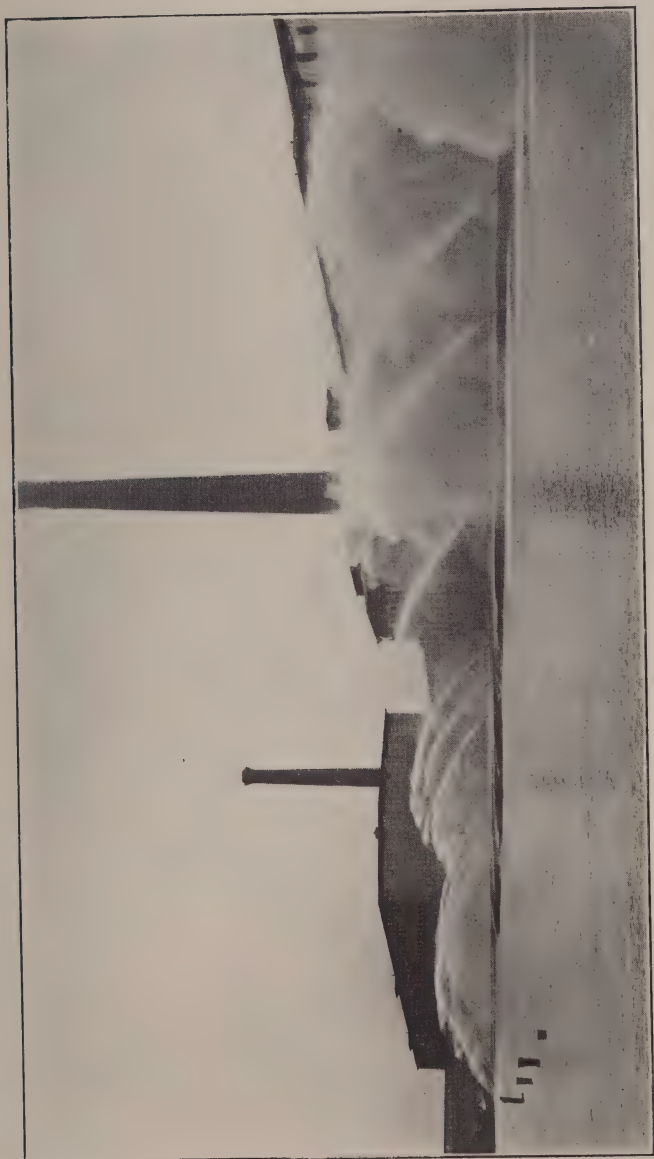

Forty-one Standard 1 $\frac{1}{8}$ -inch and two 2-inch streams. Total discharge 13,624 gals. per min. Average hydrant pressure 90 lbs. Supplied from fire pumps alone. Streams were directed purposely at a low angle because playing against a strong east wind, which was blowing. Picture taken from a point about $\frac{1}{4}$ mile distant.

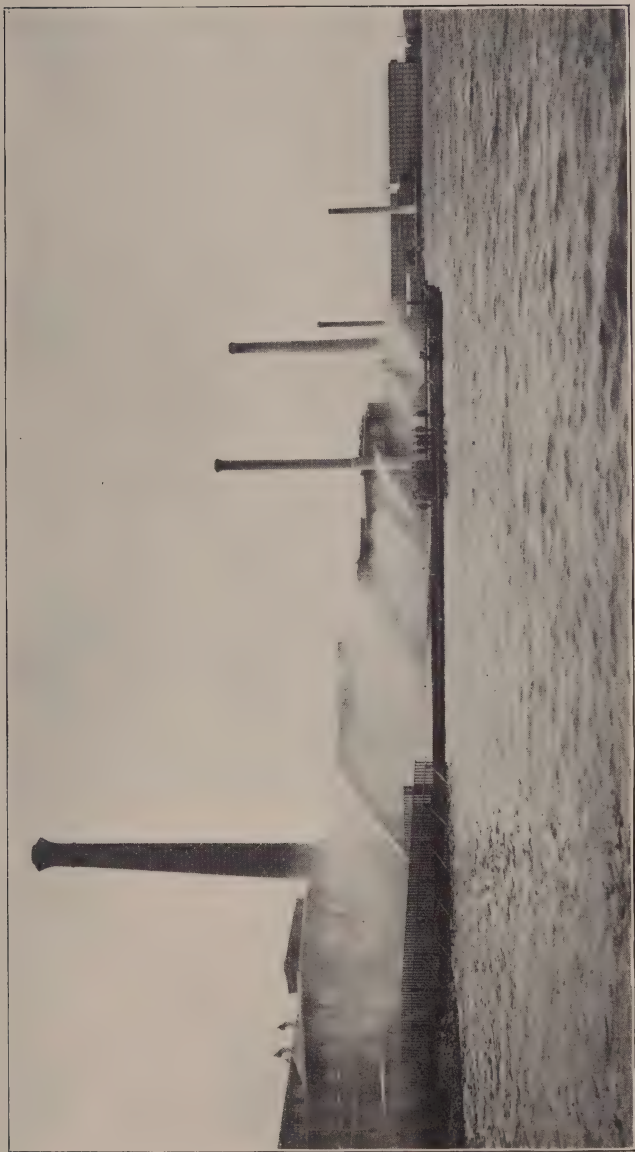

Had the streams been directed higher as at time of fire, they would have reached well above the roofs.

Near view of some of the 1 1/8-inch streams shown in No. 1, looking south.

Part of thirty-four 1 $\frac{3}{4}$ -inch streams looking south. Supplied from Public system and fire pumps combined. Total discharge 15,000 gals. per min. Average hydrant pressure 70 lbs

Twelve 1 1/2-inch streams looking north. Supplied from Public system alone.
Total discharge 3,450 gals. per min. Average hydrant pressure 80 lbs.—a loss
of pressure of only 10 lbs.

TABLE A.
STATEMENT OF WORK DONE BY LEAVITT ENGINE B FOR YEAR ENDING DEC. 1ST, 1915.

Diameter Steam Cylinder, 16% and 36 1/4 in. Average working steam pressure, 185 lbs.
Diameter Pump Plungers, 13 7-10 and 19% in. Average static head, 168.62 ft.
Stroke of Piston and Pump Plungers, 90 in.

MONTHS		Number of days or parts		Total pumping time		Total number of strokes per month	Average number of strokes per minute	Total fuel used for all purposes		Total number of gallons pumped per month, allowance being made for ship	No. of gallons pumped per pound of coal for total coal	No. of gallons raised 100 lb. coal for total coal	Average dynamic head against pump in feet; no allowance for friction in suction	Average duty in pounds raised 1 foot high per 100 lbs. of coal; calculated on total fuel used for all purposes. No deduction

------------------------------------	--------

SUMMARY OF STATISTICS

FOR THE YEAR ENDING 1915.

IN FORM RECOMMENDED BY THE NEW ENGLAND
WATER WORKS ASSOCIATION.

NEW BEDFORD WATER WORKS.

NEW BEDFORD,

BRISTOL COUNTY, MASS.

GENERAL STATISTICS.

Population by census of 1915, 109,568.

Date of construction, 1866 to 1869, inclusive. Further supply, 1895 to 1901, inclusive.

By whom owned, City of New Bedford.

Source of supply.—Water was first introduced on Nov. 26, 1869.

From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet River, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the city.

Mode of supply.—Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford Harbor) through a brick conduit 3 feet wide, 4 feet high, 5 6-10 miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase Street Pumping Station. Thence it was pumped into the Mt. Pleasant Distributing Reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distant, from whence it flowed by gravity into the city's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52' through a 48-inch steel force main $8\frac{1}{4}$ miles long) to a distributing reservoir (capacity 67 millions gallons; grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir it flows into the city's distributing system by gravitation through two 36-inch cast iron pipes averaging 4 1-17 miles in length.

The first named system is not now in use, but is held in reserve to meet any emergency which might occur.

PUMPING STATISTICS.

1. Builders of Pumping Machinery.
Purchase Street Station:
 - a. McAlpine engine,
built by Quintard Iron Works, Cap. 5,000,000 gals. per 24 hrs.
 - b. Duplex engine,
built by Henry R. Worthington, Cap. 3,000,000 gals. per 24 hrs.
 - c. High duty engine,
built by Henry R. Worthington, Cap. 5,000,000 gals. per 24 hrs.
 Little Quittacas Station:
 - a. b. Leavitt engines in duplicate, Capacity of the two engines
built by Dickson Mfg. Co., 20,000,000 gallons per 24 hrs.
2. Description of fuel used.
 - a. Kind—bituminous.
 - b. Brand of coal—Pocahontas.
 - c. Price of coal per gross ton—delivered Little Quittacas Station, \$4.41.
 - d. Percentage of ash—7.
 - e. Wood, price per cord—none used.

LITTLE QUITTACAS STATION—Engine B.

3. Coal consumed for the year—3,264,220 lbs.
4. [Pounds of wood consumed] ÷ 3 = equivalent amount of coal—none used.
5. Total equivalent coal consumed for the year = (3) + (4),
3,264,220 lbs.
6. Total pumpage for the year—2,759,787,006 gallons, with allowance for slip.
7. Average static head against which pumps work—168.62 feet.
8. Average dynamic head against which pumps work—185.43 feet.
- 9a. Number of gallons pumped per pound of equivalent coal (5)—844.
- 9b. Number of gallons raised 100 feet per pound of equivalent coal (5)—1565.
10. Duty = $\frac{\text{gals. pumped (6)} \times 8.34 \text{ (lbs.} \times 100 \times \text{dynamic head (8))}}{\text{Total fuel consumed (5)}} = 130,750,148$
Cost of pumping, figured on pumping station expenses, viz.:
 \$22,681.00
11. Per million gallons pumped—\$8.22
12. Per million gallons raised one foot (dynamic)—4 $\frac{1}{10}$ cents
Cost of pumping figured on total maintenance and interest on bonds, (see financial CC+DD) viz.: \$192,779.76
13. Per million gallons pumped—\$69.85
14. Per million gallons raised one foot (dynamic)—37 $\frac{7}{10}$ cents

FINANCIAL STATISTICS.

RECEIPTS.		EXPENDITURES.

CITY ORDINANCES

PASSED BY THE CITY COUNCIL

OF THE

CITY OF NEW BEDFORD,

MASSACHUSETTS

FROM JUNE 1, 1915 TO JUNE 1, 1916

ONE WAY STREETS.

AN ORDINANCE REPEALING AN ORDINANCE ENTITLED "AN ORDINANCE REGULATING TRAFFIC ON CERTAIN STREETS."

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. An ordinance entitled "An Ordinance Regulating Traffic on Certain Streets" passed to be ordained October 27, 1910, and approved October 28, 1910, is hereby repealed.

Section 2. This ordinance shall take effect upon its passage.

In Board of Aldermen, June 16, 1915. Passed to be ordained.
EDW. R. HATHAWAY, Mayor.

In Common Council, June 16, 1915. Passed to be ordained.
JAMES F. COLLINS, President.

Presented to and approved by the Mayor, June 17th, 1915. A
true copy attest:— W. H. B. REMINGTON, City Clerk.

AN ORDINANCE AMENDING AN ORDINANCE ENTITLED "AN ORDINANCE REGULATING THE PASSAGE OF VEHICLES IN THE STREETS."

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. Section 1, paragraph 31 of an Ordinance entitled, "An Ordinance Regulating the Passage of Vehicles in the Streets;" passed to be ordained September 11, 1913, and Approved September 12, 1913, is hereby amended by striking out the whole of said section, the said section being under the heading "One Way Streets."

Section 2. This ordinance shall take effect upon its passage.

In Board of Aldermen, June 16, 1915. Passed to be ordained.
EDWARD R. HATHAWAY, Mayor.

In Common Council, June 16, 1915. Passed to be ordained.
JAMES F. COLLINS, President.

Presented to and approved by the Mayor, June 17th, 1915. A
true copy attest:— W. H. B. REMINGTON, City Clerk.

JITNEY ORDINANCE.

AN ORDINANCE REGULATING THE TRANSPORTATION OF PASSENGERS, FOR HIRE, BY MEANS OF MOTOR VEHICLES.

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. On and after July 1, 1915, no person shall engage in the business of transporting in the City of New Bedford passengers for hire by means of any motor vehicles, not running on tracks or rails, and operated for the purpose of affording a means of treet transportation similar to that ordinarily afforded by street railways by accepting and discharging passengers along the route traversed by such vehicle, without first obtaining from the city clerk of said city a special annual license for each vehicle to be employed by such person in said business, and unless such license for such vehicle is in force. Such vehicle so employed in said business is termed a "motor bus," and is not deemed a hackney carriage, but is a vehicle subject to all street traffic regulations so far as applicable and consistent herewith.

Section 2. The city clerk of said city, in accordance with the provisions of Chapter 141 of the Acts of the Legislature of 1914, is hereby authorized to grant to any persons including individuals, firms and corporations, residents within this state, applying therefor and deemed by him suitable to conduct such business, such special license for such vehicle, but said city clerk shall not grant such license for any such vehicle until the same has been inspected by the chief of police, or some person designated by said chief of police, and until it has been reported by the said chief of police to the city clerk, in writing, that the said vehicle is in safe and proper condition for use in said business. Such license shall expire at twelve o'clock, midnight, on the thirtieth day of June next succeeding the date thereof. The name, place of residence and postoffice address of the licensee, a brief description of the vehicle licensed, the serial number of the license and the term of the license shall be stated on the license. The application for such license shall be on a blank furnished by said city clerk, and said city clerk may require such application to be sworn to before an officer authorized to administer oaths. Said city clerk

shall keep a record of each such license issued. A fee of one dollar shall be charged for said examination by said chief.

Section 3. Said license for such bus shall be carried, at all times during the operation of said bus in any public street or place, by the driver thereof, and said driver shall, at all times, upon request of any police officer of the City of New Bedford, display said license. Failure or refusal to display said license shall be cause for revocation of said license at the discretion of the Board of Aldermen of the City of New Bedford.

Section 4. The license fee for such license, which shall be paid to the city clerk before the issuance thereof, shall be one dollar. Said city clerk shall issue to the licensee a metal seal bearing the words "Licensed Motor Bus No—" setting forth the serial number of the license, and for said seal shall collect one dollar before the issuance of said license. Said seal shall be attached to and kept on the dash of the bus at all times during the license term when said bus is in use in any street or public place in said city.

Section 5. No person shall drive, operate or be in charge or any motor bus in any street or public place in said city without first obtaining a special motor bus driver's license from the city clerk, who is hereby authorized to issue the same. No such license shall be granted to any person under the age of eighteen years, or not a resident of the state, and no such license shall be granted to any person who does not possess a chauffeur's license, issued to him by the Massachusetts Highway Commissioners, and in force at the time when such application is made. Such special motor bus driver's license shall expire at twelve o'clock, midnight, on the thirtieth day of June next succeeding the date thereof. The application for such motor bus driver's license shall be made on a blank furnished by the city clerk, and said city clerk may require such application to be sworn to before an officer authorized to administer oaths. The name, place of residence and postoffice address of the licensee, a brief personal description of the licensee sufficient for identification, the serial number of the license, and the term of the license, shall be stated in the license. It shall be a condition of the license that the licensee shall, at all times, during his operation of any motor bus in any public street or place, display such license upon request of any police officer of the City of New Bedford. Failure or refusal to dis-

play said license shall be cause for the revocation of said license at the discretion of the board of aldermen of the City of New Bedford. The city clerk shall keep a record of each such license issued. The fee for such license shall be one dollar.

Section 6. The city clerk, at the time of issuing such motor bus driver's license shall deliver to the licensee a distinguishing badge, made of metal or other suitable material, bearing the words "Motor Bus Driver's License, No. —, New Bedford, Mass.," setting forth the serial number of the license, and shall collect therefor, from the licensee, before the issue of the license, one dollar. Said badge shall be worn upon the right breast of the outer garment of the licensee at all times when he is driving or in charge of any motor bus in any street or public place of the city. No such licensee shall permit any other person to wear such badge, nor shall any person wear the badge of any other licensee while driving or in charge of any motor bus in any street or public place of the city.

Section 7. The west side of Pleasant street, adjacent to the curb, between Elm and Mechanics streets, is hereby designated as a stand for motor buses whose route is from the center of the city northerly and return. The west side of Pleasant street, adjacent to the curb, between Mechanics and William streets, is hereby designated as a stand for motor buses whose route is from the center of the city southerly or westerly and return. In using said stands, every motor bus shall face to the south. In approaching said stands, every motor bus shall proceed to the south from Elm street. In leaving said stands, every motor bus shall proceed southerly on Pleasant street to William street, and so on. No motor bus shall stand or wait for passengers in any other location in the area bounded by Middle street, Acushnet avenue, Spring street and Sixth street. No motor bus shall stand or wait for passengers in the places here indicated, for a period of more than ten minutes, and the driver of every motor bus, on request of any police officer of the City of New Bedford, shall forthwith move said bus, as directed by said police officer. Failure to so remove said bus shall be cause for the revocation of the license granted for the use of said bus, and cause for the revocation of the license granted to the driver, within the discretion of the Board of Aldermen.

The Board of Aldermen may, from time to time, by order adopted at any meeting of said board, change the locations of

said stands, and designate new stands in any part of the city, as in their judgment the convenience of the public requires, making such traffic rules in connection with such designations as they may deem necessary.

Section 8. No person shall drive or cause to be operated any motor bus unless the same be equipped with proper non-skidding devices when operated in any public street or place where there is snow or ice, or where the surface of the street is in such condition that travel by motor is dangerous without the use of non-skidding devices. Violation of this section shall be cause for the revocation of the motor bus license and the driver's license in the discretion of the Board of Aldermen.

Section 9. Violation of any law of the Commonwealth made with relation to the operation of automobiles, or violation of any traffic ordinance of the City of New Bedford, shall be cause for the revocation of any motor bus license, or the revocation of any motor bus driver's license, granted and issued under authority of this ordinance.

Section 10. Every licensed motor bus shall be held subject to examination by the Chief of Police, or some person designated by him, without expense to the owner, if said Chief of Police deems such examination expedient and desirable for the safety of the public.

Section 11. No greater number of passengers shall be carried at any one time in any motor bus, and no person driving or in charge of any motor bus shall take on or suffer or permit any more persons to ride or be carried therein at any one time than such bus has seating capacity for according to the manufacturer's rating thereof; providing that in addition thereto children under seven years of age may be carried therein in arms or seated on the laps of parents or adult persons accompanying them, but no passenger with a child in arms or seated on the lap shall be admitted to any front seat beside the driver.

Section 12. No person driving or in charge of any motor bus shall permit any person to stand on the running board or step thereof, or to sit on any fender, dash or door thereof, while the bus is in motion.

Section 13. No driver or person in charge of any motor bus shall stop the same to receive or discharge any passenger except at the street curb, or permit any passenger to enter or leave the same except from the side thereof nearest the street

curb, but this latter provision shall not apply to a passenger on the front seat where the driver's seat is on the side of the curb.

Section 14. No person driving or in charge of any motor bus nor in any way connected with any motor bus shall solicit passengers by outcry or operate any noise or other device for the purpose of soliciting passengers.

Section 15. No person driving or in charge of a motor bus shall refuse to carry any person offering to be carried as a passenger therein, unless the seats of the same are fully occupied, except any person intoxicated or acting in a boisterous manner or at the time using profane or obscene language.

Section 16. Every person driving or in charge of a motor bus shall report to the Chief of Police every article left therein by any passenger, in addition to fulfilling the requirements of Chapter 94, Revised Laws.

Section 17. Any person violating any of the within rules, restrictions, requirements or regulations shall be liable to a fine of not exceeding twenty dollars (\$20.00) for each offence. Conviction in any court in the Commonwealth of such violation shall also be cause for revocation or suspension of his license by the Board of Aldermen, and no new license to engage in the business set forth in Section 1 of this ordinance shall be issued until after the expiration of the term for which the revoked license was issued. The Board of Aldermen may, without notice or hearing, suspend any license granted and issued under the provisions of this ordinance for cause deemed by them sufficient, such suspension to be for not more than thirty (30) days; and the Board of Aldermen may, after notice and hearing, said notice to be mailed to the address given by the licensee in his application for said license not less than five days prior to said hearing, revoke any such license for cause deemed by said Board to be sufficient.

Section 18. This ordinance shall take effect upon its passage.

In Board of Aldermen, June 24, 1915. Passed to be ordained.
EDWARD R. HATHAWAY, Mayor.

In Common Council, June 24, 1915. Passed to be ordained.
JAMES F. COLLINS, President.

Presented to and approved by the Mayor, June 25, 1915. A
true copy attest:— W. H. B. REMINGTON, City Clerk.

CITY ORDINANCE.

AN ORDINANCE AMENDING AN ORDINANCE REGULATING THE PASSAGE OF VEHICLES IN THE STREETS.

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. An ordinance entitled "An Ordinance Regulating the Passage of Vehicles in the Streets," passed to be ordained September 11, 1913, and approved September 12, 1913, is hereby amended by adding at the end of Paragraph 13 of Section 1 of said ordinance, the following: "No vehicle shall pass a corner where there is stationed a traffic officer in uniform, without a signal from the officer. This provision shall apply to street cars." So that said paragraph shall read as follows: "13. At all times drivers of vehicles must stop the same on a signal from a police officer in uniform. No vehicle shall pass a corner where there is stationed a traffic officer in uniform, without a signal from the officer. This provision shall apply to street cars."

Section 2. Paragraph 36 of Section 1 of said ordinance is hereby amended by inserting after the words "street cars," the words "unless specifically included," said that said paragraph shall read as follows: "36. The word 'vehicle' herein shall include horses hitched to vehicles, horses ridden or led, motor vehicles of all kinds, bicycles, tricycles propelled by hand, and everything on wheels or runners, except street cars unless specifically included, and light carriages for the conveyance of children."

Section 3. This ordinance shall take effect upon its passage.

In Board of Aldermen, June 23, 1915. Passed to be ordained.
EDWARD R. HATHAWAY, Mayor.

In Common Council, June 24, 1915. Passed to be ordained.
JAMES F. COLLINS, President.

Presented to the Mayor for approval June 25, 1915. Approved by the Mayor July 2, 1915. A true copy, attest:—

W. H. B. REMINGTON, City Clerk.

Assistant Superintendent of Public Buildings.

CITY OF NEW BEDFORD.

In the Year One Thousand Nine Hundred and Sixteen.

AN ORDINANCE AUTHORIZING THE APPOINTMENT OF AN ASSISTANT SUPERINTENDENT OF PUBLIC BUILDINGS.

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. Annually in the month of April, the Superintendent of Public Buildings may appoint, subject to confirmation by the City Council in convention, an Assistant Superintendent of Public Buildings, who may be removed, for cause, after hearing, by the Superintendent of Public Buildings and whose compensation shall be fixed by the City Council.

Section 2. The Assistant Superintendent of Public Buildings shall be under the direction of the Superintendent of Public Buildings and shall assist him in his duties; and in the absence of the Superintendent of Public Buildings or a vacancy in that office he shall discharge the duties of Superintendent of Public Buildings.

Section 3. All ordinances and parts of ordinances inconsistent herewith are hereby repealed.

Section 4. This ordinance shall take effect upon its passage.

In Board of Aldermen, April 4, 1916. Passed to be ordained.
EDWARD R. HATHAWAY, Mayor.

In Common Council, April 4, 1916. Passed to be ordained.
JOHN H. HOLLIHAN, President.

Presented to and approved by the Mayor, April 6, 1916. A true copy attest:—
W. H. B. REMINGTON, City Clerk.

Moving Buildings and Obstructing Sidewalks and Streets.

AN ORDINANCE RELATING TO MOVING BUILDINGS AND OBSTRUCTION OF SIDEWALKS AND STREETS FOR BUILDING PURPOSES.

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. Every application for the moving of a building in any street in the city shall be in writing, signed by the owner or by some person by him duly authorized in writing so to do, and shall state:—

(a) The dimensions of the building and the materials of its exterior and roof.

(b) The location from which and to which it is to be moved, with street and number in each case.

(c) The use to which it has been and is to be applied.

(d) The route over which it is proposed to move the building, and the method of said moving.

(e) The trees and other property liable to injury upon the streets or ways through which the building is to be moved.

(f) Whether the moving will require the cutting of electric wires or the obstruction of street railway traffic.

Such application shall be accompanied by the written consent of the superintendent of streets, and a written statement of the superintendent of public buildings that the proposed location and use will not be a violation of the laws and ordinances relating to buildings and if in his opinion the building is of sufficient strength to be safely moved.

Section 2. Every application for the obstruction of the whole or part of any sidewalk or street in the city for building purposes shall be in writing, signed by the owner or the contractor or builder, or by some person by him or them duly authorized in writing so to do, and shall state:—

(a) The approximate size of the lot and the ground dimensions of the building to be constructed, rebuilt or repaired.

(b) The number of said building on the street and the side of the street by compass designation.

(c) The materials of the outside walls of said building.

(d) The time provided in the contract for the construction of said building, if no contract the estimated time required to complete the construction, rebuilding or repairs.

(e) The space proposed to be obstructed in the street or sidewalk and the time for which said space is applied for.

(f) The nature of the obstruction and provision to be made for foot travelers in the highway.

Such application shall be accompanied by the written consent of the superintendent of streets, and the superintendent of public buildings.

Section 3. No permit shall be granted for the moving of a building in the streets of the city until the requirements of section one have been complied with, and if granted, the permit shall be granted upon the following terms:—

(a) That sufficient barriers and lights shall be maintained wherever the building is in the streets.

(b) That streets shall not be unnecessarily obstructed, and, so far as possible, safe and convenient ways for the use of foot travelers and vehicles shall be maintained around the building.

(c) That all chimneys be removed down to the roof.

Section 4. No permit shall be granted for obstructing the sidewalks or streets of the city for building purposes until the requirements of section two have been complied with, and if granted, the permit shall be granted upon the following terms:—

(a) That sufficient barriers and lights shall be maintained.

(b) That sidewalks or streets, shall not be unnecessarily obstructed, and so far as possible, safe and convenient ways for the use of foot travelers and vehicles shall be maintained around or under the obstructions.

Section 5. In case of injury or damage to a street, way or property caused by the moving of said building, or by the obstruction of said sidewalks and streets, the owner of such

building or the contractor or builder shall at his own expense restore streets, ways and property to a like condition as before such moving and to the satisfaction of the superintendent of streets. Provided; however, that when a street has been paved or laid with macadam, asphalt, granite, wood block, or other paving material, the work of putting the street in condition for travel shall be done by the City of New Bedford, and the person, firm or corporation to whom the permit is granted shall pay the cost of the work so done, which may be recovered in an action of contract. The owner of said building or the contractor or builder shall hold the City of New Bedford harmless and indemnified from all loss, cost, damage, expense and liability on account of the moving of said building or of the obstruction of said sidewalks and streets and give a bond to said City of New Bedford of not less than five hundred dollars satisfactory to the city clerk therefor, substantially in the following form:—

KNOW ALL MEN BY THESE PRESENTS that.....

.....

 are holden and stand firmly bound unto the City of New Bedford, a municipal corporation duly established according to law, in the sum of

 dollars to the payment of which to the said City of New Bedford, its successors and assigns, we hereby bind ourselves, our successors, heirs, executors and administrators. The condition of this Obligation is such that,

WHEREAS the said

 has been granted a permit for moving a building or obstruction of sidewalks and streets in the City of New Bedford.

NOW THEREFORE, the Condition of this Obligation is such that if the said

 to whom said permit has been granted shall keep and perform all the requirements of the ordinances of the City of New Bedford relating to the moving of buildings, or the obstruction of sidewalks and streets for building purposes, and of said permit, and save said city harmless and indemnified from all loss,

cost, damage or expense in consequence of the moving of said building or the obstruction of said sidewalks and streets and the occupation of ways therefor, then this obligation shall be void, otherwise it shall be and remain in full force and virtue.

IN WITNESS WHEREOF we hereunto set our hands and seals this day of.....A. D. 19 ..
Signed and sealed in the presence of
.....
Approved
City Clerk of New Bedford.

Section 6. Such permit shall not be in force until the bond required herein has been duly executed and approved by the city clerk.

Section 7. The owner and all persons engaged in the moving of said building, or obstruction of said sidewalks and streets shall at all times during such removal or such obstruction observe the instructions relative thereto given by the superintendent of streets, without in any manner invalidating the bond required in the preceding section nor involving the superintendent of streets or the City of New Bedford in any liability on account of such instructions.

Section 8. Any permit for moving a building or obstruction of sidewalks and streets as herein provided may be revoked by the mayor and aldermen, under the provisions of laws.

Section 9. Permits for moving a building or obstruction of sidewalks and streets shall be issued by the city clerk, subject to ratification by the mayor and aldermen, said permit to be provisional until ratified as aforesaid. Any owner who has been refused a provisional permit shall have the right to a hearing before the mayor and aldermen.

Section 10. The license fee for such permit to move a building or for the obstruction of sidewalks and streets for building purposes, which shall be paid to the city clerk before the issuance thereof, shall be five dollars, said fee if the mayor and board of aldermen refuse to ratify the provisional permit, shall be refunded to the owner.

Section 11. The owner, contractor or builder, who receives a permit for the obstruction of sidewalks and streets for building purposes shall post in a conspicuous place on said obstruction or on the building connected therewith, a card

furnished by the city clerk, said card shall state the time for which the permit is granted, to whom granted, and the space to be occupied by the obstruction.

Section 12. This ordinance shall take effect upon its passage.

Section 13. All ordinances, or parts of ordinances, inconsistent herewith, are hereby repealed.

In Board of Aldermen, April 27, 1916. Passed to be ordained.
EDWARD R. HATHAWAY, Mayor.

In Common Council, April 27, 1916. Passed to be ordained.
JOHN H. HOLLIHAN, President.

Presented to and approved by the Mayor, April 28, 1916. A true copy attest:— W. H. B. REMINGTON, City Clerk.

Licensing of Fish Pedlers.

AN ORDINANCE RELATIVE TO THE LICENSING OF FISH PEDLERS.

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. The City Clerk is hereby authorized, under the provisions of law, to grant and issue to any person, 21 years of age and over, and deemed by him suitable, a license as a hawker and pedler of fish within the limits of the City of New Bedford; no person shall hawk and peddle fish, within said city limits, without such license. Such license shall run for one year from the date of issue, unless sooner revoked. The licensee shall at all times when in the exercise of his license, conspicuously wear a badge, which shall be furnished by the City Clerk, and shall display two wagon plates, which shall be furnished by the City Clerk, one on either side of the body of the vehicle, of whatever description, used by him in the exercise of said license. Each license, badge and wagon plate, issued by the City Clerk shall be numbered and a record thereof kept by the City Clerk. A fee of ten (10) dollars, which shall be in full payment for the license, badge and

wagon plates, shall be collected by the City Clerk before the issue of the license. Duplicate badges and wagon plates, if required to be issued, shall be charged for at the following rates: Badges, fifty cents each; wagon plates, one dollar per pair.

SECTION 2. Every license issued under the provisions of Section 1 of this ordinance shall be subject to the following sanitary conditions: Every vehicle used for the peddling of fish shall be kept at all times in a clean and wholesome condition. From June 1 to October 1 of each year, fish sold by hawkers and pedlers shall be properly iced while in transportation. Each vehicle shall be provided with a covered pail to contain offal, and it shall be unlawful to throw any such offal into or upon any street or way of the city of New Bedford.

SECTION 3. No license shall be issued under the provisions of section 1 unless the applicant files with his application a certificate signed by the sealer of weights and measures of the City of New Bedford that the weights and measures to be used in the exercise of the license have been sealed in accordance with law.

SECTION 4. Any license issued under the provisions of section 1 may be suspended by the Board of Mayor and Aldermen without hearing, or may be revoked by the Board of Mayor and Aldermen after hearing, notice of said hearing having been mailed to the licensee at the address given in his application for the license, at least seven days prior to said hearing. No license shall be issued to a person whose license has been revoked for a period of one year after the date of revocation.

SECTION 5. Violation of any of the provisions of this ordinance shall be punished by a fine not exceeding twenty dollars.

SECTION 6. This ordinance shall take effect on the first day of July, 1916.

In Board of Aldermen, June 22, 1916. Passed to be ordained.

EDWARD R. HATHAWAY, Mayor.

In Common Council, June 22, 1916. Passed to be ordained.

JOHN H. HOLLIHAN, President.

Presented to and approved by the Mayor, June 23, 1916. A true copy, attest:—

JAMES DIGNAM, Asst. City Clerk.
